PROFESSIONAL SUMMARY

Software Developer with 3+ years of experience building enterprise applications across marketing technology and infrastructure platforms. Proficient in **Java (8–17), Spring Boot, React.js, Angular, RESTful microservices, Docker, Kubernetes, AWS, and CI/CD pipelines**, delivering secure and performance-optimized solutions. Experienced in integrating **Python-based AI/ML models (Pandas, TensorFlow, and AWS Sage Maker)** to support personalization and predictive analytics within cloud-based systems.

PROFESSIONAL EXPERIENCE

Software Developer | Epsilon | USA | Aug 2025 – Present

- Developed customer engagement microservices using **Java 17, Spring Boot, Hibernate/JPA**, and **PostgreSQL**, reducing API response time from 480 ms to 210 ms across 6 campaign management modules processing high-volume interaction data.
- Built responsive frontend applications with **React.js, TypeScript, Redux, HTML5**, and **CSS3**, delivering 18 reusable components integrated with personalization and analytics APIs across 4 enterprise marketing platforms.
- Integrated AI-driven recommendation services using **Python, Pandas, Scikit-learn**, and **AWS SageMaker endpoints**, enabling real-time content personalization within campaign workflows.
- Secured and deployed containerized services through **Docker, Kubernetes (AWS EKS)**, and automated **CI/CD pipelines** using **Jenkins** and **GitHub Actions**, reducing deployment cycles from 45 minutes to 12 minutes across 9 releases.
- Implemented model inference and analytics APIs using **RESTful services, Spring Boot**, and cloud-based **AWS S3** data pipelines, supporting predictive segmentation and campaign performance analysis.

Graduate Student Assistant | University of South Florida | USA | Feb 2024 – Aug 2024

- Analyzed academic performance datasets using **Python, SQL**, and **Excel (PivotTables, VLOOKUP)**, generating validated reports for 3 departmental research initiatives and reducing reporting turnaround by 12 business days.
- Managed graduate program records within **Banner ERP** and **SharePoint**, maintaining over 600 student records with accurate semester submissions and compliance tracking.

Software Developer | Dell Technologies | India | May 2021 – Jul 2023

- Constructed backend services using **Java 11, Spring Boot, Hibernate/JPA**, and **Oracle**, processing 1.8 million infrastructure asset records and reducing service response time from 520 ms to 240 ms across 8 internal IT modules.
- Produced frontend dashboards with **Angular, TypeScript, HTML5**, and **CSS3**, delivering 22 production components supporting 5 global infrastructure monitoring systems within 4 sprint cycles.
- Implemented secure enterprise APIs using **Spring Security, JWT**, and **OAuth2**, resolving 19 vulnerabilities identified during quarterly compliance reviews aligned with **OWASP Top 10** standards.
- Deployed containerized applications through **Docker, Kubernetes**, and **Azure (VMs, Blob Storage, and Azure SQL)**, integrating **Jenkins** and **Maven** to reduce build-to-deploy cycles from 60 minutes to 18 minutes across 11 release iterations.
- Developed analytics and predictive maintenance modules using **Python, Pandas**, and **TensorFlow**, integrating RESTful services built with **Node.js** and **Flask** to analyze infrastructure performance data and improve asset lifecycle tracking accuracy.

TECHNICAL SKILLS

- Languages:** Java (8–17), JavaScript (ES6+), TypeScript, SQL
- Backend:** Spring Boot, Spring MVC, Spring Security, Hibernate/JPA, RESTful APIs, Microservices
- Frontend:** React.js, Angular, Redux, HTML5, CSS3
- Databases:** PostgreSQL, MySQL, MongoDB
- Cloud & DevOps:** AWS (EC2, S3, RDS, Lambda), Docker, Kubernetes, Jenkins, CI/CD
- Build & Tools:** Maven, Gradle, Git, GitHub/GitLab
- Testing & Security:** JUnit, Mockito, Selenium, JWT, OAuth2
- Tools & Collaboration:** Jira, Confluence
- AI & Emerging Technologies:** Machine Learning (ML), Artificial Intelligence (AI), LLMs
- Operating Systems & Methods:** Linux, Agile (Scrum), SDLC

EDUCATION

University of South Florida, USA - Master of Science in Computer Science

Aug 2023 – May 2025
