

SUMMARY -

- 3+ years experienced results-oriented professional in the field of data analytics, business and sales analytics, with focus on data modelling and warehousing, data source evaluation, visualization, data cleaning, classification, and regression.
- Adept at market research, lead generation, and collaborative cross-functional teamwork with proven ability to leverage data insights to drive strategic decision-making, optimize processes, and achieve measurable results.

EDUCATION -

- **Master of Science in Data Modeling/Warehousing and Database Administration** Present
Northeastern University Boston, MA
- **Post Graduate Diploma in Computer Applications** May 2022
Christian Eminent, India
- **Bachelor of Business Administration** April 2021
Symbiosis University of Applied Sciences, India

TECHNICAL SKILLS -

Programming: Python, R, SQL, NoSQL, HTML, CSS, VBA Macros.

Database: MySQL, SQL Server, PostgreSQL, MongoDB, MySQL Workbench.

Tools: Power BI, Tableau, RStudio, Google Analytics, RShiny, Advanced Excel (VLOOKUP, Pivot Tables), Spark.

Libraries and Frameworks: NumPy, Matplotlib, Pandas, SciPy, Scikit-Learn, GGplot2, Dplyr, Shiny, TidyR, Readr, StringR.

Concepts: Agile, Waterfall, Advanced Analytics, Data Visualization, Warehousing and Transformation, Forecasting and Modelling.

Other Skills: Azure Cloud, Oracle, Git, GitHub, Microsoft Office (Word, PowerPoint).

WORK EXPERIENCE -**Data Analyst Intern | Bow Wood Cabinet System, Ontario, Canada****Jan 2024 - Mar 2024**

- Enhanced data quality and reliability through Python and Excel for financial, quotation, and sales data, followed by exploratory data analysis (EDA) in Tableau to visualize growth trends and quotation distribution.
- Integrated Python scripts into Tableau for improved searchability and user-friendliness of Smartsheet dashboards, ensuring thorough testing and teamwork to enhance project effectiveness.

Business Analyst | MG Motors and Nissan, India**Jan 2021 - Apr 2021**

- Implemented data-driven marketing efforts that **increased sales leads by 20%** and informed product design improvements.
- Utilized statistical analysis to identify and address inefficiencies, resulting in a 10% reduction in production costs.

Sales Analyst | GP Company, PlyTech Ltd, India**Sep 2020 - Oct 2020**

- Applied data-driven techniques leading to a **7% increase in production** and a 20% reduction in downtime.
- Conducted real-time data analysis to **reduce customer complaints by 12%** through proactive quality control.

PROJECTS -

- **Meteorite Research Project:**

Utilized regression models to analyze distribution and impacts.

Identified predictors, including latitude and longitude's influence on fall mass.

Demonstrated expertise in statistical modeling and geographic analysis.

- **Data-driven Insights and Visualization:**

Contributed to data analysis and dashboard construction to tackle challenges encountered by Bowood Cabinet Systems.

Enhanced data processes to achieve deeper insights into financial performance and sales trends.

Created dynamic dashboards displaying quotation conversion rates and local sales trends.

- **Application Development Project:**

Led the development of a Wine Finder Application utilizing Streamlit, with the goal of simplifying wine selection for users.

Implemented user-friendly filters based on minimum rating and weight preferences to streamline the wine browsing process.

Enhanced user engagement by refining the platform for personalized wine exploration, resulting in heightened user satisfaction.
