

Maheswar Reddy Peram

(Sr. Java Full Stack Developer)

maheswarreddyperam@gmail.com | +1 (616) 617 - 0013

PROFESSIONAL SUMMARY

- Over 5 years of IT experience in Analysis, Design, Development, Implementation, and Testing in JAVA/J2EE technologies. Also, worked on Java 8, Java 11, Java 17 features like Stream API, Lambda expressions and Filters etc.
- Proficient in managing the software development life cycle (SDLC) from project initiation to deployment, ensuring adherence to timelines, budgets, and quality standards.
- Designed and integrated interactive features such as live chat support and personalized recommendation systems to improve customer satisfaction and retention rates.
- Expertise in designing and developing diverse web and enterprise-level applications using Java/J2EE technologies, including Struts, Spring, and Hibernate.
- Experience in Angular to design compelling user interfaces, incorporating key concepts such as two-way data binding, directives, and dependency injection.
- Experience with HTML5/CSS3 development, with proficiency in React JS, Angular, Responsive design, NodeJS, JSP, JSTL, Servlets, JavaScript, TypeScript, jQuery, AJAX, AngularJS, Angular 2/4/6/8/12, and Bootstrap for frontend development.
- In-depth knowledge of various Spring Framework modules such as Spring MVC, IOC, AOP, JDBC, JTA, IO, Spring Boot, Spring Microservices, Spring REST, Spring Eureka, Consul, Swagger UI, and Spring Zuul.
- Implemented React features like React Context API, React Hooks, and middleware such as Redux-Saga.
- Developed code to consume web services using SOAP and REST.
- Extensive experience working with Amazon Web Services (AWS) like EC2, S3, Amazon Simple DB, RDS, Elastic Load Balancing, SQS, IAM, CloudWatch, EBS, CloudFront, VPC, CloudFormation, Elastic Cache and SNS.
- Expertise with containerization tools such as Kubernetes and Docker.
- Proficient in working with various messaging queue technologies such as Apache Kafka, Amazon SQS, and Google Cloud Pub/Sub.
- Strong Experience in Maven for build, Jenkins and SonarQube continuous integration

TECHNICAL SKILLS:

Java APIs	J2EE, EJB, Servlets, JSP, JSTL, Custom Tag Libraries, JAX-RPC, JDBC, JMS, JUnit, Mockito, Spring, MVC, Hibernate/ORM, Spring AOP, Spring DAO, Spring Core, Spring Security, Spring REST, Spring Boot, Spring Data JPA, Apache Kafka, Spring, Java Beans
Programming Languages	C, C++, Core Java, Java/J2EE, SQL, PL/SQL, Python
Web Technologies	HTML5, CSS3, JavaScript, React, Angular 8/12, jQuery, Servlets, JSP, Bootstrap, Ionic, Okta
Frameworks	Spring 3. x, Spring Boot, Spring MVC, Spring Security, Hibernate 4.x/3.x, NodeJS
Databases	PostgreSQL, DB2, MongoDB, SQL Server, and MySQL
IDE & Build Tools, Design	IntelliJ, Eclipse, Microsoft Visual Studio, Junit, Log4j and Maven 3. x
Web Services	SOAP and Restful
Build & CICD	Docker, Jenkins
Application/Web Servers	JBoss, Tomcat 5.0.28/6.0
Cloud Technologies	Amazon Web Services (AWS), GCP
Operating Systems	Windows (10), LINUX
Version Control	GitHub, Git Lab, Bitbucket

PROFESSIONAL EXPERIENCE:

COUNTRY FINANCIAL

Full Stack Java Developer

May 2023 - Present

Responsibilities:

- Implemented microservices architecture with Spring Boot to create RESTful APIs, focusing on JSON data exchange, and developed business components to facilitate software delivery across the enterprise.
- Leveraged advanced Java 17 including Lambda expressions for array operations, collections, and enhanced concurrency methods throughout the application to achieve precise programming.
- Utilized Angular 12 to develop Single Page Applications (SPAs) and UI pages, employing HTML5, Bootstrap, CSS3, SASS, JavaScript, jQuery, and AJAX for implementation.
- Utilized Spring Data JPA to map Java domain objects to relational database tables, reducing boilerplate code and improving development productivity.
- Managed and administered AWS Services, including CLI, EC2, VPC, S3, Route 53, CloudTrail, and IAM.
- Implemented JMS to enhance communication between various components of the system, leading to improved scalability and reduced coupling.
- Leveraged AWS CloudWatch to monitor and analyze system metrics, application performance, and resource utilization in real-time.
- Ensured REST API security by implementing authentication and authorization mechanisms such as OAuth2 and JWT.
- Designed and coded application components in an Agile environment utilizing a test-driven development (TDD) approach.
- Experienced in leveraging GitLab CI/CD pipelines for automating build, test, and deployment processes, improving development efficiency and code quality.
- Implemented pre-authentication and database security using Spring Security, securing application access, and using Spring Batch for scheduling and maintaining batch jobs.
- Integrated Spring Boot with various databases and ORM frameworks like Hibernate or Spring Data JPA to facilitate data persistence and manipulation on the backend.
- Designed and implemented microservices-based applications on GCP using Kubernetes Engine and Istio, optimizing scalability, reliability, and performance.
- Proficient in using Promises, async/await syntax, and callback functions to handle asynchronous operations effectively in ECMAScript, ensuring non-blocking execution and enhancing application performance.
- Applied Hibernate concepts extensively, including inheritance, lazy loading, dirty checking, locking, and transactions.
- Designed and developed multiple batch processes using Spring Batch with Spring Boot.
- Implemented Kafka producer and consumer applications using Kafka APIs, enabling asynchronous and distributed message processing.
- Developed and optimized SQL queries, stored procedures, and database functions to manipulate and retrieve data efficiently from Oracle database, ensuring data integrity and consistency.
- Deployed Microservices as Restful Java Web Services on AWS (Amazon Elastic Beanstalk).
- Built RESTful web services by creating a Node JS Server in the backend to handle requests sent from the front-end using jQuery and Ajax calls.
- Deployed and configured Java applications on IBM WebLogic Server, ensuring optimal performance and scalability.
- Integrated CloudWatch with AWS Lambda functions to capture and analyze function execution metrics, enabling fine-grained monitoring and optimization of serverless applications.
- Used Jenkins for CI/CD Continuous Implementation and Continuous Delivery.

Environment: Java8/11, Microservices, HTML 5, CSS 3, Bootstrap, JavaScript, JSON, Maven, Spring, Hibernate, Spring Boot, Spring Security, Restful Web Services, Kafka, Agile SCRUM, JBoss, IntelliJ, AWS Iam, CLI, EC2, VPC, S3, Route 53, CloudTrail, Jenkins, Git, Docker, SonarQube, JAX-RS, JUnit, Log4j, Oracle, Swagger, Agile.

UPTIME AI INC - India

Full Stack Developer

May 2021 – Aug 2022

Responsibilities:

- Created responsive UI web pages with HTML5, CSS3, Angular 6 & 8, JavaScript, TypeScript, Node JS, and utilized Angular filters in expressions and directives for UI data filtering.
- Optimized application performance through Angular 8 Component development in anticipation of future Angular transitions.
- Integrated Java code (API) into JSP pages and responsible for setting up AngularJS framework for UI development.
- Used React JS to create views to hook up models to the DOM and synchronize data with the server as a SPA.
- Utilized Spring and Spring MVC components for implementing the business layer and navigation part of the application.
- Implemented Ping Identity solutions for robust IAM, including Single Sign-On (SSO), Multi-Factor Authentication (MFA), and user provisioning.
- Worked on Aws serverless, DynamoDB, Lambda, Python, S3, SNS, EC2, Lambda for cloud platform for building serverless applications.
- Used Jenkins pipelines to drive all microservices builds out to the Docker registry & deployed to Kubernetes.
- Implemented security features such as authentication, authorization, and role-based access control (RBAC) using Spring Security within backend Spring Boot applications.
- Implemented code to consume messages from a streaming data platform (SDP) using Apache Kafka.
- Implemented the Flux pattern by integrating the Redux framework as a core dependency.
- Utilized Spring Data JPA repositories to streamline CRUD (Create, Read, Update, Delete) operations on database tables.
- Deployed microservices in AWS docker containers and developed them using Spring Boot.
- Understand and adopt Microservices architecture to gradually replace a core monolithic application to Microservices.
- Used Kubernetes to orchestrate the deployment, scaling, and management of Docker Containers.
- Used Jenkins pipelines to drive all microservices builds out to the Docker registry & deployed to Kubernetes.
- Used Splunk logging for tracking, application monitoring and for security and compliance.
- Used Version one and confluence for documentation, planning, tracking work, reporting across teams.

Environment: Java8, J2EE, Spring Boot, Microservices, Restful, JUnit, Cassandra, Scala, HTML5, CSS, Perl, JavaScript, Bootstrap, jQuery, Maven, AJAX, XML, XSLT, log4j, Git, Agile, Docker, Splunk, Jenkins, Jasmine, karma, Selenium Web Driver, Kafka, SOAP, CloudWatch.

Dixon - India

Full Stack Developer

Jan 2019 – May 2021

Responsibilities:

- Developed the application using the Struts Framework, which employs the classical Model-View-Controller (MVC) architecture. UML diagrams, including use cases, class diagrams, interaction diagrams (sequence and collaboration), and activity diagrams, were utilized.
- Operated in an Agile work environment with a Content Management system for workflow management and content versioning.
- Designed the UI using HTML5, JavaScript, CSS3, AJAX, the Bootstrap responsive framework, and JSP to achieve interactive cross-browser functionality and complex user interfaces.
- Designed and implemented services that orchestrate order-related metadata, enabling scalable lookups from Cassandra.
- Enhanced the UI logging for the "suggest edits" interface using Flux and React.js.
- Participated in Quality Assurance activities, prepared documents for QA, attended QA meetings, and actively contributed to production deployments while strictly adhering to SDLC processes.
- Conducted CRUD operations, including data update, insertion, and deletion, in both MongoDB and the Oracle database management system. Managed database access and data transmission through RESTful web services.
- Implemented the application following the principles of various design patterns such as MVC, Session Facade and Singleton.
- Wrote Java code for fetching data from Cassandra, handling large volumes of data, and scheduling maintenance jobs.
- Worked on NodeJS for building web applications.

- Translated a set of business requirements and wireframes into fully functioning system components and web code using HTML, CSS, JavaScript, React JS, Redux, and Typescript.
- Generated dynamic UI pages and components using JavaScript and React JS.
- Developed the header and footer of the web app as reusable UI components in React JS.
- Implemented RESTful APIs and microservices using Web Flux, leveraging its functional and annotated programming models.
- Designed and coded various JAVA and J2EE modules, including Spring Boot, Spring MVC, Spring Rest, Hibernate, JPA, and Couchbase.
- Utilized Spring Data JPA repositories to streamline CRUD (Create, Read, Update, Delete) operations on database tables.
- Worked on Aws serverless, DynamoDB, Lambda, Python, S3, SNS, EC2, Lambda for cloud platform for building serverless applications.
- Designed roles and groups for users and resources using AWS Identity and Access Management (IAM).
- Participated in the design of user screens and validations using HTML, jQuery, Ext JS, and JSP to meet user requirements.

Environment: Java8, J2EE, Spring Boot, Microservices, Restful, JUnit, Cassandra, HTML5, CSS, JavaScript, Bootstrap, jQuery, Maven, AJAX, XML, log4j, Git, Agile, Docker, Splunk, Jenkins, Jasmine, karma.

EDUCATION:

- | | |
|---|---------------------|
| • Master’s degree in Applied Computer Science from Grand Valley State University | Dec - 2023 |
| • Bachelor of Computer Science and Engineering from Lovely Professional University, Punjab. | April - 2020 |
