- **Documentation:** FRD, BRD, SRS, RTM, Confluence
- **Project Management Tools:** MS Project, MS SharePoint, JIRA, Asana, Microsoft Suite, Google Suite, Lucidcharts, Balsamiq, Microsoft Visio, UAT, Google Analytics
- **Visualization:** Tableau, Power BI, MS Office (Excel, PowerPoint, Word, Outlook)
- **Analysis and Design Skills:** Cost/benefit analysis, Ad-hoc Analysis, GAP analysis, Requirement Gathering, SWOT analysis, Budget Analysis, Root Cause Analysis, Mockups, Wireframes, BPMN, Activity, Sequence diagrams
- **Database:** MySQL, SQL Server
- **Soft Skills:** Time Management, Product Management, Stakeholder Management, Detail-oriented, Presentation, Interpersonal skills, Communication, Problem Solving, Team player

Education

Master in Management Information Systems | Northern Illinois University, DeKalb, Illinois

Work Experience

PNC Financial Services, OH | Business Analyst

May 2022 – Present

- Achieved a 25% increase in team productivity by streamlining workflows through effective JIRA utilization for task management, progress tracking, and ensuring timely delivery.
- Executed TestRail's capabilities to effectively manage and execute UAT, including test case creation, execution tracking, and comprehensive reporting, leading to a 55% reduction in UAT cycle time.
- Utilized Tableau's data blending and calculated field capabilities to analyze large datasets, identifying key trends, patterns, and anomalies with a 20% improvement in key performance indicators (KPIs).
- Designed a centralized knowledge repository on Confluence, improving document accessibility and team collaboration by 40%, ensuring up-to-date project documentation, meeting minutes, and requirement specifications.
- Employed cost-benefit analyses, rigorously evaluating potential return on investment (ROI), leading to the selection of initiatives with a combined projected ROI of 30%.
- Applied stakeholder expectations by consistently communicating project progress, addressing concerns, and resolving conflicts, achieving a 60% stakeholder rate.

TopHat Software Technologies, India | Business Analyst

Jan 2020 – Jul 2021

- Provided ongoing coaching and training on Scrum-Ban principles, enhancing team agility and self-sufficiency, leading to a 20% improvement in overall productivity.
- Optimized project developing comprehensive FRDs based on detailed BRDs in a 20% reduction in project scope creep and improvement in on-time delivery, streamlining project execution.
- Enhanced requirements gathering and analysis by utilizing Lucidcharts to visually represent and communicate complex requirements to stakeholders, including a 65% reduction in requirements-related defects.
- Built large datasets using Power BI's data transformation and modeling capabilities, uncovering key trends, patterns, and anomalies, which led to the discovery of a new segment and a 44% increase in revenue.
- Conducted ad-hoc analyses, providing timely insights to stakeholders, resulting in the identification of a critical market opportunity leading to a 40% increase in revenue, significant share gain, or successful launch.
- Leveraged SQL expertise to significantly improve data analysis efficiency for extracting, transforming, and analyzing large datasets from SQL Server databases, achieving a 20% reduction.

Certification

- IO4PM™, International Organization for Project Management™ - Accredited Project Manager Certification
- International Scrum Institute™ - Scrum Master Accredited Certification
