

Reginald Watson

Charlotte, NC 28214 | 704-608-3765 | reggie.watson.reggie@gmail.com

Summary

I'm an experienced Digital Transformation Consultant with a Computer Science degree from the University of North Carolina at Charlotte. I have excellent oral and written communication, strong attention to detail, and great problem solving skills. Simplifying complex technical concepts for non-technical audiences comes very easy to me, and I'm passionate about using my skills in coding, business analysis, and information technology to drive meaningful change. With hands-on experience in both banking and healthcare, I've seen firsthand how technology can transform businesses. I'm now looking for new opportunities in software development, data analytics, or business intelligence, where I can continue to solve problems and help organizations thrive.

Skills

Business Applications: Sharepoint, ServiceNow, Amazon Web Services (AWS), CAST Software, Salesforce (SFDC), SAS Apporro, Snowflake Sales Professional, Microsoft Azure

Work Experience

Digital Transformation Consultant, **NTT Data**

Charlotte, NC

July 2022-Current

- Meeting with stakeholders internally to gather evidence of qualifications, re-formatting and re-organizing the data to be presented to clients
- Generating data visualization metrics via Excel, used for weekly reporting testing statuses and preparing presentations to senior leaders
- Improved client team adoption of the reporting process by creating a detailed job aid that includes reporting procedures and step-by-step screenshots
- Leading the data analysis workstream of the Truist project, producing clear, actionable visuals and reports for senior leadership via Excel to guide decision-making
- Supporting NTT's AWS Competency program by working with key stakeholders to document case studies and meet AWS validation checklist requirements

- Supporting new hire onboarding and integration into the consulting team by participating in the New Hire Buddy program, ensuring smooth transitions for young professionals coming straight out of college
- Prepared many case studies via SharePoint, including visuals and written explanation of various projects for senior leadership to access
- Updating and managing key project documentation matrixes (RTM, RACI, BRD) to track milestones and ensure alignment across team members on project deliverables
- Reporting via Salesforce (SFDC) data extract into Excel and cleansing data as necessary
- Troubleshooting users using remote desktop connection, managed user domains and permissions, and managed requests using service now using great customer service and oral communications
- Managing Financial Service (FSI) SharePoint website to display relevant information to the whole department

Technical Analyst Associate, **Atrium Health**

Charlotte, NC

December 2021-July 2022

- Programmed, configured, and imaged Jabber Cisco onto iOS devices throughout the hospital for the Epic software go live
- Used oral communication and technical skills during deployment in different departments throughout the hospital to help doctors and nurses comprehend new software
- Helped troubleshoot iOS devices and computers, using my technical knowledge to support departments during the day and overnight
- Reported case experiences back to managers to help assist users and managers with future technical issues

Education

The University of North Carolina at Charlotte

Charlotte, NC

December 2021

B.S. Computer Science

Awards

- Received recognition by NTT Data and Truist for the data analysis work I contributed to the merger of SunTrust and BB&T
- Supported the successful collaboration of the Duke University Health System Augmented Home Care delivery by splicing questions and gathering requirements from vendors
- Contributed to the successful launch of the Epic Rover Go Live for Atrium Health locations by using oral, written and technical skills for non-technical staff members
