PROFESSIONAL EXPERIENCE

Cross Country Healthcare | Boca Raton, FL | Remote
Data Analyst/Business Operations Analyst

Jan 2022 - Present

- Generated \$20,000,000 in new business revenue by applying advanced SQL and **Python (Pandas, NumPy, Scikit-learn)** analytics, revenue modeling, A/B testing frameworks, and workforce optimization strategies to improve order fulfillment and staffing outcomes in partnership with executive leadership.
- Sustained 87% client retention by conducting 35+ quarterly MSP QBRs, delivering executive-ready KPI dashboards, Snowflake-backed financial variance analysis, and workforce performance reporting across BigQuery and Redshift data environments.
- Reduced MSP client churn 10% by developing predictive churn models using statistical segmentation, machine learning lifecycle methodologies (feature engineering, model validation, performance tuning), and executive remediation planning.
- Improved reporting efficiency 35% and eliminated 120+ hours monthly by engineering automated SQL and Python ETL pipelines orchestrated via **Apache Airflow**, deploying dimensional data models in Snowflake and Power BI dashboards supporting FP&A forecasting.
- Delivered 6 enterprise BI applications with 100% on-time execution by managing requirements gathering, sprint planning, Git-based version control workflows, stakeholder communication, and Agile delivery governance.
- Strengthened enterprise data governance across 80+ reports by standardizing data definitions, auditing business requirements, and enforcing HIPAA, GDPR, and PCI DSS compliance controls within AWS/Azure environments.
- Secured sensitive data across 13+ analytics applications by implementing IAM access controls in AWS, validating UAT environments, and aligning AI-driven analytics models with enterprise risk and model governance standards.
- Decreased data leakage incidents 30% by conducting risk assessments, deploying automated monitoring frameworks in GCP, and reinforcing compliance oversight across cloud-based data processing pipelines.

IBM | Mountain View, CA | Remote
Data Analyst II

Jan 2020 - Dec 2021

- Protected \$1,800,000 in annual support cost capacity by building Salesforce and Tableau executive dashboards across 10,000+ SPSS cases and integrating structured/unstructured data from Redshift/Azure SQL warehouses.
- Avoided \$950,000 in annual labor costs by launching an IBM Watson hybrid chatbot leveraging machine learning lifecycle best practices, API integrations, and automated workflow orchestration.
- Enhanced customer satisfaction metrics 32% by translating Voice of Customer feedback into actionable business intelligence insights, A/B experimentation analysis, and cross-functional reporting frameworks.
- Maintained 100% KPI reporting accuracy by performing structured data validation audits, Git version-controlled code reviews, discrepancy resolution, and governance documentation across 35+ Db2z tools.
- Increased executive reporting efficiency 40% by consolidating IBM Cognos, Salesforce, Medallia, Snowflake, and SQL data into unified BI dashboards and automated reporting views.
- Boosted client retention 7% by optimizing ETL pipelines in AWS and refining cloud-based data warehouse architecture to improve analytics accessibility and reliability.
- Streamlined reconciliation processes 12% by designing automated Python validation scripts and enterprise data quality frameworks.
- Mitigated data discrepancies 65% by implementing structured validation controls, API-based ingestion checks, and auditing frameworks across Salesforce and internal databases.

EDUCATION

Bachelor of Science - Business Administration | Management Information Systems | San Jose State University
Certifications | Google Cybersecurity | Six Sigma

SKILLS

Data Analytics | Business Intelligence | Advanced SQL | Python (Pandas, NumPy, Scikit-learn) | Data Modeling | ETL Development | Dimensional Modeling | Predictive Analytics | Statistical Analysis | A/B Testing | Machine Learning Lifecycle | Revenue Analytics | Financial Analysis | Forecasting | Executive Reporting | Workforce Analytics | Operational KPIs | Dashboard Development | Data Governance | Risk Management | Compliance (HIPAA, GDPR, PCI DSS) | AI & Automation | Agile Methodologies | Requirements Gathering | Stakeholder Management | Process Optimization | Data Quality | Data Warehousing | API Integrations | Cloud Analytics

Tools: SQL | Python | Power BI | Tableau | Salesforce | Snowflake | Amazon Redshift | Google BigQuery | AWS | Azure | GCP | Apache Airflow | Git | SSRS | Power Automate | IBM Watson | IBM Cognos | Medallia | Advanced Excel | UAT Validation | ETL Frameworks | Reporting Automation
