

SWETHA CEELA

Washington, USA | M.no: +1 (551) 465-2315 | swethac.114@gmail.com | [LinkedIn](#)

SUMMARY

- Experienced Clinical Data Analyst with **4 years** of expertise in analyzing EHR, EMR, claims, patient surveys, and clinical trial data to support evidence-based decisions and improve patient outcomes.
- Proficient in **SQL, Python (Pandas, NumPy, Scikit-learn, Statsmodels), R, and SAS** for advanced statistical analysis, predictive modeling, and machine learning applications in healthcare analytics.
- Skilled in **data visualization and reporting** using **Power BI, Tableau, QlikView, and Excel**, with hands-on experience in designing interactive dashboards, KPI tracking, and executive-level performance reports.
- Strong knowledge of **data warehousing and cloud platforms** including **Snowflake, AWS (Redshift, S3, EMR), Azure Data Lake**, along with **ETL tools (Alteryx, Informatica)** to ensure secure, scalable, and efficient healthcare data processing in compliance with **HIPAA** and **regulatory standards**.

SKILLS

Methodologies:	SDLC, Agile, Waterfall
Programming Language:	Python, SQL, Scala, R
Packages:	NumPy, Pandas, Matplotlib, SciPy, Scikit-learn, TensorFlow, Seaborn, ggplot2
Visualization Tools:	Tableau, Power BI, Advanced Excel (Pivot Tables, VLOOKUP)
Cloud Technologies:	AWS (EC2, S3, Redshift, Athena, Glue, DynamoDB), Azure, Snowflake
Database:	MySQL, PostgreSQL, MySQL, MongoDB, SQL Server, Oracle
Other Technical skills:	Machine Learning Algorithms, ETL Tools, Statistics, SSIS, SSRS, MapReduce, Alteryx, Probability distributions, ANOVA, Hypothesis Testing, Regression Analysis, Linear Algebra, Advance Analytics, Data Mining, Data Visualization, Data warehousing, Data transformation, Data Storytelling, Business Analysis, Association rules, Clustering, Classification, Regression, Forecasting & Modelling, Data Cleaning, Data Wrangling, Informatica

WORK EXPERIENCE

Kaiser Permanente, Remote | Data Analyst

Jan 2024-Present

- Integrated **Epic/HealthConnect EHR data** into **AWS Redshift/Athena**, building curated marts for encounters, labs, vitals, and procedures, which improved patient history retrieval for clinicians by **25%**.
- Developed **Power BI dashboards** and Excel reports to monitor chronic disease registries (diabetes, HTN), immunizations, and **gaps-in-care**, enabling nurse leaders to reduce missed preventive screenings by **18%**.
- Designed **inpatient risk adjustment models** using **SAS and Python (Scikit-learn, NumPy, Pandas)** for mortality and length of stay predictions, lowering patient **readmission rates by 12%**.
- Performed **exploratory data analysis (EDA)** and **A/B testing** in Python on diagnosis history, treatment pathways, and patient journeys, uncovering insights that guided more effective clinical interventions.
- Built **real-time sepsis early-warning dashboards** with SQL and Power BI, helping hospital staff respond faster to deteriorating patients and cutting critical incidents by **10%**.
- Enforced **HIPAA-compliant data practices** by implementing data masking, audit logging, and secure pipelines, ensuring alignment with healthcare audit standards.
- Partnered with **cross-functional teams**—data engineers, physicians, compliance officers, and clinical informaticists—to align analytics with care quality metrics, improving reporting turnaround by **30%**.
- Delivered **population health insights** by integrating EHR and claims data on **AWS S3/Redshift**, providing executives with reports on treatment effectiveness, diagnosis trends, and outcomes that supported **value-based care initiatives**.

Infosys, India | Data Analyst

Jul 2020 – Dec 2022

- Optimized **claims/utilization analytics** in SQL & Python (**Pandas, NumPy**) to identify high-cost drivers, care leakage patterns, and site-of-care optimization opportunities, reducing out-of-network expenses by **15%**.
- Designed **Tableau dashboards** for prior authorizations, denial patterns, and episodes of care, enabling proactive interventions that cut denial rates by **10%**.
- Developed **HCC risk adjustment models** in SAS/Python, improving **RAF (Risk Adjustment Factor)** accuracy by **18%**.
- Delivered **episodes of care cost analysis** by integrating claims, EHR, and pharmacy data in Snowflake, highlighting inefficiencies and uncovering **\$5M+ annual savings opportunities**.
- Conducted **RAF monitoring & coding analytics** in SQL/Excel, enhancing reimbursement accuracy.
- Benchmarked utilization trends across hospitals in Snowflake, guiding **cost-containment decisions**.
- Ensured **CMS/HIPAA compliance** in claims data workflows, strengthening audit readiness.
- Presented **executive reports** on cost drivers, utilization KPIs, and reimbursement accuracy, accelerating value-based care adoption.
- Automated **claims data quality checks** in SQL/Snowflake, boosting data accuracy by **20%** and reducing manual validation effort.

EDUCATION

University of Maryland Baltimore County, USA: Master's in Health Information Technology

Anurag Group of Institutions, India: Bachelor's in Pharmacy
