Experienced in project management tools like Jira, Asana, and Microsoft Project, and familiar with Epic, Cerner, and Meditech EHR systems. Strong in report writing, presentation, and stakeholder engagement. Proficient in Lean, Six Sigma, root cause analysis, and critical thinking. Collaborative team player using Microsoft Teams, Slack, and Zoom to drive successful healthcare initiatives.

SKILLS

Methodologies: SDLC, Agile, Waterfall, Research methodologies, Market research

Statistical Analysis: R, Python, SAS

Data Management: SQL, NoSQL

Business Intelligence (BI) Tools: Tableau, Power BI, QlikView

Healthcare Regulations: HIPAA, HITECH, ACA

Project Management & Collaboration Tools: Jira, Asana, Trello, Microsoft Project, Smartsheet, Notion

Electronic Health Records (EHR): Epic, Cerner, Meditech

Collaboration Tools: Microsoft Teams, Slack, Zoom, Microsoft Office, Canva

Document Management: SharePoint, Google Docs

Data Analysis & Visualization: Power BI, Tableau, SPSS, Amazon QuickSight

Communication Skills: Report Writing, Presentation, Stakeholder Engagement

Problem-Solving: Root Cause Analysis, Decision-Making, Critical Thinking

Process Improvement: Lean, Six Sigma

Operating System: Windows, Linux

EDUCATION

Master of Public Health - Health Administration

Aug 2020 – May 2022

Tata Institute of Social Sciences, India

Bachelor of Homeopathic Medicine and Surgery

Sep 2013 – May 2019

Sardar Patel University, India

EXPERIENCE

Cigna, WA | Nov 2023 - Current | Healthcare Business Analyst

- Manage and facilitate healthcare projects using Agile methodologies, ensuring compliance with HIPAA, HITECH, and ACA regulations. This has improved patient data security and increased project efficiency by 15%.
- Conduct detailed data analysis using SQL, NoSQL, R, Python, and SAS, providing actionable insights that optimize clinical workflows and reduce patient wait times by 20%.
- Create data visualizations and dashboards using Tableau, Power BI, and QlikView, driving decision-making improvements for healthcare providers and increasing operational transparency by 25%.
- Lead market research and data-driven studies on patient care trends and healthcare market shifts, employing Lean, Six Sigma, and root cause analysis, which result in a 10% reduction in operational inefficiencies.
- Collaborate with cross-functional teams using Jira, Asana, Microsoft Project, and Smartsheet, ensuring seamless communication and project tracking, reducing misalignment by 30%.

- Engage with stakeholders, including clinicians, administrators, and IT teams, to gather requirements. Utilize Epic, Cerner, and Meditech to integrate new electronic health records (EHR) successfully features that improve clinical performance.
- Prepare comprehensive reports and presentations using Microsoft Office, SPSS, and Amazon QuickSight, delivering data-driven insights to executive teams and improving strategic decision-making by 18%.
- Enhance stakeholder communication and project transparency through Microsoft Teams, Slack, and Zoom, resulting in a 15% improvement in project delivery timelines and higher stakeholder satisfaction.

CitiusTech, India | June 2022 - Oct 2023 | Business Analyst

- Led requirement gathering sessions, liaising between client and engineering teams to ensure healthcare solutions met business needs, and proactively identified & resolved client issues.
- Conducted market research, storyboarding, and insight generation and analyzed product performance and market trends using BI tools.
- Crafted detailed white papers, executive presentations, and evidence-based POVs.
- Analyzed and documented requirements for automating the collection, processing, and distribution of medical imaging data using RPA; coordinated the integration of AI-based diagnostic tools for a Microsoft company.
- Defined and implemented features that enhanced the analytical capabilities of a healthcare data management platform built for the largest consulting firm in the U.S.
- Gathered and documented requirements, managed user stories and decision algorithms, and designed test cases to successfully develop and implement CDSS for an American global conglomerate.
- Ensured compliance with federal healthcare regulations and optimized data management and interoperability for the tech modernization of a global healthcare technology company.

Orion Technolab, India | Jan 2021 - June 2022 | Business Analyst

- Led the implementation of healthcare projects through SDLC and Waterfall methodologies, ensuring timely delivery and full compliance with HIPAA, HITECH, and ACA, reducing project timelines by 15%.
- Conducted advanced statistical analysis using R, Python, and SAS, providing insights that contributed to a 20% improvement in patient outcomes by optimizing clinical workflows and resource allocation.
- Developed interactive dashboards and reports with Tableau, Power BI, and QlikView, which enhanced decision-making for healthcare administrators, leading to a 25% increase in operational efficiency.
- Performed in-depth market research and analysis using structured research methodologies, identifying key industry trends that informed strategic decisions and increased competitive positioning by 10%.
- Managed cross-functional teams using Jira, Trello, and Smartsheet, improving project collaboration and task tracking, which resulted in a 30% reduction in project delays and miscommunications.
- Collaborated with IT and clinical teams to integrate Epic, Cerner, and Meditech EHR systems, successfully streamlining data workflows and increasing system interoperability by 18%.
- Led stakeholder engagement initiatives using Microsoft Teams, Slack, and Zoom, resulting in a 15% improvement in stakeholder satisfaction and alignment with project goals.
- Applied Lean and Six Sigma principles to perform root cause analysis, identifying bottlenecks in patient care processes and implementing solutions that reduced operational waste by 12%.
