PROFESSIONAL EXPERIENCE

Federal Aviation Administration

Service Desk Technician

Remote

February 2024 - Present

- Increased user satisfaction and system uptime by 25% in a high-volume service desk environment by utilizing strong communication skills and Excel to track, analyze, and resolve user access issues, enabling informed decision-making and process transformation.
- Achieved a 95% resolution rate for technical issues in a remote support environment by documenting incidents and resolutions in ServiceNow, leveraging business analysis to identify recurring problems and suggest process improvements for data-driven decisions.
- Decreased recurring account-related incidents by 40% over six months by implementing proactive troubleshooting and transformation protocols, and communicating actionable insights to relevant teams using data visualization techniques in Excel and Tableau.
- Improved incident escalation and team collaboration in service desk operations by streamlining logging and escalation of tickets in ServiceNow, collaborating with teams to ensure efficient data cleansing and supporting decision-making through accurate documentation.
- Developed foundational skills in SQL, Power BI, and data analysis during early-stage career by applying willingness to learn new tools for basic reporting and data visualization tasks, supporting business analysis and transformation initiatives.

TEKSystems

Field Service Technician

Remote

August 2023 - February 2024

- Improved data management efficiency by 25% by utilizing Excel to cleanse and organize confidential client records for Medicaid renewals, supporting compliance and informed business decisions.
- Enhanced client satisfaction by 30% by providing clear communication and remote troubleshooting during Medicaid renewals, documenting insights to inform process improvements.
- Resolved 90% of hardware issues on first contact by diagnosing and addressing technical problems, escalating complex cases, and maintaining detailed records in Excel to support team collaboration.
- Demonstrated adaptability and willingness to learn new data tools by proactively seeking opportunities to expand skills in data analysis and visualization, including exposure to Power BI and SQL, while transitioning to more data-focused responsibilities.

Tresco Inc

Help Desk Technician

Las Cruces, NM, USA

July 2022 - June 2023

- Enhanced operational efficiency and security for over 20 users monthly by managing accurate user profiles and access privileges, developing a foundation in business process improvement and data accuracy.
- Reduced average technical issue resolution time by 30% by analyzing error logs and applying targeted troubleshooting to over 1,200 software and technical issues monthly, strengthening analytical and data-driven problem-solving skills.
- Increased user satisfaction across the organization by efficiently resolving technical issues, gaining experience in data analysis and clear communication with technical and non-technical users.
- Built a strong foundation in data accuracy and process documentation by documenting solutions and maintaining records in an early career IT support role, showing willingness to learn data cleansing and reporting best practices.

PROJECTS & OUTSIDE EXPERIENCE

Data Cleaning & Visualization Project (Personal Project)

- Improved data quality and consistency across a raw sales dataset by removing duplicates, standardizing inconsistent entries, handling missing values, and applying Excel functions such as VLOOKUP, TEXT, and IF to prepare analysis-ready data.
- Enabled clear business insights and trend identification by developing and deploying a Power BI dashboard visualizing monthly revenue, top-selling products, regional performance, and customer segments using slicers, filters, and drill-down visuals.
- Demonstrated foundational end-to-end data analysis skills by managing the process from raw data cleaning in Excel to delivering business-ready dashboards in Power BI, gaining hands-on experience in data cleansing, transformation, and visualization.
- Built familiarity with data-driven decision-making by interpreting sales data and visualizations to identify key trends and outliers, supporting effective business decision-making.
- Showcased willingness to learn new data analysis tools and techniques by exploring and applying Excel and Power BI features for data analysis and visualization, strengthening readiness for professional data analyst responsibilities.
