EDUCATION

Saint Louis University

Masters in Computer Science

Saint Louis, MO

Aug. 2023 – May 2025

Sathyabama Institute of science and technology

Bachelor of Engineering in Computer science and Engineering

India

July. 2019 – May 2023

EXPERIENCE

Asset Management Intern – Information Technology Services

Saint Louis University

June 2024 – Present

Saint Louis, MO

- Managed IT assets and tracked inventory at Saint Louis University.
- Collaborated together with IT teams to support technological asset lifecycle management, guarantee software licensing compliance, and carry out recurring audits.
- Supported efforts to update technology and carried out audits to guarantee precise asset tracking and adherence to academic requirements.

Data Visualization Associate Intern

Excelebrate

Feb. 2024-Mar 2024

Saint Louis, MO

- Designed and developed an interactive dashboard in Google Data Studio to visualize user participation metrics, enabling actionable insights.
- Conducted extensive data cleaning, validation, and analysis to ensure accuracy and uncover trends across user type, geography, and time.
- Presented findings and dashboard to leadership, highlighting visualizations for data-driven decisions.

Machine Learning Intern – Real Estate Price Prediction

HCL Technologies

Jan. 2022 – May 2022

- Developed a machine learning regression model to predict real estate prices, enabling accurate property valuations based on multiple features
- Optimized model performance by implementing data preprocessing and feature engineering techniques
- Created and evaluated regression models using Python, achieving reliable price predictions for diverse real estate properties
- Utilized data visualization tools to present model insights and performance metrics to project stakeholders

PROJECTS

Just a Second Connector | React, Jest, React Testing Library, JavaScript

Jan 2024 – April 2024

- Contributed to developing a web platform connecting justice-involved individuals with employment opportunities, replacing manual Google Docs tracking system
- Implemented comprehensive test suite using React Testing Library for user authentication, including login validation and local storage functionality
- Developed and tested user authentication features, including signup/login workflows with form validation and credential verification.

Concrete Strength Prediction | Python, Power BI, Machine Learning, Data Analysis.

Sept. 2022 – Nov. 2022

- Developed an end-to-end prediction system using Multiple Linear Regression to forecast concrete compressive strength, leveraging skills from Cognibot Labs Data Analytics certification
- Created Power BI dashboards to analyze 8+ key strength indicators and material compositions in real-time.
- Built and optimized ML models achieving 92% accuracy in strength predictions, while completing a 40-hour Data Analytics certification from Cognibot Labs

TECHNICAL SKILLS

Languages: Java, Python, C, SQL, JavaScript, HTML/CSS,

Frameworks: React, Node.js, Flask, FastAPI, Jest

Developer Tools: Git, Docker, Google Cloud Platform, VS Code, Visual Studio, PyCharm

Libraries: pandas, NumPy, Matplotlib, scikit-learn
