April

2022-Dec. 2023

Mindglobal, Remote

- Optimized wireless telecom expenses for 9 Fortune 1000 clients, across 6 major U.S. & Canadian carriers
- Negotiated and consulted lower rates for clients' carrier contracts
- Implemented new client reporting and invoicing
- Designed and reviewed data quality based on the customers' requirements
- Tracked line of business progress over time, taking logistics information as KPIs

IT PROJECT MANAGER & DATA ANALYST

Nov.

2020-Present

Rehoboth Inc., Upper Darby, PA

- Led the transition to a paperless practice by implementing Electronic Medical Records software for more efficient, effective, and accurate note-taking and documentation
- Consulted with department heads to identify training needs
- Collaborated with developers and other members of the project management team to assess project outcomes and prioritize future system features
- Created a knowledge base of about 20 Direct Support Professionals (DSPs), Community SPs (CSP), and administrators, improving employee onboarding and reducing time spent on documentation and administrative tasks by about 55%
- Reduced the DSPs' error rate by more than 50%, compared with traditional manual documentation in paper charts
- Ensure best practices are applied and integrity of data is maintained through security,

documentation, and change management
