Skill Summary

Languages: Python, SQL, JavaScript, Scala, Perl, Matlab

Frameworks: NoSQL, Databricks, Pytorch, Pyspark, Tensorflow, MongoDB, React.js, Node.js, Unity, CSS, Tableau

Platforms/Too: Git, AWS cloud, Docker, Jira, Azure, PowerBI, Linux/Unix, MATLAB, Data Bricks, Tableau, Excel

Skills: IT Infrastructure-Technical Support, web-services, Front-End/Back-End, Data warehousing, **Data modeling, DevOps, Agile Methodologies, Root Cause Analysis**, ML/AI, Cloud Computing, incident response, information security, troubleshooting.

Professional Experience

Huntington National Bank

08/2023 - Present

Business Data Analyst

Arizona, USA

- Established business requirement frameworks using **Agile methodology**, enhancing development efficiency and feedback integration, resulting in a **25% improvement** in project timelines.
- Enhanced data processing by optimizing **Informatica mappings** and **SQL queries**, and developed project plans with MS Project, improving system **performance and resource management by 20%**.
- Conducted **GAP and risk analyses** to identify inefficiencies and reduce risks; created **Tableau reports** for data-driven insights, supporting executive decision-making and stakeholder alignment through **JAD sessions and RTM tracking**.

Deloitte Touche Tohmatsu India Lp

12/2021 - 08/2022

Analyst: Customer Strategy & Applied Technology Design

Pune, India

- Conducted telecom plan research and firmographic analysis across Korea, Kenya, and South Africa, developing AI-driven B2B pricing strategies forecasting **32% revenue growth, increased client satisfaction by 20%**, reduced service response by 30%
- Increased workflow and data integration with **ServiceNow**. Analyzing product wise regional data to **Cross-Sell and Up-Sell other LOB offerings**. Customer Profile Segmentation based on demographics, historical trends and seasonal product purchases
- Maintained project tracking and data analysis, boosting data processing efficiency with **SQL Server**, and customer segmentation to project revenue growth.

Prop Technology, India

05/2021-04/2022

Business Intelligence Analyst

Gujarat, India

- Implemented **SDLC (Waterfall) methodology** to standardize processes, utilizing **Jira** for project tracking and Confluence for documentation, enhancing workflow and team collaboration **efficiency by 30%**.
- Developed and managed requirements documentation (**FRDs, BRDs, user stories**) in **Jira and Confluence**, streamlining stakeholder-developer communication for over 20+ projects.
- Analyzed complex data with **SQL, Excel, and Power BI**, generating actionable insights and creating interactive Tableau dashboards integrated with **Google BigQuery**, improving **decision-making speed** for leadership by **40%**.

Projects

Climate Forecast Analyzer (Azure, Python, AWS, Tableau)

04/2024-07/2024

- Processed and analyzed over 1TB of historical climate data to simulate future climate impacts. Leveraged AWS SageMaker, Lambda, and ETL, reducing **computational time by 50% and storage costs by 30%**.
- Achieved a prediction accuracy of 85% using **XGBoost, OneHotEncoder, and hyperparameter tuning**. Used Tableau for data visualization and JavaScript for developing interactive simulations, increasing user engagement by 40%. Continuously refining models and expanding dataset for improved prediction accuracy and broader climate impact analysis.

Multi-Camera Markerless Motion Capture (AWS, Pyspark, Python, SQL, Cassandra, Javascript) 01/2024- 04/2024

- Developed a forensic investigating Motion capture system using more than 4 cameras using Camera Calibration. Demonstrated results with **86% accuracy** rates by tracking the motion of the ball.
- Implemented an open-source project such as Free Mocap alongside using ML models: Alpha Pose or Open Pose for Human Pose Estimation and volumetric object tracking.

Digital Wallet Mobile Application Frontend-Backend(React.js, Node.js, dbt)

09/2023-11/2023

- Led end-to-end testing for a secure and user-friendly digital wallet mobile app. Strengthened application security with **89.57% increment** through penetration testing and code reviews. Revised user experience with use case testing and ensuring an easy-to-use interface. Utilized dbt for data transformation and ensuring reliable data flow between the backend and frontend.

Strategic Real Estate Analytics and Financial Forecasting (SQL, Tableau, C, dbt)

05/2021-07/2021

- Identified key parameters for business innovation, leveraging **MySQL for strategic real estate data analysis**. Created a predictive financial model aimed at revamping occupancy rates, enhancing profits, and minimizing risks.
- Conducted sensitivity analysis and created a Tableau dashboard to ensure the model's profitability and maintain a positive cash flow.

Extracurriculars: Community Service

Project C.U.R.E., Arizona, USA

05/2023-06/2023

- * Coordinated the organization and inventory management of medical supplies, ensuring efficient and accurate distribution
- * Implemented data tracking systems for warehouse operations, enhancing the accuracy of medical supply logistics and supporting the backend database management

Education

Arizona State University

08/2022 – 05/2024

Master of Science in Information Technology- Ira A. Fulton Schools of Engineering

GPA: 4.33/4

Institute of Technology, Nirma University

07/2018 – 05/2022

Bachelors of Technology in Electronics and Communication Engineering

GPA: 3.8/4
