

## **SUMMARY**

Experienced **Data Analyst** with over **4 years** of experience in **data science, predictive modeling** and **statistical analysis** across telecommunications, insurance, and finance sectors. Highly skilled in leveraging **SQL** and **Python** for the entire data manipulation process, encompassing data **extraction, transformation, and loading**. Offering a strong understanding of all **Data Science** and **Data Analytics Lifecycle** stages, complemented by a solid track record in applying **Agile** methodologies to drive continuous improvement in data-driven projects. Passionate about leveraging advanced tools in collaborative environments, delivering high-quality analysis with excellent communication to excel in teamwork and individual challenges.

## **EXPERIENCE**

### **Data Scientist**

**03/2023 - Present**

#### **T-Mobile, Chicago IL**

- Developed and implemented a system of predictive models (using **scikit-learn**) designed to anticipate potential failures in network equipment, thereby enabling proactive maintenance scheduling. Enhanced network reliability, improved customer service quality, and optimized maintenance cost by **16%**.
- Leveraged **supervised learning techniques: Decision tree, KNN, Ensemble methods, handled imbalanced datasets**. Efficiently applied **supervised technique** for **classification problem**, which performed 96% of accuracy in predictions.
- Identified potential risks, including **data breaches, model inaccuracies, and infrastructure failures**, with corresponding mitigation strategies.
- Leveraged Azure cloud computing for scalable data storage and analysis.
- Detailed timeline of project milestones, including phases for requirements gathering, model development, pilot implementation, evaluation, and system rollout.
- Facilitated **daily Stand-Ups, Sprint Planning, Sprint Grooming, Sprint Retrospective** meetings, and reviews.

### **Data Analyst**

**10/2021 - 03/2023**

#### **Geico, Chicago IL**

- Analyzed historical claims data, reduced costs associated with processing customer claims by **11%**, and improved customer satisfaction by **18%**.
- Identified bottlenecks and inefficiencies in the current claims process and implemented data-driven solutions to streamline operations.
- Performed advanced **data queries** and analytics using **SQL** in **PostgreSQL** databases, applying complex **joins** and **sub-queries** to extract actionable insights from large datasets.
- Developed a dashboard for real-time monitoring of claims status and handler activities in **Microsoft Power BI**.
- Leveraged **Python** libraries (**NumPy, pandas, Matplotlib/Seaborn**) for numerical computing, efficient data cleaning, transformation, and analysis, producing detailed and insightful visualizations.
- Collaborated with cross-functional teams to meet project timelines and deliverables, ensuring alignment between business objectives and analytical insights, leading to a **10%** improvement in operational efficiency.
- Experienced in cloud computing environments such as **Azure** for scalable data storage and analysis.

### **Data Analyst**

**03/2020 - 10/2021**

#### **Fidelity Investments, Chicago IL**

- Boosted client satisfaction by **15%** through personalized investment strategies. Conducted thorough data analysis and developed an interactive, user-friendly client dashboard leveraging **Power BI**. Created comprehensive user guides to facilitate the seamless adoption of new analytical tools.
- Transformed large datasets in Excel for actionable insights, boosting reporting accuracy and reducing processing time by 21%.
- Gathered detailed investment and market data from both internal and external sources.

## **SKILLS**

- |                                                                     |                                                                     |
|---------------------------------------------------------------------|---------------------------------------------------------------------|
| • Python libraries: Numpy, Pandas, Scikit-learn, Matplotlib/Seaborn | • MS Suite                                                          |
| • Data Analysis: SQL, Python                                        | • Machine learning: Supervised and Unsupervised learning techniques |
| • Visualization: Power BI, Tableau                                  | • Git, Github                                                       |
| • Agile, Scrum                                                      | • HTML, CSS, Javascript                                             |
| • Azure                                                             | • Jira                                                              |

## **EDUCATION**

**Bachelor of Science (BS)**, Radio Engineering, Electronics and Telecommunications
