

PROFESSIONAL SUMMARY

- Around 4+ years of experience in various phases of Software Development Life Cycle including Design, Development, Testing, Production, Customization, Implementation, Maintenance and Support.
- Experience in using Spring modules like Spring Core, Spring AOP, Spring DAO, Spring MVC, Spring Actuator, Spring JPA, Spring Security, Spring Data, Spring Profiles, and ORM framework (Hibernate).
- Familiarity working with RESTful Web Services and implementing RESTful APIs & frameworks like SOAP, and REST.
- Experience with securing Micro service architectures using Angular-based front-end and Spring-based back-end.
- Expert level skills in developing applications using Core Java, JSTL, JDBC, Hibernate, Web Services (SOAP and REST), JMS, HTML, XML, CSS, SQL.
- Designed and developed responsive web applications using Angular and Spring Boot.
- Strong experience in persistence frameworks – Spring Data JPA (Hibernate as the implementation) to map POJO to a relational database object.
- Good working knowledge of Core Java with a good understanding of Collections, Multithreading, Event handling, and Exception handling.
- Working knowledge in several Java and J2EE design patterns such as Singleton, MVC Pattern, Factory Pattern, Business Delegate, and Data Access Object.
- Good exposure to Kafka producer and Consumer APIs for reliable information exchange across Java applications.
- Experience with Java 8 features such as Lambda Expressions, Streams, and Functional programming.

Technology

Languages/Scripts	Java 1.7/1.8, J2EE, JDBC, Servlet, JSP, JSF, JSTL, Spring, Struts, Hibernate, JPA, Log4J, JMS, Unix Shell Scripting
Cloud Technology	GCP, Azure
Big Data Technologies	HDFS, Hadoop, MapReduce, MapR
RDBMS/ Database	SQL, DB2, MySQL, Microsoft SQL Server, Apache Drill
Web/Application Servers	WebLogic, IBM WebSphere, JBoss, Apache Tomcat
Web Services	Web Services, SOAP, WSDL, JAX-WS, RESTful, JMS and SOA
Version Control	GIT, Bitbucket
Web Technologies	HTML5, JavaScript, CSS3, JSP, Servlet, jQuery, JSON, Ajax, Bootstrap
IDE	Eclipse, IntelliJ, Visual Studio Code
Messaging	Apache Kafka, IBM MQ

PROFESSIONAL DEVELOPMENT

MetLife | Retirement and Income Solutions | Charlotte, NC

Jul 2022 - Present

Java Developer, DevOps Engineer

Responsibilities:

- Worked in a globally distributed development team in Agile, SCRUM development methodology
- Initiated Azure pipelines, created pipelines for the CI/CD and release process.
- Developed an alarm framework used to notify the module owner if there is any failure in services using java.
- Worked on designing the payment flow application using Java and spring.
- Setting up Angular.js framework for UI development. Developed html views with HTML 5, CSS, JSON, and JavaScript.
- Involved in front end development using JSP's and Servlets that present data to the client.
- Migrated the application from old ANT build to Maven. Introduced SonarQube and fixed flaws post migration.
- Developed the application using spring boot and Maven. Involved in coding and unit testing of Servlets, JSPs and EJBs.
- Created YAML files for the CI process and implemented Azure classic pipeline for the release process. Also introduced azure branch strategy and branch policies. Build, Configure, Manage and Coordinate all Build and Release Management activities.
- Involved in introducing IBM Data Power layer to process and manage XML and web services traffic.

Bank Of America | Finance and Banking | Charlotte, NC

May 2021 – Jul 2022

Java Developer

Responsibilities:

- Designed, coded, implemented, optimized, and tested new features and modules in Java for the derivatives system as part of an Agile team and improved automation test suites.
- Responsible for implementing an automated CI/CD process for the project
- Work on Agile work environment with Content Management system for workflow management and content versioning
- Developed release tool to coordinate the release operation through Jenkins, to automate the manual process and standardize the release process.
- Responsible for installation & configuration of Jenkins to support various Java builds and Jenkins plugins to automate continuous builds and publishing artifacts to the repository.
- Experience in working with big data platform Hadoop. Coded the Hadoop Storage and retrieval process to R/W the incoming shares and stocks data.
- Worked with Ansible tower, and Hue database for query changes to the data warehouse. Experience in Hive on top of Hadoop to query the big data in SQL.
- Involved in the architectural design to implement the storage schema and write the Big Data queries to analyze the data.
- Created plugins to extract data from multiple sources like Apache Kafka, Database, and Messaging Queues.
- Used CI/CD tools Jenkins, Git/GitLab for configuration and automation using Ansible.
- Built end to end CI/CD Pipelines in Jenkins to retrieve code, compile applications, perform tests and push build artifacts
- Used Java 1.8 Method references feature to point to methods by their names and used functional Interfaces

Ericsson R&D, Telecommunications Company, INDIA

Jul 2017 - Jul 2019

Java Developer

Responsibilities:

- Developed and customized housekeeping services in MapR-DB. Backup and restoration of the telecommunication data, retention of the age-old data in Hadoop.
- Created system file backup and recovery for the data files, supporting the Database upgrade and fallback. Upgraded the services from the command line interface to the web using REST API.
- Involved in requirement analysis with stakeholders, design, and development of Geographical redundancy framework.
- Implemented Seamless Real-Time Upgrade & Fallback for MapR-DB and Geo-Redundancy.
- Individually handled Apache Drill query execution for the custom queries and improved the execution time by 90% by tweaking the queries and environment variables.
- Coded and maintained test cases for the housekeeping jobs, to check the functionality breaks. Performed manual and automated testing on the product life cycle.
- Developed Servlets and Java files for control of the business processes in the middle-tier.
- Involved in designing and creating the Database Tables using MS SQL MySQL Database.
- Team support by developing tools, for cross-team functionality

EDUCATION DETAILS

MASTER IN COMPUTER SCIENCE | Illinois Institute of Technology, Chicago, United States
May 2021

BACHELOR OF ENGINEERING IN E&C | Vellore Institute of Technology, Vellore, India
May 2017

CERTIFICATION DETAILS

Microsoft Certified: Azure Administrator Associate
Date Cleared: Jan 13 2024

Certification number: 04V607-2FB77E

Microsoft Certified: DevOps Engineer Expert
Date Cleared: Jan 24 2024

Certification number: B1AB36-736B35
