

Likitha Pasupulety

Business Analyst

Dallas, TX | pasupuletylikitha@gmail.com | 302-219-0190

SUMMARY

- Lead Business Analyst with 3+ years of expertise in requirement gathering, documentation, and reporting.
- Crafted comprehensive documentation Functional Requirements Document (FRD), Business Requirements Document (BRD), Software Requirements Specification (SRS), user stories, and use cases, ensuring clarity and alignment of project objectives.
- Managed database systems (SQL, MS Excel, ERP) to uphold data integrity and accessibility.
- Leveraged proficiency in UI design, Lucid Charts, and to promote effortless collaboration, enhance visual representation, and optimize business processes as a Business Analyst.
- Executed project plans utilizing project management tools like Jira and MS Project for efficient task organization and project tracking, ensuring projects stay on schedule and within scope.
- Utilized data visualization tools (Tableau, Power BI) for insightful analysis and decision-making.
- Conducted advanced analysis including cost/benefit, KPI, GAP, risk, and SWOT analysis to evaluate project viability and optimize strategic choices at every stage of the project lifecycle.
- Demonstrated strong soft skills, including time management, leadership, problem-solving, negotiation, decision-making, and effective documentation and presentation, enabling seamless alliance.
- Fostered smooth coordination across cross-functional teams through excellent verbal communication.

EDUCATION

Master of Science in Management Science | The University of Texas at Dallas - Richardson, TX *Dec 2023*
Bachelor of Technology in Computer Science | Jawaharlal Nehru Technological University - Anantapur, India *May 2020*

SKILLS

Methodologies: SDLC, Agile, Waterfall

Programming language: Python

Documentation: FRD, BRD, SRS, User Stories, Use Cases, BPM Workflows

Database: SQL, MS Excel, ERP

Project Management Tools: Jira, Kanban, MS Project, Git

Visualization Tools: Tableau, Power BI

Analysis Skills: Cost/Benefit Analysis, KPI Analysis, GAP Analysis, Risk Analysis, SWOT analysis, Product Analysis

Tracking/Other Skills: Jira, Microsoft Visio, Confluence, SAS, Figma, Lucid Charts, UI Designs

Soft Skills: Time Management, Leadership, Problem-solving, Negotiation, Decision-Making, Documentation and Presentation, Verbal communication

Operating System: Windows, Linux

EXPERIENCE

AIG, TX

July 2023 – Present

Business Analyst | *Digital Transformation*

- Spearheaded collaboration with business stakeholders and IT to analyze, define, and document business requirements, achieving 100% accuracy in project scope definition using tools such as BPMN and Microsoft Visio.
- Translated business requirements into an average of 5 user stories per sprint using JIRA, facilitating clear communication with development teams.
- Conducted gap analysis on existing market, identifying 3+ improvement areas per quarter through digital solutions, leveraging MS Excel for Data Analysis and SQL for managing databases.
- Monitored and analyzed key performance indicators (KPIs), such as user engagement metrics and system uptime, contributing to a 15% increase in digital product efficiency, using Tableau for dashboard creation and data visualization.
- Designed UI Prototype using FIGMA and BPM Workflow, Data Model diagrams using Lucid Charts resulting in a 40% reduced reconciliation time and 20% fewer disputes, latency with accurate tracking and enhanced transparency.
- Worked closely with product owners, designers, and developers to ensure that digital solutions met business objectives, user needs, and technical requirements, resulting in an 80% on-time delivery rate of project milestones.
- Partnered with cross-functional teams to streamline core processes, resulting in a 30% reduction in operational costs.

Business Analyst

- Organized meetings with key stakeholders to gather user requirements and establish Minimum Viable Product (MVP) for project deliverables, leading to a 20% reduction in project timeline through effective utilization of Lucid chart.
- Contributed to grooming and sprint planning sessions, ensuring alignment between business needs and project development, thereby achieving a 10% increase in project efficiency utilizing Agile methodologies and MS Project.
- Improved data processing by optimizing SQL queries with complex joins, leading to a 30% reduction in data load times.
- Enhanced customer audit templates with month-over-month KPI comparisons, resulting in a 60% increase in custom dashboard requests, aiding clients in optimizing e-commerce advertising.
- Developed user-friendly Power BI dashboards across databases to provide deep insights, enabling the resolution of key business challenges while ensuring data security.
- Engaged in project development and implementation to ensure the delivery of business requirements, resulting in a 20% increase in project success rate through the utilization of tools like Git and Microsoft Teams.
- Collaborated with data engineering and customer success teams to enhance data accuracy and create compelling pitch decks, driving a 55% revenue increase for an international client.
- Provided extensive post-launch support to the business team within the Digital Transformation project, documenting functionality gaps and data irregularities to drive effective solutions.
- Leveraged Microsoft SharePoint to achieve a significant 20% reduction in post-launch issues, focusing on UI-driven enhancements and visualization optimization.

ACADEMIC PROJECTS**Agile Advertising Performance Tracking, Tableau-Excel Synergy**

- Created Tableau Dashboard for tracking week-over-week advertising KPI changes, validated data in Excel for accuracy, and achieved 70% efficiency boost with Tableau templates, eliminating redundancy.

Heart Disease Prediction using Machine Learning Algorithms, Predictive Analysis

- Applied supervised data mining algorithms (Decision Tree and Naïve Bayes) to predict heart disease, revealing Decision Tree Classifier as the superior model with a 91% accuracy rate compared to Naïve Bayes' 87% accuracy.
