

SASIVARDHAN REDDY SANGATI
DATA ANALYST

Location: NY | Phone: 607-235-8617 | Email: sasivardhan7007@gmail.com | LinkedIn

SUMMARY

- Data Analyst with 3 years of experience in data management, analysis, and visualization, skilled in leveraging tools like Python, SQL, Power BI and Tableau to provide actionable insights and data-driven decision-making.
- Skilled in ETL pipelines using SSIS, and Snowflake, ensuring data consistency across large-scale environments.
- Proficient in big data processing using Apache Spark, Hadoop, and AWS, optimizing workflows to enhance data retrieval and streamline reporting for complex datasets.
- Background in data warehousing, cloud platforms (AWS, Azure), and Agile project management, enabling cross-functional collaboration and on-time project delivery.

TECHNICAL SKILLS

Programming Languages:	Python, R, SQL, SparkSQL, Scala.
Databases:	MySQL, Cassandra, NoSQL.
Data Warehousing & ETL Tools:	Snowflake, SSIS, Informatica, dbt (Data Build Tool).
Big Data & Data Processing:	Apache Spark, Hadoop, HDFS, Cloudera, Sqoop, PySpark, MapReduce, Kafka.
Cloud Platforms:	AWS (EC2, S3, Redshift, Lambda, CloudWatch), GCP (BigQuery), Microsoft Azure (Data Lake, Synapse).
Data Visualization Tools:	Tableau, Power BI.
Data Analytics & Statistical Tools:	Jupyter Notebook, RStudio, Excel (Advanced – Pivot Tables, VLOOKUP, Macros).
Methodologies:	SDLC, Agile, Waterfall.
Version Control & Collaboration:	Git, GitHub, Bitbucket.
Project Management & Collaboration:	JIRA, Confluence.
Data Engineering & Transformation:	SQL, SparkSQL, Hive, Spark, Airflow, ETL Pipelines.
IDEs & Development Tools:	VS Code, Eclipse, IntelliJ IDEA, Jupyter Notebook.

EDUCATION

SUNY Binghamton	NY, USA
Master’s in Computer Science	Aug 2022 – May 2024
Lovely Professional University	Punjab, India
Bachelor’s Degree in Electronics & communications	Jul 2017 – May 2021

PROFESSIONAL EXPERIENCE

Blue Cross Blue Shield (BCBS)	NY, USA
Data Analyst	Jul 2024 – Current
• Developed over 15 ETL pipelines with Snowflake to streamline data ingestion, transforming data for access across 100+ healthcare stakeholders. • Built and deployed data mining frameworks to identify patterns, trends, and anomalies across multi-terabyte datasets, leading to data-driven business insights. • Analyzed and reported on Medicare and Medicaid claims data, identifying trends in patient care metrics and optimizing resource allocation to meet regulatory compliance and improve care outcomes. • Designed 10+ Power BI dashboards to visualize key healthcare metrics, supporting executive decisions in patient care management. • Designed and optimized complex SQL queries to extract, transform, and analyze data across large datasets, enhancing reporting accuracy and supporting business insights. • Deployed PySpark workflows for data preprocessing, increasing data quality and reducing manual intervention in data preparation. • Ushered a user-friendly Tableau dashboard for tracking a \$1.5M project budget, enabling real-time insights enabled the team to identify and address potential budget issues early on, preventing cost overruns exceeding \$50,000. • Facilitated cross-functional meetings and presented statistical analyses using Python and R, simplifying complex datasets into actionable insights to support strategic decision-making for stakeholders. • Ensured adherence to HIPAA and HITECH guidelines while handling and analyzing sensitive patient data, maintaining strict data confidentiality and security protocols.	

SUNY Binghamton

NY, USA

Graduate Grader

Aug 2023 – Dec 2023

- Evaluated and graded 60+ data analysis assignments with Python and SQL, ensuring grading consistency and detailed feedback for student improvement.
- Developed 5+ tutorials on statistical modeling and data visualization with Tableau and Excel, enhancing hands-on learning experiences.

Cognizant Technology Solutions

Chennai, INDIA

Programmer Analyst Trainee / Data Analyst

Mar 2021 – Jun 2022

- Integrated terabytes of big data into AWS S3 data lakes, facilitating retrieval for 50+ analysts across departments.
- Designed and optimized data workflows using Apache Spark and Airflow, improving data processing times and reducing ETL errors by 35%.
- Migrated 20+ legacy SSIS packages to Azure Data Warehouse, enhancing reporting capabilities for 20+ business units.
- Spearheaded A/B testing for data models and dashboard designs, analyzing user engagement to identify optimal configurations, boosting user experience and decision-making efficiency by 15% for business stakeholders.
- Utilized machine learning algorithms and statistical models to uncover hidden patterns and correlations in structured and unstructured datasets.
- Managed database operations with MySQL, enhancing data storage efficiency and retrieval speed by optimizing SQL queries.
- Utilized Tableau to automate and maintain data visualization dashboards, providing real-time insights for stakeholders.
- Coordinated with cross-functional teams via JIRA for sprint planning and, maintaining project timelines within the Agile framework.
- Leveraged SAP BI tools to streamline financial reporting workflows and enhance data visualization, improving report generation efficiency for enterprise stakeholders.
- Utilized PowerBI to optimize client cash management, delivering a 10% sales surge and exceeding expectations
- Implemented Apache Spark and Hadoop frameworks for large-scale data processing, increasing data processing efficiency by 40% and supporting high-volume analytics.
- Built and maintained data warehousing solutions on Snowflake and AWS Redshift, enhancing data aggregation and analytics capabilities across teams.
- Designed Power BI models to support business intelligence needs for 30+ stakeholders, facilitating faster decision-making.
- Developed complex DAX measures and calculated columns in Power BI to automate key metrics, such as year-over-year growth and cumulative sales, providing stakeholders with real-time, actionable insights that improved data-driven decision-making by 20%
- Orchestrated SQL database performance tuning and managed configurations for backup, recovery, and security, ensuring optimized system responsiveness and data integrity.

Trinity Technolabs

INDIA

Data Analyst Intern

Apr 2020 – Feb 2021

- Crafted interactive Tableau dashboards, enabling stakeholders to make data-driven decisions with clear and actionable insights.
- Enhanced ETL workflows using SSIS and Informatica, improving data consistency across systems and optimizing data flow efficiency for daily reporting.
- Leveraged Python and R for data cleaning and preprocessing, boosting data quality and reliability to support robust analytics and reporting.
- Shaped complex SQL queries to validate reports, ensuring consistency and accuracy across multiple reporting platforms.
- Processed comprehensive data quality assessments, enhancing data integrity and aligning data management practices with organizational standards.

PROJECTS

Data Analytics Project: T20 Cricket World Cup Analysis

- Established Python and Pandas for web scraping and data cleaning from ESPN Cricinfo, ensuring data accuracy and quality for T20 World Cup cricket datasets.
- Transformed cleaned data using Power Query and DAX in Power BI, creating interactive visualizations to uncover insights and inform strategic decision-making.
- Devised a comprehensive Power BI dashboard to analyze key performance metrics, enabling data-driven player selection for the final 11 based on extensive statistical analysis.

CERTIFICATIONS

- AWS Certified Solutions Architect Associate SAA-C03(Amazon Web Services).
- Career Essentials in Generative AI by Microsoft and LinkedIn.
