

ANUJA P KOTKAR

anujakotkar39@gmail.com | San Jose, CA | (214)-537-3372 | [LinkedIn Profile](#)

SUMMARY:

- Experienced Software Engineer with 8+ years of hands-on experience building scalable backend systems, RESTful APIs, and cloud-native integration solutions using Java, Spring Boot, and AWS.
- Strong foundation in Data Structures and Algorithms (DSA), database design (MySQL), and scripting (Shell, Python).
- Proven expertise in enterprise integration using MuleSoft, TIBCO, and IBM DataPower, with a growing focus on full-cycle software engineering, CI/CD automation, and secure system design.
- Adept at working in agile teams, mentoring developers, and delivering high-impact solutions across cloud, mobile, and on-premises platforms.

TECHNICAL SKILLS:

- **Programming languages:** Java, Python, Shell Scripting, SQL, XML, XSLT, XQuery.
- **Frameworks/ Technologies:** Spring Boot, REST APIs, Microservices, MuleSoft, TIBCO, IBM DataPower, EDI
- **Cloud & DevOps:** AWS (EC2, IAM, S3, RDS), Azure Fundamentals, DevOps, Jenkins, Docker, Kubernetes, Git, Bitbucket, GitHub, CI/CD pipeline
- **Tools & Platforms:** SOAP UI, Postman, Confluence, JIRA, Veracity, Splunk.
- **Other:** DSA, Agile/Scrum, KANBAN

EXPERIENCE:

Software Engineer (Integration), IBM

Oct 2020 – Present

- Designed and implemented RESTful APIs and microservices using Java and Spring Boot for internal tools and client-facing systems.
- Led AWS-based deployment of applications and services using EC2, RDS, IAM and monitoring tools like Splunk.
- Worked on REST and SOAP API Development with Integration team and coordinated with clients and end-users for the new requirements and understand the project needs. Deliver solutions to ensure the integrated system met Business needs.
- Built scalable integrations with MuleSoft Anypoint Platform, Mule ESB, and CloudHub for Salesforce and mobile apps.
- Applied DSA and Java OOP concepts to optimize business logic, improving runtime performance by 30% in key services.
- Provided technical guidance and mentorship to junior developers, promoting best practices in code quality, version control, and testing.

Application Developer, IBM

May 2017 – Sep 2020

- Developed backend services and integrations for ERP, Salesforce, and internal systems using Java, TIBCO, and IBM DataPower.
- Implemented CI/CD pipelines using Jenkins, Docker, and Kubernetes to automate deployments across dev and staging environments.
- Optimized SQL queries and implemented ETL jobs to synchronize large-scale datasets across multiple platforms.
- Created a centralized API Gateway with custom routing, authentication, and load balancing features.

Associate System Engineer, IBM

March 2016 – April 2017

- Contributed to SOA-based projects and implemented secure API solutions using DataPower and shell scripts.
- Developed error-handling and failover mechanisms for high-availability systems.

Certification:

- MuleSoft Developer Certification – Level 1 (Certified Developer),
- AWS Cloud Practitioner,
- Azure Fundamentals Certification,
- Automation Pro I certification.

SELECTED PROJECT (WORK EXPERIENCE):

TMAX (Implemented REST services for Mobile App):

- Developed 29 REST endpoints in under 20 working days to support a mobile application integration using Java and Spring Boot.
- Used SQL and JDBC to connect and query MySQL databases, improving API performance by 30%.
- Integrated OAuth2 security and logging mechanisms for auditing.

User Sensitive data file removal using shell scripting:

- Built a shell script tool to identify and remove PII/SSN/PI from logs and app files, reducing manual auditing effort by 30%.

EDUCATION:

Bachelor of Engineering in Information Technology, University of Mumbai

June -2011 – May-2015
