 San Diego, CA

PROFESSIONAL SUMMARY

Detail-oriented Healthcare Data Analyst with hands-on experience in SQL analytics, ICD-9/ICD-10 code mapping, EHR optimization, and healthcare data compliance. Skilled in Python, R, and data visualization tools like Tableau and Power BI. Adept at analyzing clinical workflows, ensuring data accuracy, and driving actionable insights from complex healthcare datasets. Proficient in healthcare interoperability standards including HL7, FHIR, SNOMED CT, and UMLS.

EDUCATION

- George Mason University** Fairfax, VA, USA
Masters in Health Informatics; GPA: 3.94/4 August 2022 - May 2024
 - Kaloji Narayana Rao University** Warangal, India
Bachelor of Dental Surgery; CGPA: 3.6/4 October 2016 - January 2022

TECHNICAL SKILLS & EXPERTISE

- Programming & Query Languages:** Python, R, SQL, MATLAB, SAS, STATA
- Data Management:** MS SQL Server, Excel, EMR/EHR Systems, Schema Matching
- Healthcare Standards:** ICD-9/10, CPT, SNOMED CT, UMLS, HL7, FHIR, HIPAA
- Analytics & Modeling:** Descriptive Statistics, Predictive Modeling, Cohort Analysis, Data Cleaning
- Visualization Tools:** Tableau, Power BI, Weka, GitHub
- Healthcare Data Quality & Interoperability:** NLP, XML, Data Mapping, Quality Assurance

PROFESSIONAL EXPERIENCE

- Optimal Healthcare Group** Maryland, USA
Quality Assurance Analyst July 2024 - Present
 - Developed and maintained automated SQL queries and stored procedures to validate clinical and claims data, reducing data integrity errors by 35%.
 - Executed compliance and quality checks for healthcare datasets, ensuring adherence to CMS and HIPAA guidelines.
 - Participated in QA testing of HL7 and FHIR-based data exchanges, ensuring semantic interoperability and clinical coding accuracy.
 - Provided actionable insights through advanced statistical modeling and SQL-based KPIs.
 - Avalon In-Home Nursing and Rehabilitation Centre** Virginia, USA
Healthcare Data Analyst Intern January 2024 - May 2024
 - Analyzed EMR datasets and optimized SQL queries to identify treatment duration variability and reduce care inefficiencies.
 - Built dashboards in Tableau and Power BI to track patient outcomes by ICD diagnosis category, resulting in a 15% improvement in care planning.

- Mapped ICD-9-CM to ICD-10-CM codes using Python/SQL, enhancing coding accuracy across 3,000+ patient records.

● **Panineeya Institute Of Dental Sciences & Research Centre**

Hyderabad, India

Student Intern (Clinical and EHR Support)

January 2021 - January 2022

- Maintained accurate and HIPAA-compliant EHR records, increasing documentation precision by 15%.
- Delivered oral healthcare services and designed treatment plans for underserved and special needs populations.
- Used ICD codes for patient record classification and contributed to internal QA audits.
- Conducted workflow evaluations using patient feedback, improving service delivery by 50%.

TEACHING EXPERIENCE

● **Teaching Assistant, George Mason University**

Fairfax, VA, USA

College of Public Health

January 2025 - May 2025

- Mentored graduate students in developing normalized healthcare databases using MS SQL Server, ensuring they followed best practices in relational database design to reduce redundancy and enhance query performance.
- Delivered in-depth tutorials on writing complex SQL queries (JOINS, subqueries, CTEs, window functions) to extract, clean, and analyze multi-table health datasets for reporting and quality improvement.
- Guided students in integrating R and SQL for advanced analytics projects, including importing/exporting large datasets and linking R scripts with SQL outputs to conduct data visualization and evidence-based analysis.

○ **Graduate Teaching Assistant, George Mason University**

Fairfax, VA, USA

College of Public Health

January 2024 - May 2024

- * Taught core informatics concepts and standards, including ICD-9/10 coding, SNOMED CT, HL7, FHIR, CPT, and UMLS, helping students understand clinical documentation, terminology, and semantic interoperability.
- * Supported the course's academic operations by reviewing technical assignments, helping improve comprehension and engagement among students by over 20%.
- * Collaborated with faculty to coordinate course alignment with accreditation and regulatory compliance standards, leading to a more efficient and audit-ready curriculum process.

ACADEMIC PROJECTS

○ **Analysis of Exploring Ethnicity and Length of Stay — SQL, Python, Weka**

College of Public Health, George Mason University

February 2023 - May 2023

- * Mapped diagnostic codes from ICD-9-CM to ICD-10-CM using Python and SQL to create a unified codebase, enhancing interoperability across legacy systems and improving analytical accuracy.
- * Integrated patient data from multiple sources through schema matching and XML structure normalization, improving data integrity and reducing duplication by 20

○ **Unified Patient Identity Management — SQL, Python, XML**

College of Public Health, George Mason University

February 2023 - May 2023

- * Performed a cohort analysis using SQL and Python on EMR datasets to study the relationship between ethnicity and hospital length of stay, revealing trends in health disparities.
- * Presented key findings with Tableau dashboards and custom visualizations, which earned high clarity ratings (85%) from faculty and peers and influenced discussion on equitable care delivery.
