EDUCATION

Georgia State University- J. Mack Robinson College of Business GA

Atlanta, GA

Master of Science in Data Science and Analytics- GPA: 4.0

08/ 2023 – 12/2024

Relevant Coursework: Machine Learning, Predictive Analytics, Deep Learning, Scalable Data Analytics, Database Management, Statistical Modeling, Programming for Analytics, and Data Visualization

CORE COMPETENCIES

Programming languages & Business Analytics tools: Python (TensorFlow, PyTorch, matplotlib, pandas) R, Stata, SQL, MongoDB, PowerBI, Tableau, SAP, MATLAB, Microsoft Office (PowerPoint, Word and Excel).

Technical Skills: Statistics, Statistical Modelling, Data Mining, Predictive Analytics, Regression Analysis, Product Analytics, Database Administration, Scalable Machine Learning, Algorithms (Support Vector Machines (SVM), Decision Trees, and k-NN), PySpark, SparkSQL, Hadoop, ETL, A/B Testing, AWS, Artificial Intelligence, Deep Learning, and Natural language Processing (NLP), Neural Networks,

Interpersonal Skills: Strategic Problem-solving, Teamwork, Analytical & Critical Thinking, Collaboration, and Communication, Project Management, Multitasking

EXPERIENCE

Graduate Research Assistant – Data Analytics and Operational Efficiency

01/2024 - 04/2024

- Conducted analysis of sales, inventory, and operational data for a distribution company, utilizing Python and SQL to improve process efficiency and data accuracy.
- Applied statistical modeling techniques to forecast sales trends and assist in inventory level optimization, enhancing decision-making processes and operational strategies.

Graduate Research Assistant – Data Scientist NLP/ML focus

08/2023- 12/2023

- Led research on advanced topic modeling, leveraging BERT and LAMA 2 to achieve ~85% accuracy in topic extraction from a dataset of over 30,000 text documents through comprehensive data preprocessing, including cleaning, tokenization, and vectorization.
- Enhanced model coherence and interpretability by 25% through strategic model optimization, incorporating clustering techniques and similarity analysis to refine semantic machine learning topic models.

Programmer Analyst, Cognizant Technology Solutions, India

06/2022 – 07/2023

- Engineered optimized SQL queries, reducing data retrieval time by 40%; orchestrated systematic testing to enable streamlined data analysis, leveraging platforms Teradata SQL Assistant for timely access.
- Executed intricate data tasks for 20+ million records involving collection, validation and examination of complex datasets while crafting comprehensive test cases and validating data integrity.

Programmer Analyst Trainee Intern, Cognizant Technology Solutions, India

03/2022 – 05/2022

- Analyzed data via Informatica PowerCenter, applied warehouse concepts authoring SQL codes assisting development.

PROJECTS

Financial Data Analysis – Estimize.com, Database Management

- Built end-to-end data pipeline scraping financial estimates for 29 stocks from Estimize.com using Selenium; structured data into normalized SQL database facilitating efficient storage and analysis through custom queries.
- Designed and implemented comprehensive database and interactive Tableau dashboards to longitudinally track analyst estimate precision for 300+stocks; quantified consensus bias and enabled data-driven assessment adjusted for macroeconomic changes.

Airline Customer Experience Analysis, Machine Learning, Text Analysis

- Led NLP-based analysis of airline customer experiences, extracting insights with ChatGPT 3.5 Turbo and LLama2 for service enhancement.
- Demonstrated effectiveness of combined NLP and ML approach, analyzing 15,000+ customer reviews emphasizing customer sentiments and numerical ratings for service improvements.
