SUMMARY:

- Having **5+ years** of professional experience as a **Business Analyst** with expertise in understanding and documenting business process requirements to drive operational improvements.
- Working expertise in **Software Development Life cycle** (SDLC) and Software Development Methodologies including Rational Unified Processes (RUP), **Waterfall**, and **Agile**.
- Actively used **Joint Application Development** (JAD) and **Rapid Application Development** (RAD) sessions with Business users, SMEs, and stakeholders alike in **gathering requirements** and analyzing them to identify the real business need and facilitate the development of a customized solution that delivers maximum cost and usability benefit to the client and company.
- Created interactive data visualizations using **Tableau** and **Power BI** to present complex data in an easily understandable format for decision-makers.
- Utilize programming languages such as **SQL** and **Python** to extract and manipulate data, providing actionable insights to support decision-making processes.
- **Leverage database knowledge** in **MS SQL Server**, **Oracle**, **DB2**, and **MongoDB** to support data-related requirements and reporting needs.
- Extensive knowledge and working experience in converting business requirements into **UML diagrams** using Rational Rose and **MS Visio**, as well as managing and tracking those requirements.
- Experience in process modeling using **Use Cases**, **Sequence Diagrams**, Collaboration diagrams, Activity Diagrams, and **Class Diagrams**.
- Extensive experience in producing documents like **Business Requirements Documents** (BRD), **Functional Requirement Specifications** (FRS), Software Requirement
- Specifications (SRS), Creating Request for Proposals (RFP), creating **Requirement! Traceability Matrix** (RTM).
- Experience in developing and imparting pre- and post-implementation training, conducting **GAP Analysis**, **User Acceptance Testing** (UAT), **SWOT Analysis**, and ROI analysis.
- Driven by creative ideas and backed by **strong Analytical** and **methodical problem-solving skills**, identifying causes, correctly (actions and providing innovative solutions, building strategic partnerships with senior business leaders, and getting commitments to actions from individuals at all levels.

SKILLS

BA Skills: Business Analysis, Project Management, Requirement, Elicitation, Gap Analysis, Stakeholder Management, Product Design, Agile Methodology, SDLC, Wireframing, Team Management, Process Automation, BRD, FRD, Use Cases, User Stories, Problem Solving, Product Strategy, Market Research

Programming Languages: SQL, Python, JSON, XML

Tools and Technologies: Tableau, Excel, Git, JIRA, MS Office suite (Excel, SharePoint, Word, PowerPoint, Access, Visio, Project), Qlik Sense, Power BI, ALM, Confluence

CRM Packages: Microsoft Dynamics CRM 2013

Quality Tools: HP Quality Center, IBM RQM, BMC Remedy, JIRA

Database: MS SQL Server, Oracle, DB2, Mongo DB

Methodologies: SDLC, Waterfall, Agile, Scrum, Kanban

Operating System: Unix, Linux, Microsoft Windows Family

WORK EXPERIENCE

Business Analyst

| Oct 2022 – Present

BNY Mellon, Wilmington, DE

- Design the business requirement collection approach based on the project scope and create business analysis using agile methodology.
- Create project plans, style sheets, and templates to analyze and estimate feasibility, cost, time, and general guidelines for the project team.
- Leverage Python and SQL to extract, clean, and analyze large datasets, reducing operational costs by 15% through optimized resource allocation.

- Prepare detailed Business Requirements Documents (BRD) and Functional Specifications with a 98% accuracy rate, ensuring clear communication and alignment across project teams.
- Led the implementation of a new CRM system, streamlining communication and data sharing among departments, resulting in a 25% improvement in interdepartmental collaboration.
- Implement Tableau dashboards to visualize market trends and performance metrics, contributing to a 10% improvement in asset allocation accuracy.
- Utilize quality management tools such as HP Quality Center and IBM RQM to track defects, ensuring all issues are resolved before deployment.
- Facilitate JAD (Joint Application Development) sessions with business users and development teams to drive out detailed business requirements.
- Refine and input business requirements in the HP Quality Center for traceability to test requirements.
- Create Use Case Diagrams, Activity Diagrams, Sequence Diagrams, and Dataflow Diagrams in MS Visio, and prepare functional requirements to define the system rules by creating Use Cases and interface design.
- Assist Customer Service, Sales, and Marketing departments with customers' accounts for billing and promotion errors.
- Create different graphs and charts such as pie charts and bar charts using MS Excel, and also develop reporting presentations using MS PowerPoint.
- Prioritize the product backlog on JIRA, aligning development efforts with business objectives and ensuring efficient project progression.
- Collaborate with QA teams and developers to clarify functionality, resolve issues, and provide feedback to identify and rectify defects.

Business Analyst

| Jul 2020 – Sep 2022

MetLife, Bridgewater, NJ

- Acquired experience in creating Key Performance Indicators (KPIs), Enterprise Risk Management, Risk Mitigation, and Business Continuity Planning (BCP).
- Facilitated JAD sessions with SMEs to identify business rules and functional and non-functional requirements, and developed and maintained the Traceability Matrix.
- Authored BRDs, designed prototypes, workflows, mapping implementation, and testing for the processing of Medicaid claims.
- Coordinated communication between cross-functional teams such as marketing, product, design, and application developers.
- Executed API services testing using the Postman tool to validate responses.
- Analyzed basic SQL queries and modified inner left and right joins in Power BI Desktop by connecting live/dynamic and static datasets.
- Established and maintained Agile artifacts, including the Sprint backlog, Product backlog, and burn-down chart, and engaged in Scrum events such as Backlog Grooming and Story-Point Estimation.
- Promoted close cooperation across all roles and functions, addressing resource issues and deviations from Agile practices.
- Oversaw the development, design, and execution of User Acceptance Testing (UAT).
- Created data visualizations using tools like Tableau, Power BI, and Qlik Sense to present findings and recommendations to stakeholders in a clear and impactful manner.
- Participated in Product backlog grooming and prioritized the product backlog based on business priorities while developing detailed user story acceptance criteria.
- Documented and maintained process flows using tools like Visio to support process improvement initiatives and knowledge transfer.

EDUCATION

Masters in Information Technology

Washington University of Science and Technology, Vienna, VA.

BSC Geology

Olabisi Onabanjo University Ogun State, Nigeria
