Summary:

Results-driven QA Engineer with vast experience in software testing and quality assurance. Expertise in manual and automated testing, test planning, and bug tracking. Adept at ensuring high-quality software delivery through meticulous attention to detail and comprehensive testing strategies.

Work Experience:

Sujimoto Group (Motopay), Sept 2023 - Present

Software QA Engineer,

- Conducted rigorous testing of mobile applications for Android and iOS platforms, resulting in a 20% increase in user engagement.
- Verified backend systems for scalability and performance improvements.
- Collaborated with cross-functional teams to ensure alignment of testing efforts with business objectives.
- Played a key role in testing a fintech product, including payment processing, security enhancements, and third-party services integration.

Mura, United State, Aug 2022 - Sept 2023

Software QA Engineer,

- Conducted comprehensive testing of RESTful APIs and backend services to ensure functionality and performance.
- Developed and executed test plans, test cases, and automated scripts
- Collaborated with development teams in identifying and resolving software defects.
- Contributed to agile development processes, including sprint planning and daily stand-ups.

AlgoStacks AI, Nov 2020 - Aug 2022

Software QA Engineer,

- Conducted testing for AI-driven applications, ensuring accuracy and reliability of machine learning models.

- Developed automated test scripts using Python and Selenium, improving testing efficiency for AI solutions.
- Collaborated with data scientists to verify data quality and integrity, ensuring robust AI model training.
- Implemented performance testing to evaluate AI system scalability and responsiveness under various conditions.
- Documented test results and provided detailed reports to stakeholders, enhancing transparency and informed decision-making.

Skills

- **Testing Tools:** Selenium, JMeter, Cypress, Playwright, Rest Assured, Postman, JUnit, TestNG, QTP, LoadRunner
- **Programming Languages:** Java, Python, SQL
- **Bug Tracking:** JIRA, Trello, Bugzilla
- **Test Management:** TestRail, HP ALM
- **Methodologies:** Agile, Scrum, Waterfall
- **Operating Systems:** Windows, Linux, MacOS
- **Soft Skills:** Problem-solving, Analytical thinking, Communication, Team Collaboration

Projects

- **Mobile Banking App:** Developed automated test suites for a mobile banking application, resulting in a 50% reduction in release cycles.
- **E-commerce Platform Testing:** Led the QA efforts for an e-commerce platform, ensuring a seamless user experience through comprehensive functional and regression testing.
- **Social Media App:** Spearheaded the QA process for a social media application, focusing on usability, security, and performance testing. Implemented automated testing solutions which reduced the overall testing time by 30%.

Collaborated closely with developers to resolve issues quickly, resulting in a smoother and more efficient release cycle.

- **Chatbot Development:** Worked on the QA team for an AI-powered chatbot, focusing on natural language processing (NLP) and machine learning (ML) model accuracy. Developed automated tests to validate conversation flows and improve user interactions.
- **Recommendation System:** Conducted testing for an AI-based recommendation system used in e-commerce platforms. Ensured the accuracy and relevance of product suggestions through rigorous testing of algorithms and data quality checks.

Education:

- University of Lagos, Bachelor's Degree in Mathematics and Statistics - 2019
- ALX Africa Certified Software Engineer, 2023
- MBA, Tekedia Institute, United Kingdom, 2021
