

SUMMARY

Experienced Data Analyst proficient in advanced statistical analysis and visualization techniques, consistently achieving over 95% accuracy in handling large datasets. Demonstrated success in driving impactful business decisions, resulting in a 15% increase in revenue through data-driven insights.

WORK EXPERIENCE

Georgia State University, Institute of Insight Graduate Research Assistant

Atlanta, Georgia
Aug 2023 - Present

- Collaborated with Institute for Insight to align evaluations with customer viewpoints, crafting and implementing data-driven strategies for reputation enhancement and improved customer service which led to an increase in 15% revenue of company.
- Applied advanced predictive models in statistics and sentiment analysis to identify trends, providing data-derived insights on weekly basis for informed decision-making. Presented clear and concise summaries with effective data visualization to stakeholders.

Bharat Electronics Limited Data Analyst

Navi Mumbai, India
Feb 2021 - May 2023

- Leveraged SOLIDWORKS and AutoCAD to design ventilator systems for the Indian Defense, resulting in a 20% reduction in production time and a 15% increase in component precision.
- Delivered data-driven insights through comprehensive analysis, leading to an 11% cost reduction within six months. Employed data exploration techniques and visualizations to identify key areas for improvement, demonstrating analytical and communication skills.
- Designed and implemented dynamic dashboards in Tableau for real-time supply chain monitoring. Conducted training sessions to empower stakeholders with data-driven decision-making, showcasing collaboration and proficiency in data visualization.

Larsen & Toubro

Business Analyst, Sales Department (GET)

Navi Mumbai, India
Aug 2020 - Dec 2020

- Used SAP expertise as a data engineer to analyze unit-level sales data, designing and implementing data-driven dashboards for comprehensive sales monitoring.
- Developed expertise in tools like JIRA, Zephyr, MS SQL Server, Oracle, and SQL Developer, and adeptly balanced Agile and Waterfall Methodologies to suit diverse project needs and team styles.

PROJECTS

Personalized Medical Recommendation System using Artificial Intelligence [\[GitHub\]](#)

- Developed a Personalized Medical Recommendation System leveraging Python and Machine Learning techniques, achieving flawless accuracy (99.9%) in diagnosing diseases from symptoms.
- Constructed and integrated a multi-model predictive framework utilizing algorithms such as SVC, Gradient Boosting, KNeighbors, Multinomial Naïve Bayes to analyze and interpret complex healthcare data (Greater than 50K rows).
- Implemented an interactive health management guidance system, providing personalized medication, precautions, and lifestyle recommendations based on predictive outcomes.

Success Rate Prediction of a Restaurant using Machine Learning [\[GitHub\]](#)

- Implemented and optimized Random Forest Regression models in Python/scikit-learn for Zomato restaurant performance forecasting, resulting in a 25% accuracy boost. Applied comprehensive data preprocessing techniques for enhanced model.
- Used advanced feature engineering techniques (PCA, one-hot encoding) to improve model accuracy. Rigorously compared various models and fine-tuned hyperparameters to achieve a 15% reduction in mean squared error compared to baseline models.

Credit Score Prediction [\[GitHub\]](#)

- Leveraged ensemble methods (RandomForest, XGBoost) for multi-class credit rating predictions, achieving 95% accuracy reducing error rates by 30% using transaction, income, and debt data.
- Enhanced model performance through GridSearchCV for hyperparameter optimization, resulting in a 20% improvement in prediction precision and a 25% boost in overall efficiency in credit score analysis.

Customer Feedback Analysis for Mobile Phone Manufacturers [\[GitHub\]](#)

- Spearheaded the implementation of advanced algorithms and ML models for and integrated Random Forest Classifier and BERT models which yielded a 15% improvement in sentiment categorization and extracted relevant topics, providing actionable insights for development and market strategy.
- Achieved an accuracy of 89% for sentiment classification based on the essence of the feedback given using Random Forest algorithm.

EDUCATION

Georgia State University

M.S in Data Science and Analytics, CGPA - 4.17 (Currently pursuing)

Atlanta, Georgia
Aug 2023 - Dec 2024

Visvesvaraya National Institute of Technology

B. Tech in Mechanical Engineering, CGPA – 7.88

Nagpur, India
Jul 2016 - Jul 2020

TECH STACK

- Languages and Technologies** - SQL, Python, Java, Hive, Hadoop, Spark, Pig, R, AWS(EC2, S3, Lambda), JavaScript, C, SAP (ERP), SAS
- Frameworks and Tools** – Apache Airflow, PowerBI, Tableau, Excel, MS Office, Wordpress, Node.js
- DS Libraries** - Pandas, Numpy, Seaborn, Plotly, Selenium, BeautifulSoup, Sklearn, TensorFlow, MLlib, Scipy
- Machine Learning** – KNN, SVM, Decision trees, Regression, Random Forest, Deep Learning, Clustering, NLP, Sentiment Analysis, Topic Modelling
- Databases** – MongoDB (NoSQL), MySQL, GCP BigQuery

LICENCES AND CERTIFICATIONS

- Certified to be a Data Analytics Professional by Google and Basics of Modern Application development (IMAD) from IIT Madras by NPTEL.
- Certified in Excel for Data Analysis by IBM and Foundations of visualizations with Tableau by University of California, Davis.
