Summary

Business Data Analyst with a business mindset, turning data into strategy, dashboards into action, and insights into measurable impact. Skilled in analytics storytelling, automation, and stakeholder collaboration.

WORK EXPERIENCE

Data Analyst

May 2022 – July 2023

Amdocs Inc.

Pune, India

- Developed and automated scalable data pipelines using **SQL** and **Python** to support sustainability analytics, reducing manual data prep time by 40%.
- Built and maintained ETL workflows that powered business-critical dashboards, cutting reporting latency by 30% and improving data availability across 5 departments.
- Partnered with engineering and business teams to implement data quality checks and metadata lineage tracking, resulting in a 20% improvement in reporting accuracy.
- Designed executive **Tableau** dashboards with KPI filters and drill-down features, boosting leadership decision-making speed by 25%.

Data Analyst

Nov 2020 – Apr 2022

Capgemini India Pvt Ltd

Pune, India

- Optimized complex **SQL** queries and restructured database schemas, reducing report generation time by 25% and improving system responsiveness.
- Developed advanced **Tableau** dashboards with calculated fields and real-time filters, increasing stakeholder engagement by 30%.
- Created and presented actionable insight reports to senior leadership, directly contributing to a 10% boost in operational planning accuracy.

Data Analyst Intern

Jan 2019 – Oct 2020

DLE India

Pune, India

- Maintained and queried HR databases using **SQL** and **Excel** to support workforce analytics, enabling HR to reduce recruitment cycle time by 12%.
- Performed data validation and communicated insights effectively to technical and non-technical stakeholders, improving data adoption across 3 departments.

PROJECT EXPERIENCE

Player Performance Analytics Dashboard – IPL Dataset

Jan 2025 – March 2025

San Jose, CA

Remote

- Designed an interactive **Tableau** dashboard to visualize IPL player metrics (runs, strike rate, economy, wickets), enabling better team strategy and player scouting.
- Conducted data wrangling and exploratory analysis on 1000+ match records using **Python** (Pandas, NumPy), identifying performance trends and impact players.
- Implemented dynamic filters by team and venue to enhance usability and insight accessibility for both technical and non-technical users.

EDUCATION

Master of Science, Applied Data Science

GPA - 3.6/4.0

San Jose State University, San Jose, CA

May 2025

SKILLS

- Data Analysis:** **SQL**, **Python** (Pandas, NumPy), Data Wrangling, Data Cleaning, EDA, Statistical Analysis, Regression, Hypothesis Testing
- BI & Visualization:** **Tableau** (LOD, Parameters, Calculated Fields), **Power BI**, **Looker**, KPI Design, A/B Testing, Insight Generation, Data Storytelling
- Data Engineering & Big Data:** ETL Pipelines, **Airflow**, **Spark**, **Hive**, **Hadoop**, Data Warehousing (Snowflake, Redshift), Data Integration
- Cloud Platforms:** **AWS** (S3, Redshift), **GCP**, **Azure**, Cloud Data Integration, CI/CD Concepts
- Tools & Process:** Git, JIRA, Agile, Business Process Mapping, Requirements Gathering, Documentation
- Soft Skills:** Stakeholder Communication, Cross-Functional Collaboration, Analytical Thinking, Problem Solving
