Education

Kent State University

Master's in Business Analytics

Aug. 2023 – Dec 2024

Kent, Ohio

Technical Skills

Languages: R, Python (Pandas, NumPy, Matplotlib, Seaborn)

Databases: MySQL, SQL Server, MongoDB, Oracle DB

Software/Tools: GitHub, Atlassian JIRA, PowerPoint, Excel (Pivot Tables, VLOOKUP), Tableau, Power BI, Google Big Query

Machine Learning: Linear & Logistic Regression, Advance Statistical Analysis, Decision Trees, KNN, Random Forest, K-Means clustering, Neural Networks, NLP, RDBMS, ETL, Agile scrum project

Experience

Saayam For All

Business Analyst

August 2024

San Jose, California

- Created process maps and flowcharts with Visio and Lucid chart to streamline business workflows, identifying and implementing improvements that enhanced operational efficiency
- Design and implement reporting systems to support decision-making while ensuring accuracy and resolving discrepancies. Develop and monitor critical metrics to optimize business performance.
- Developed and executed detailed test plans, documenting outcomes in JIRA and resolving defects using Python scripts to ensure smooth implementation.
- Administer and manage ERP, document management systems, and third-party applications.
- Analyzed large datasets using Excel, SQL, and other tools for insights. Develop data pipelines and create visualized reports using raw data, queries, macros, and VBA for business performance tracking.
- Assisted with UAT and user training, working with IT and business teams to define acceptance criteria, create user stories, and deliver training documentation and guides.
- Generate advanced queries, support cross-functional teams, and innovate to enhance customer experience.

Coincent

Data Analyst

May 2023 – August 2023

- Assisted in the collection and pre-processing of large datasets, ensuring high data quality by applying Python and Pandas for an effective quality control process, improving data selection accuracy by 50% and reducing processing time by 20%
- Contributed to the research and implementation of advanced deep learning techniques for image classification, staying current with industry best practices
- Collaborated with the team to develop and optimize Convolutional Neural Networks (CNN) using TensorFlow and Keras, resulting in a 15% improvement in model accuracy.
- Supported the integration of data pipelines and model deployment, assisting in the automation of workflows.

VITS

Business Analyst

March 2021- April 2023

- Utilized Python to preprocess large datasets, reducing duplicates by 98%, minimizing missing values (<1%), and standardizing formats for improved data quality.
- Applied statistical methods and machine learning algorithms to forecast market trends with 85% accuracy, enabling data-driven decisions.
- Designed interactive Power BI dashboards with 20+ visual elements to effectively communicate insights to stakeholders.
- Delivered actionable insights, driving a 15% increase in market share and a 20% boost in customer engagement.

Certifications

Google Cloud: Data Analytics Certificate

Tata: Data Visualization: Empowering Business with Effective Insights

Coursera: Python 3 Specialization (University of Michigan)

CISCO Networking Academy: Introduction to Cybersecurity

Accenture: Data Analytics and Visualization Virtual Experience

Udemy: The Complete SQL Bootcamp

Projects

Customer Feedback Analysis Tool

- Implemented text analysis algorithms to categorize feedback into themes and sentiments, enabling deeper insights
- Automated the generation of weekly and monthly feedback summary reports, streamlining the reporting process
- Reduced time spent on feedback analysis by 85%, increasing operational efficiency
- Increased retention rates by 15% due to timely responses to customer concerns
- Saved approximately \$20,000 annually in labor costs and improved customer loyalty.

E-commerce Website

- Build an e-commerce website to sell products or services online, with features such as product catalog, shopping cart, and order management.
- Utilized MySQL Server to store product information, customer data, and transaction records.
- Implemented secure user authentication, payment processing, and inventory management functionalities to provide shopping experience for customers.
- Collaborated with business and technical SMEs to identify and define automation opportunities, business rules, exceptions, and system requirements, contributing to scalable RPA solutions that enhanced productivity and customer satisfaction
