Professional Summary

QA Automation Engineer with over 5 years of expertise in banking, healthcare, and finance developing dependable test frameworks. competent in Python, Java, Selenium, and testing tools for APIs, devoted to increasing software quality, decreasing manual labor, and working in Agile teams to produce better software more quickly.

Professional Experience

QA Automation Engineer | JP Morgan Chase (Finance Domain)

May 2024 – Present

- Responsible for creating test scenarios for user stories and creating automation test suites using Python, Selenium WebDriver, and Pytest framework.
- Used Cucumber on BDD frameworks which allows automation of functional testing validation, along with
- Protractor and TypeScript language to test Angular Applications.
- Implemented cross-browser and cross-platform web application testing with Selenium WebDriver.
- Created and executed test cases based on user stories, provided UAT execution, and assisted in defect tracking using Jira.
- Used Postman which is lightweight API testing tool which is used manually to test Webservice testing.
- Execute the Test cases and review the results to get the Business approval for UAT.
- Created and updated test cases in Excel sheets and generate Traceability Matrix.
- Performed Manual Testing to check the flow of the application
- Assisted Manager by providing automation strategies, Selenium/Cucumber Automation and Jira reports.
- Experienced in testing applications manually as well as using automated testing tools like Quality Center/ALM.
- Performed Restful API testing using Java Rest Assured, Cucumber, and JUnit.

Validated website functionality across desktop and mobile devices, conducting cross-browser testing (Chrome, Firefox, Safari, Edge).

- Writing tests using Java web applications. Web controls testing - wrote automation to test the controls from end to end starting with invoking in Internet Explorer.

QA Automation Engineer | Cigna (Healthcare Domain)

September 2023 – April 2024

- Developed automated scripts and frameworks using key word driven framework.
- Created automation scripts in Soap UI using Groovy Script for web services testing.
- ETL tools for healthcare data cleaning and analyzing datasets using Python and Pentaho DI tools.
- Using java oops concepts, collection hierarchy.
- Experience in analyzing, writing, and implementing test scripts for Regression testing using automation tools QTP/UFT.
- Good working knowledge of major Operating Systems such as Windows and Mac OS.
- Utilized test management tools such as Maven, Jenkins, and Jira to manage and execute automated test suites, report and track defects, and analyze test results.
- Designed and executed complex test cases for healthcare applications, ensuring compliance with HIPAA and other regulations.
- Involved in Design and development of test plans based on high-level and detailed designs.
- Performed Black-box testing, white-box testing, integration testing and regression testing on the applications.
- Developed and executed test scripts using Selenium WebDriver with C# validate the functionality and usability of web applications.

Senior Analyst | HCL Technologies (Healthcare & Banking Domain)

February 2020 – April 2023

- Created and executed automated test scripts using Selenium Web Driver and TestNG.
- Analyzed system requirements specifications, developed test plans, test cases, and test data for testing the functionality, GUI, usability, user acceptance tests with both Positive and Negative Scenarios, especially focused on logical scenarios of the application.
- Upgraded a legacy Java-based Jbehave framework to a modern Playwright Framework, ensuring alignment with business requirements. Designed, implemented, and thoroughly tested the new framework.

- Used Perfecto Mobile (Appium) to facilitate Mobile testing by creating mobile driver class with the required mobile capabilities. Involved with working in all phases of SDLC methodologies.
- Implemented Automated execution of tests (nightly and need based) using Maven and Jenkins.
- Designed, developed and maintained test automation scripts using Robot Framework for web and mobile applications. Used Git as repo for version control. Worked with merge conflicts.
- Experience in Automated Software Testing using Rest assured, Cypress and Selenium.
- Worked in DevOps, installing, configuring, and integrating Automation scripts on Continuous Integration tools (CI/CD) like Jenkins for nightly test suite execution and working on knowledge on testing and configuring Amazon Web services (AWS). Developed modular & robust automation framework using Selenium WebDriver, Cucumber, TestNG and Java.
- Developed Linux shell scripts to automate test executions and system monitoring.
- Analyzed business requirements, documented business requirements specifications, wrote Test Plans and Test Cases.
- Involved in Webservices Testing using the Soap UI tool. Validated request and response XML.
- Involved in execution of all types of system testing including Integration, Regression, User Acceptance and Functional testing. Developed framework using JUnit, Page Object Model.

Technical Skills

- **Automation Tools:** Selenium WebDriver, Playwright, Cypress, Protractor.
- **Testing Tools:** Selenium Web Driver/IDE/GRID, TOSCA, Playwright, Protractor, Appium, Espresso.
- **Language/ Script:** Java, JavaScript, Linux Shell Scripting, VBScript (UFT), C, C#, Python.
- **Frameworks:** Junit, TestNG, TDD, BDD, DDT, Pytest, Nunit, Robot framework.
- **API testing:** Postman, Swagger, Rest Assured, Newman, SOAP UI.
- **Cloud Technologies:** AWS (Redshift, S3, EC2, lambda), Azure, GCP.
- **Web development:** HTML, VB Scripts, XML, CSS, Flash, JavaScript, Ruby, Perl, Python.
- **Bug Tracking Tools:** HP Quality Center, Bugzilla, Visual Studio TFS, JIRA, Eclipse.
- **Build/ CI Tools:** Ant, Maven, Jenkins, Hudson, Bamboo, Splunk, Kubernetes.
- **Databases Technologies:** MS SQL Server 2000/2005, OLAP and OLTP, Oracle 9i/10g, Oracle PL/SQL, MYSQL, NoSQL, PostgreSQL.
- **Manual Testing & Healthcare Compliance:** HIPAA regulations, healthcare workflows, customer service platforms.
- **Platforms:** Windows 7/Vista/XP, UNIX, Linux

Projects:

Academic Task Management System for Academic Project

Worked as a business analyst and quality assurance specialist to help create an academic task management system with gamification and real-time task tracking. To support feature development and usability enhancements, data analysis was done using Tableau, and data validation tests were designed and carried out using Postman and SQL. Postman, MySQL, Tableau, Firebase, and Flutter were among the tools utilized.

Migration of Automation Frameworks

A historical Behave framework was moved to Playwright, increasing execution speed, maintainability, and test coverage. integrated CI/CD processes with automated mobile and cross-browser web testing.

Tools & Technology: Java, Maven, Jenkins, Git, Behave, Playwright, and Selenium.

Education & Certifications

Master of Science in Information Technology

Southern New Hampshire University – Manchester, NH | GPA: 3.695 | April 2023 – Dec 2024

- Certified in Python, PHP, and HTML
- ISTQB Foundation Level Certification
- Certified Agile Tester
