

PROFILE

Data Analyst with 3+ years of expertise in **SQL**, **Python**, and **data visualization** to drive **insights** and support **strategic decision-making**. Skilled in **Agile** and **Waterfall** methodologies, enhancing **project efficiency** by 30% through **optimized analysis** and **reporting**. Proficient in **Tableau**, **Power BI**, and tools like **NumPy** and **Pandas** for **data manipulation** and **insightful visualizations**. Experienced in **AWS** and **Azure** for **scalable data solutions** and adept at managing **RDBMS** and **NoSQL databases** to ensure efficient **data storage** and **retrieval**. Recognized for **critical thinking** and **problem-solving** in delivering **data-driven solutions** that align with business objectives.

SKILLS

- Methodology:** Agile, SDLC, MLOps
Programming Languages: Python, SQL
Databases: SQL (MS SQL Server, MySQL, PostgreSQL), NoSQL (MongoDB)
Big Data Technologies: Hadoop, Apache Spark
AWS Technologies: S3, EC2, RDS, Glue, Redshift
Azure Technologies: Azure Data Factory, Azure Synapse Analytics, Azure Blob Storage
Data Science Libraries: NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, Plotly, SciPy
Data Analytics Techniques: Exploratory Data Analysis (EDA), Feature Engineering, Data Cleaning, Data Transformation
Statistical Analysis: Bayesian Statistics, Regression Analysis, Descriptive Statistics, Hypothesis Testing
Visualization Tools: Power BI, Tableau, Microsoft Excel

WORK EXPERIENCE

Capgemini, USA Remote | Data Analyst Intern

Jan 2024 – Present

- **Extracted and processed large datasets** using SQL and Python, enhancing data-driven decisions that led to a **15% improvement in project outcomes** by identifying key performance indicators (KPIs) and optimizing business strategies.
- **Collaborated across teams** in finance, marketing, and operations to deliver data-backed insights that **reduced operational costs by 18%** through informed budgeting and resource allocation.
- **Developed interactive dashboards** and reports in **Tableau, Power BI, and Looker**, transforming complex datasets into clear, visual narratives that **accelerated executive decision-making cycles** and improved client satisfaction by ensuring timely and actionable insights.
- **Led data integration and transformation** processes on **cloud platforms like AWS and Google Cloud**, optimizing ETL workflows to **reduce data access times by 25%** and enhance project scalability and flexibility.
- **Implemented predictive modeling and trend analysis** to forecast revenue and identify growth opportunities, increasing **forecasting accuracy by 20%** through refined data analysis techniques and consistent performance tracking.
- **Streamlined data cleaning and quality assurance** protocols to achieve a **30% improvement in data accuracy** and integrity, supporting high-quality analytics for client presentations and business recommendations.
- **Standardized reporting processes** by building automated workflows in SQL and Python, **decreasing report generation time by 22%**, thus enabling quicker response times and efficient client service.
- **Utilized RDBMS and NoSQL databases** (e.g., MySQL, MongoDB) for seamless data storage and retrieval, enhancing the analytical capacity for diverse projects and ensuring **comprehensive, reliable data management** across multiple projects.

Kasturi Foundation, India | Data Analyst

Jan 2020 – Dec 2022

- **Extracted and analyzed large datasets** using SQL and Python, uncovering insights that improved program impact by 20% through targeted resource allocation and strategic adjustments.
- **Led cross-functional collaboration** with program and technical teams, implementing **Agile** and **Waterfall methodologies** to ensure consistent on-time project delivery, enhancing team efficiency by 15%.
- Designed and implemented **data visualization solutions** with **Matplotlib, Plotly**, and **Tableau**, translating complex data trends into accessible visuals that informed executive decision-making and program adjustments.
- Developed **interactive dashboards** and reports in **Power BI** and **Tableau** to communicate program metrics to stakeholders, contributing to a **25% increase in funding** by illustrating data-backed impacts and outcomes.
- **Streamlined cloud-based data workflows** in **AWS** and **Azure**, optimizing data collection and retrieval processes for education initiatives and reducing data access times by 30%.
- Conducted **data cleaning and transformation** processes, improving data accuracy by 40%, which enhanced the quality of outcome-based reports and program assessments.
- **Implemented RDBMS and NoSQL database management systems** to ensure seamless data storage, integration, and retrieval, supporting scalable analytics for diverse projects.
- Produced actionable **data insights reports** and strategic recommendations, empowering leadership with **evidence-based insights** that shaped program strategies and resulted in measurable improvements.
- **Optimized reporting cycles** by establishing automated workflows in **Python** and **SQL**, reducing report generation time by 25% and enabling faster decision-making cycles.

PROJECTS

Huntsville Madison County Chamber | Business Analytics Capstone Project

- **Transformed large workforce datasets** using **Excel** and **Power BI** for cleaning, organization, and visualization, resulting in **reliable data for detailed workforce analysis** across the Huntsville metro area.
- **Conducted an independent analysis of job concentrations**, categorizing roles into **STEM and non-STEM fields** and ensuring accurate segmentation for industry insights.
- **Developed a user-friendly reporting tool** with **Tableau** and **Power BI** that allowed stakeholders to compare job concentration data in Huntsville with other U.S. metro areas, providing **valuable benchmarking data for strategic workforce initiatives**.
- **Utilized SQL for querying and managing employment data**, improving data retrieval efficiency and supporting real-time insights.
- **Created interactive dashboards** in Power BI, highlighting workforce trends from **2020 to 2023**, which aided stakeholders in identifying key growth areas and aligning resources effectively.
- **Engaged stakeholders in regular meetings** and presented data findings, using **Power BI visualizations** to **enhance** understanding and support informed **decision-making** for workforce development.

Fraud Detection in Transaction Data | Advanced Analytics Project

- **Collected and cleaned transactional data** in Python, effectively handling missing values and outliers to ensure a **robust dataset for accurate analysis**.
- Conducted **Exploratory Data Analysis (EDA)** using **Matplotlib** and **Seaborn**, revealing key transaction patterns that informed model feature selection.
- **Engineered new time-based and categorical features** to enhance predictive power, applying advanced techniques like **categorical encoding** with Pandas and NumPy for improved model accuracy.
- **Developed and optimized machine learning models** for real-time fraud detection, utilizing **scikit-learn for tuning** and deploying the best model to detect anomalies in transaction data.
- **Implemented the model for real-time fraud detection**, achieving a notable **increase in detection accuracy** by incorporating **key features**, and supporting proactive fraud prevention strategies.

EDUCATION

Master of Science in Business Analytics

University of Alabama Huntsville, USA

May 2024

Bachelor of Science with Honours in Agriculture

P.D.M University Haryana, India

May 2021
