Clinical Data Analyst

PROFESSIONAL

SUMMARY

- Over 5 years of IT experience in the field of Data/ Business analysis, **ETL Development, Data Modeling, Snowflake, Supply chain, AWS, Splunk and Project Management** with 2+ years of experience in Big Data and related Hadoop technologies.
- Ensured the client's data met the highest quality standards by doing extensive data cleaning, harmonization, and enrichment operations to improve data quality and usability
- Experience in **Data transformation**, including Data cleaning and preprocessing, Dimensionality reduction and time series data processing.
- Improved data quality, resulting in a 15% increase in the accuracy of predictive models with the help of **Supply chain**.
- Proficient with the Data modeling techniques like **Kimball Dimensions** and entity relationship techniques.
- Proficient in writing **SQL query** writing and data retrieval, analysis, and database management.
- Experience in working with the **Electronic medical records** for error identification and analysis
- Experience in constructing star schema to complete the user requirements with the help of **Kimball data modeling**
- Experience in working with **PAYOR FILES** which includes **claims** and **labs**
- Demonstrated expertise in **Agile methodologies**, facilitating iterative and customer-centric software development processes.
- Expertise in creating data modelling and data visualization with the help of **Erwin Data Modeller**
- Collaborated with cross functional teams to design the scalable data solutions with the help of **Data bricks**.
- Experience in developing the data models to transform the-raw data into meaningful insights with the help of **Tableau** .
- In-depth knowledge of **Hadoop** ecosystem components like **Pig, Hive, Sqoop, Flume, Oozie, Spark SQL and Spark streaming**.
- Collaborated with cross-functional teams to design and implement ETL (Extract, Transform, Load) workflows in IICS, ensuring data consistency and availability.
- Worked in a **Business process re engineering** environment as per the system needs.

- Expert in generating on-demand and scheduled reports for business analysis or management decisions using **Tableau and POWER BI**
- Expertise in working with **Azure Databases** for **MySQL** to provide high scalability and reliability databases.
- Created various types of charts such as Heat Maps, Geocoding, Symbol Maps, Pie Charts, Bar Charts, Tree Maps, Gantt, Circle Views, Line Charts, Area Charts, Scatter Plots, Bullet Graphs and Histograms in Tableau Desktop, Power BI, and Excel to provide better data visualization.
- Experience in working with Automated Financial Services like **Fiserv, P2P Lending and Algorithm trading**.
- Expert on maintaining and managing Microsoft Power BI and Tableau reports, dashboards, and publishing to the end users for Executive-level Business Decision.
- Scheduling, authentication, and publishing workbook in the Tableau server. Developed applications in Tableau Desktop and shared the apps with the team using Tableau Public.
- Expertise in creating reports in Power BI preview portal utilizing the **SSAS** Tabular via Analysis connector.
- Experience in using IDEs and Tools like **Eclipse, IntelliJ, NetBeans, GitHub, Maven, SBT, CBT**.
- Advanced proficiency in MS Office applications (Outlook, Word, Excel, PowerPoint, Visual Basic).

KEY SKILLS:

Data Mapping and Integration, Data validation, Data cleansing, Data Quality Control, Data Quality Assurance, Data Enrichment, Data Transition Planning, Data Refresh Strategies, Testing and Production and Data Strategy Optimization.

TECHNICAL SKILLS:

ETL Tools	Informatica Power Center, SQL * Loader, IICS, Ascential Data Stage.
Data Modeling	Erwin 4.0, Power Designer, Microsoft Visio 2003, ER Studio.
Databases	Oracle 10g, MS SQL Server, MS Access, Teradata, DB2/UDB
Operating Systems	Windows and UNIX, Sun Solaris, AIX, HP.
Reporting/DSS/Analysis	Business Objects 5.0, COGNOS 7.0, and Crystal Reports.
Primary Tools	Informatica Power Center, Ab Initio, Snowflake, MS SQL Server, Teradata SQL, Oracle, SQL queries, Alteryx
Programming Languages	Teradata SQL, SQL, PLSQL, C, C++, UNIX, Shell Scripting, XML, Visual Basic, Net, SQL queries
BI TOOLS	Power BI Desktop, Crystal Reports, Tableau Desktop, Tableau server, Tableau Public, Tableau Online, Tableau reader
Big Data Technologies	Hadoop, Pig, Spark SQL, Spark streaming, Hive, Sqoop, Oozie, Zookeeper, MapReduce, HDFS
IDEs	Eclipse, IntelliJ, NetBeans,
Tools	GitHub, Maven, SBT, CBT
Excel skills	VLOOKUP, conditional format, Macros and VBA, Advance charting, Database functions, scenario analysis

PROFESSIONAL EXPERIENCE

Clinical Data Analyst

AptaPharma Inc, New Jersey

April 2022 to Till Date

- **Responsibilities:**
- Created data models in **Splunk** using pivot tables by analyzing vast amounts of data and extracting key information to suit various business requirements.
- Expertise in creating visualizations with the help of **Erwin data modellers**
- Played a crucial part in the planning and execution of numerous testing cycles that resulted in the client's successful final conversion into production environments.
- I have worked with Scrum to facilitate the project.
- Analysis and extraction of data from **Oracle DB** using SSMS **SQL**.
- Wrote calculated columns and measured queries using DAX in Power BI to show good data analysis techniques.
- For demonstration and to understand the structure of functionality we used **EMR**
- Created personalized reports and dashboards for EMR systems to illustrate critical performance metrics and facilitate decision-making procedures.
- By precisely organizing and executing frequent and continuous data refreshes for both transactional and non-transactional data, the client's insights were kept relevant and up to date.
- Hands-on experience with big data systems which, including proficiency in **SPARK, Apache**.
- Implemented data cleaning and preprocessing techniques to ensure data quality.
- Reduced data preprocessing time by 20% through automation, allowing the team to focus more on analysis and model development.
- Contributed to the analysis and design of data-related integrations, offering insightful information that helped the client's data strategy be optimized.
- Designed Tableau and **Power BI** dashboard which give a visual representation for the users on MTD sales growth, Visual analytics on injuries, dealer location map etc.
- Created different tabular reports using **Power BI** features and enhanced them based on user requirements.
- Utilized to design multiple scorecards and dashboards to display information required by different departments and upper-level management.
- Installed and configured on-premises gateway in Power BI services.
- Scheduled Automatic refresh and scheduling refresh in Power BI services.
- Provided continued maintenance and development of bug fixes for the existing and new Power BI Reports.
- Creating SQL Stored Procedures and User-Defined Functions using T-SQL for financial data fragments in Documents for Stakeholders.
- Capturing data, building reports for clients in SSRS, and creating stored procedures using T-SQL daily.
- Performed data analysis and maintenance on information stored in MySQL database.
- Requirements gathering and documentation of current procedures, mimicking the process using MS Excel, and gravitating to MS Access for automation.
- Automated the manual Excel process using MS Access queries and VBA coding.

- As a data analyst, create database models, specifications, data flow diagrams and entity relationship diagrams to provide direction in the development of an MS Access database for the extraction and transformation of data from a legacy AS400 DB2 Frontier ERP system with automation of sequential processes using VBA.
- Expertise in creating complex reports using **SQL**, Crystal Reports, SSRS and Tableau on Clarity Database.
- Designed SSIS packages to Extract data from different sources like SQL server 2014, MS Excel, and MS Access, transformed and then loaded into Dimension and Fact tables in a Data Warehouse using SSIS.
- Create and review SSAS tabular cubes for consumption as a data source for reports, Dashboards, and Pivot tables.
- Extensively used MS SharePoint Point, MS Visio to develop use cases, activity diagrams and MS Excel for data analysis, with a good understanding of Data Mapping, Data Migration and data Warehousing.

Environment:

SQL/Server, Oracle 9i, MS Office, Teradata, Informatica, ER Studio, XML, Hive, HDFS, Flume, Sqoop, R connector, Python, R, Tableau 9.2, ETL, Power BI, MySQL, MS Access, Clarity, Caboodle, SSIS, SSMS, SSAS, SSRS, IntelliJM, MS Office, EPIC.

Data Analyst

Iskills Pvt ltd , Chennai , India

Apr 2019 to Jan 2022

Responsibilities:

- Developed the financing reporting requirements by analyzing the existing business objects reports.
- Compare data with original source documents and validate Data accuracy.
- Used reverse engineering to create a Graphical Representation (E-R diagram) and to connect to an existing database.
- With the help of Fiserv I designed the streamline of the financial status of different project operations
- Generate weekly and monthly asset inventory reports.
- Evaluated data profiling, cleansing, integration, and extraction tools (e.g., Informatica)
- Coordinate with the business users in providing appropriate, effective, and efficient ways to design the new reporting needs based on the user with the existing functionality.
- Also Worked on some impact of low quality and/or missing data on the performance of data warehouse client
- Import data from multiple data sources and create automated reports in Power BI after cleaning and preprocessing the data.
- Modify datasets using DAX query, Merge statements, Refresh Schedule, Row-level security and Modelling within Power BI.
- Involved in modifying Teradata stored procedures and performance tuning of various Teradata/Oracle tables, and Informatica mappings to improve the performance of Tableau reports/Dashboards.
- Worked on Tableau workbooks from multiple data sources namely, **EMR**, Billing System and Patient Satisfaction to realize Data Blending of practice variations to outcomes.

- Converted applications developed in QlikView to Tableau to expand the health Catalyst offering.
- Designed and optimized data connections, data extracts, schedules for background tasks and incremental refreshes for weekly and monthly dashboard reports on Tableau server.
- Worked on building queries to retrieve data into Tableau from SQL server and Oracle, SQL developer and developed SQL statements for loading data from the target database.
- Developed user interactive sheets and reports as business needs and for writing SQL scripts to load the relevant data in Tableau applications.
- Extensively worked in the performance tuning of the programs, ETL Procedures and processes.

Environment: SQL/Server, Oracle9i, MS-Office, Embarcadero, Crystal Reports, Netezza, Teradata, Enterprise Architect, Toad, Informatica, ER Studio, XML, Informatica, OBIEE, ETL, Power BI, Tableau. Clarity. MySQL.
