

Sri Tarun Potluri

Software Developer

spotluri@mymailworks.com | 316-376-7569

SUMMARY

- 3+ years of expertise in developing web-based applications, specializing in analysis, design patterns, development, implementation, and testing using Java and J2EE, ensuring robust and scalable software solutions.
- Well-versed in SDLC methodologies, including Waterfall and Agile, facilitating efficient project management and high-quality software delivery.
- Skilled in designing and developing multi-tiered web applications utilizing Java & J2EE (Core Java, JSP, Servlets, Junit, Restful API, JDBC, XML/XSLT, JMS) and frameworks like Struts, Spring, JSF, MVC, and Hibernate, resulting in highly efficient and maintainable code.
- Adept in Front-End UI technologies, including HTML, CSS, JavaScript, jQuery, AngularJS, NodeJS, ReactJS, Grunt, and Bootstrap, creating responsive and dynamic user interfaces that enhance user experience.
- Proficient in writing Build Scripts using Gradle and Maven and implementing Continuous Integration (CI) and Continuous Deployment (CD) with Jenkins, streamlining the development and deployment process for faster release cycles.
- Extensive experience with Oracle and SQL databases and automated testing frameworks such as Selenium and Mockito, ensuring reliable and high-performance database interactions and thorough software testing.

SKILLS

Methodologies: SDLC, Agile, Waterfall

Programming Language: Java, C, C++, C#, SQL

Frameworks: Spring MVC, Spring, Hibernate, Spring Boot, Spring Security, Spring Data JPA

J2EE Technologies: Servlets, JSP, JDBC, JUnit, JMS, JSTL, Multi-threading, EJB, JavaBeans, JSF, JSTL, Multithreading, Generics, and Collections

Web Technologies: HTML, CSS, JavaScript, RESTful APIs, TypeScript, jQuery, Ajax, XML, JSON, Bootstrap, React.js, React Router, Vue.js, Node.js, Express, GraphQL, Next.js, Redux, Angular, React Native

IDE's: Eclipse, Visual Code, Notepad++, NetBeans, Dream Viewer

Database: MongoDB, MySQL, SQL Server, Firebase, PostgreSQL

Cloud Platform: Amazon Web Services (EC2, EMR, S3, Redshift, Lambda, CloudWatch), Google Cloud Platform (GCP), Microsoft Azure (Azure Data Factory, Azure Databricks, Synapse Analytics, HDInsight, Blob Storage)

Software Tools & Other Tools: Maven, Docker, Gradle, Jenkins, Jira, Figma, Rally, TFS, Git, GitHub, Perforce, ETL, CI/CD pipelines

Operating System: Windows, Linux, iOS

EXPERIENCE

Cognizant, USA | Software Developer

August 2023 - Current

- Leveraged Agile methodologies (Scrum, Kanban) to effectively prioritize tasks, manage sprints, and deliver iterative features, resulting in increased productivity and timely project completions.
- Designed, developed, and maintained comprehensive web applications using Java, Spring Framework, and Angular.js, ensuring seamless user experiences, robust backend functionality, and high system performance.
- Led the migration from Action Servlets and JSPs to the Struts framework, ensuring a smooth transition, improved code maintainability, and minimal disruption to existing functionality.
- Utilized Express.js to efficiently build and manage servers and routes, leveraging Node.js for scalable server-side applications.
- Implemented responsive web designs using HTML5, CSS3, JavaScript, and Bootstrap, enhancing usability, accessibility, and cross-platform compatibility for a superior user experience.
- Deployed Spring Boot-based microservices on Docker containers using Amazon ECS, ensuring scalable and efficient deployment processes.
- Implemented SQL to create tables for different business logic in Oracle Database.

Nevina Infotech Pvt. Ltd, India | Software Developer

June 2019 - December 2021

- Involved in SDLC Requirements gathering, Analysis, Development, and Testing production of applications using the Waterfall model.
- Created a pipeline between two database servers to fetch data, utilizing Java backend technologies; developed microservices with Spring Boot and Hibernate ORM framework.
- Designed and developed a responsive UI with HTML5, CSS3, Bootstrap, JavaScript, and React.js.
- Implemented server-side technologies such as Servlets, JSP, JDBC, and Spring MVC for robust web applications.
- Developed APIs and backend logic using Node.js, Express, and Spring Boot.
- Implemented Kafka consumers in Java to subscribe to Kafka topics and process incoming messages or events.
- Utilized the AWS Lambda platform to upload data into AWS S3 buckets and to trigger other Lambda Functions, Including EC2 and MongoDB, focusing on high availability, fault tolerance, and auto-scaling.
- Integrated CI/CD pipelines with Jenkins to automate build, test, and deployment processes, significantly reducing time to market and enhancing the overall development lifecycle.

EDUCATION

Master in Computer Science | Wichita State University, Wichita, KS

Bachelor in Computer Science and Engineering | Sathyabama University, Chennai, Tamil Nadu, India

CERTIFICATIONS

Python 3 Programming (Coursera).

Game Development Using PyGame (GUVI).

Java Programming: Complete Beginner to Advanced (Udemy).

AWS Certified Developer Associate (LinkedIn Learning).
