

Mohamed Conde

Python Developer

Fargo, ND | (218) 329-3370 | Mahmetcond@gmail.com | LinkedIn | GitHub

SUMMARY

- Having **5+ years** Strong plus Experience as a **Python Developer** with proven expertise in using new tools and technical developments to drive improvements throughout the entire **Software Development Lifecycle**
- Familiarity with implementing **Model view control** architecture using **Django** for web-based applications
- Worked in a team of developers in the creation of interactive web pages using **Django Rest Framework, CSS, JavaScript**, and **Bootstrap**, enhancing user engagement and experience.
- Experienced in web application development using **Django/Python, Flask/Python**, and **Node.js, jQuery** while using **HTML/CSS/JS** for server-side rendered applications.
- Participated in all phases of the **System Development Life Cycle Analysis** (SDLC) and was responsible for gathering requirements, system analysis, design, development, testing, and deployment.
- Created **PHP/MySQL** back-end for data entry from Flash and worked in tandem with the Flash developer to obtain the correct data through query string
- Deployed, managed, and monitored scalable applications on **AWS**, ensuring high availability and performance.
- Lead the design and development of robust **C# applications**, leveraging your Python expertise to drive innovation and efficiency.
- Performed **troubleshooting, fixed**, and deployed many **Python bug fixes** of the two main applications that were a main source of data for both customers and the internal customer service team.
- Created visually appealing, cross-browser-compatible web pages with **HTML5, CSS3**, and **Bootstrap**.
- Used **Python** library **Beautiful Soup** web scrapping to extract data for building graphs.
- Architected and implemented robust **RESTful APIs**, ensuring secure and efficient data exchange.
- Innovated with advanced machine learning models using **TensorFlow, Keras**, and **PyTorch** to address complex business challenges.
- Employ advanced development tools such as **IntelliJ, Android Studio, XCode, Visual Studio, PyCharm**, and **Jira** for efficient coding, debugging, and project management.
- Performed comprehensive data analysis and visualization with **NumPy, Pandas, Matplotlib, SciPy**, and **Seaborn** to extract actionable insights.
- Demonstrate **strong soft skills**, enhancing team collaboration and project success.

SKILLS

Programming Languages:	Python, C#, JavaScript, TypeScript, Java, C++, Swift, Objective-C, Kotlin, PHP, UIKit, NodeJS
Frameworks/ Libraries/Packages:	Django, Flask, React, React Native, TensorFlow, Keras, PyTorch, Scikit-learn, NumPy, Pandas, Matplotlib, SciPy, Seaborn, Requests, Beautiful Soup, .NET Frameworks, Angular
Web Development:	HTML5, CSS3, RESTful APIs, Bootstrap
Cloud:	AWS
Container:	Docker
Development Tools:	IntelliJ, Android Studio, XCode, Visual Studio, PyCharm, Jira
Database Management:	SQL, SQLite, SQL Server
Methodologies:	SDLC, Agile
Testing & Automation:	Selenium, Karate Robot
Operating Systems:	Windows, Linux, and macOS
Other Skills:	AI/ML, Communication, Problem-Solving, Collaboration, Time Management, Adaptability, Critical Thinking, Customer Focus

PROFESSIONAL EXPERIENCE

Python Developer

| Feb 2022 – Present

DXC Technology, Remote

- Lead the SDLC process by overseeing gathering requirements, system analysis, design, development, testing, and deployment.
- Engineer and maintain RESTful APIs to ensure seamless data exchange between the front-end and back-end.
- Design and implement backend services and APIs using C# to integrate with Python-based applications.
- Implemented SPA's using Angular directives, filters, controllers, and modules. Developed Angular routing using Angular UI Router as per the requirement.
- Utilized RESTful APIs and web services to connect C# applications with Python-based systems for data exchange and processing.
- Develop views and templates using Python and Django's view controller and templating language to create a user-friendly website interface.
- Architect, implement and refine advanced machine learning models to tackle complex business challenges with precision.
- Establish scalable automated processes for developing, validating, and implementing AI/ML models.
- Apply software engineering principles to develop iOS and Android applications, emphasizing scalability and maintainability.
- Craft applications using Swift, Objective-C, and Java, integrating backend services through RESTful APIs.
- Design and optimize databases using SQL, SQLite, and SQL Server to ensure data integrity, security, and performance.
- Utilize AI and ML/DL libraries such as PyTorch, Keras, TensorFlow, Spark/Pyspark, NumPy, Pandas, SciPy, and Boto3 for advanced data processing, mining, and predictive modeling.
- Collaborate with cross-functional teams to deliver high-quality applications within a fast-paced, innovative work environment.
- Design and manage API system deployment using a fast HTTP server and Amazon AWS architecture.
- Design and implement dynamic, responsive user interfaces with React and React Native, significantly enhancing user engagement and satisfaction.
- Develop and maintain high-quality mobile applications for iOS and Android using Swift, Objective-C, and Kotlin, ensuring seamless user experiences.
- Work with Python Scientific packages like NumPy and Pandas to handle data sets effectively.
- Utilize Docker for containerization and manage containers for virtualization, ensuring consistent development and deployment environments across teams.
- Lead automated testing initiatives using Selenium and Karate Robot to ensure application functionality, performance, and reliability.
- Create reusable TypeScript components and services to consume REST APIs using React's component-based architecture.
- Spearhead the debugging and troubleshooting of C# applications, swiftly resolving issues to ensure smooth operation and user satisfaction.
- Contribute to the development of the user interface using HTML5, CSS3, and Bootstrap, incorporating React services and Pipes for data retrieval, filtering, and dynamic functionality.
- Collaborate and communicate with colleagues with positivity and kindness

Python Developer

| Mar 2019 – Feb 2022

Epsilon, New York, NY

- Wrote and debugged code for automated tests, reducing testing time by 50% and improving overall code quality by 25%.
- Developed web applications and RESTful web services and APIs using Python Flask, Django, Pyramid, and PHP.
- Optimized C# code for performance improvements and scalability, aligning with Python application's requirements.
- Developed responsive web application pages and used Angular JS services, controllers, and directives for front-end UI and consumed SOAP, and REST web service API

- Created visually appealing, cross-browser compatible web pages with HTML5, CSS3, and Bootstrap, ensuring a seamless user experience.
- Implemented advanced features with React and React Native, ensuring dynamic and responsive interfaces.
- Documented C# and Python integration processes, including API specifications, data flow diagrams, and system architecture.
- Champion ethical AI practices and compliance with data privacy regulations in all AI/ML solutions.
- Designed and developed a RESTful API using Flask, resulting in a 25% increase in application performance and a 20% reduction in response time.
- Used Python to write data into JSON files for testing Django Websites. Created scripts for data modeling and data import and export.
- Leveraged advanced JavaScript and TypeScript techniques to elevate application interactivity and performance.
- Crafted user interfaces using HTML5 and JavaScript, ensuring a seamless and responsive user experience.
- Crafted complex SQL queries for efficient data retrieval, manipulation, and reporting, driving business intelligence.
- Developed full frontend and backend modules using Python on the Django Web Framework, employing Django MVC for designing, coding, and building the application.
- Communicate with internal and external users about the product and incorporate feedback into product enhancements
- Developed and executed comprehensive unit tests for C# code, ensuring rigorous validation and compatibility with Python testing frameworks.

PROJECTS

Soccer Fantasy and Live Scores App - GitHub

- Designed an app using SQLite and API, that allows users to create and manage their fantasy team.

Clothing App

- Designed an Android app using SQL database, in-app messaging, and an algorithm to verify credit cards.

Movie App

- Created a movie application using React typescript for the front end and a movie database API.

EDUCATION

Master of Science in Software and Security Engineering (Present)

North Dakota State University (NDSU), Fargo, ND

Jan 2023 -Dec 2026

Bachelor of Science in Computer Science, GPA: 3.70

Minnesota State University Moorhead (MSUM), Moorhead, MN

Aug 2017 – Dec 2021
