Cyber Security Analyst with five years of experience in threat detection and incident response; recognized as a certified CompTIA Security+ professional. Spearheaded initiatives that resolved leading issues behind 90% of security breaches detected while reducing incident response times by approximately 30%. Improved incident detection capabilities through real-time analysis and automated alerts, achieving a significant decrease in reported incidents by over 40%.

PROFESSIONAL EXPERIENCE

CyberNow Labs, Sterling, VA

2024 – Present

Cyber Security Analyst (SOC Analyst)

- Responded to security incidents in a 24x7 Cyber Security Operation Center (SOC), performing forensic analysis, containment and recovery to mitigate threats and ensure timely resolution of incidents.
- Conducted in-depth investigations with SOC team over 150 suspicious activities each month; recorded insights in Hive and Jira, identifying key root causes behind recurring security issues that enhanced overall incident response time.
- Identified critical vulnerabilities through real-time analysis of threat data sources; improved incident detection capabilities by implementing automated alerts that reduced response time for potential threats by over 35%.
- Monitored all devices of the company using SentinelOne EDR SOLUTION to identify, assess, and mitigate potential threats within the environment and reducing potential threats by 30% through monitoring via SentinelOne.
- Aimed thorough analysis of security logs through QRadar, uncovering more than 50 instances of unauthorized access each month; developed actionable insights leading to a tangible reduction in incident response time by approximately 30%.
- Deployed Proofpoint to fortify email defenses, ensuring robust safeguards against sophisticated threats like phishing and business email compromise (BEC), resulting in more than a 40% drop in incident reports during monitoring periods.
- Identified and differentiated false positives from actual intrusion attempts to triage and escalate priority cases to advanced response teams within 10-15 minutes.
- Led the development and integration of automated alert systems for critical anomalies, achieving a 40% decrease in response times to potential security breaches across three major platforms while streamlining incident management processes.
- Advised and delivered a company-wide cybersecurity awareness program, resulting in a 40% reduction in successful phishing attempts within six months.

Ferko Insaat A.S, Istanbul, Turkey,

2016 – 2022

Accountant

- Documented more than 250 unique invoice entries per quarter in the accounting software while maintaining a clear audit trail of all receipts linked directly to respective client accounts for streamlined tracking purposes.
- Clarified intricate financial data to a client base of over 50 accounts monthly; provided valuable recommendations leading to the identification of three major areas for process improvements in budget allocation practices.
- Maintained accurate and timely ledgers of cash inflows and outflows, including the reconciliation of daily cash receipts and disbursements.

EDUCATION

Anadolu University, Istanbul, Turkey

2015-2020

Bachelor of Economy

Beykent University, Istanbul, Turkey

2013-2015

Bachelor of International Trade

SKILLS & TOOLS

Cyber Security: IBM QRadar, SentinelOne, Nmap, Proofpoint, TheHive, Jira, Nessus, Kali Linux,

Networking & Virtualization: Wireshark PCAP Analysis, DNS, Whois, Virtual Box, Web Application Firewall, Next Generation Firewall, TCP/IP, IDS/IPS

OSINT: VirusTotal, AnyRun, MXToolBox, JoeSandbox, Hybrid Analysis, URLScan.io, AbuseIPDB, CyberChef, Ip Data Frameworks: OWASP Top 10, MITRE ATT&CK, Cyber Kill Chain, SANS, NIST

Technology: Google Suite & Google Docs,

CERTIFICATIONS AND TRAININGS

Certifications: CompTIA Security+, Armis Cyber Defense Core

Training: CyberNow Labs Certified Defensive Security Analyst
