

Chidvitha Yenumula Data Analyst

chidvitha@careerwebmail.com | 6026575435 | Tempe, AZ | LinkedIn

Summary

Analytical Data Analyst and Data Engineer with approximately 3 years of experience leveraging Python, R, and SQL to drive data-driven decisions. Expertise in data visualization, statistical analysis, and ETL processes, with a proven track record of optimizing data workflows and delivering actionable insights. Strong communicator skilled in translating complex data into clear recommendations for stakeholders and experienced in collaborating with cross-functional teams to enhance data infrastructure and project outcomes.

Technical Skills

- **Programming Languages:** Python, SQL, R, NoSQL, Shell
- **Frameworks & Tools:** NumPy, Pandas, Matplotlib, Flask, Django, Git, GitHub, Docker, CI/CD, Statistics, HTML, CSS, Agile, SAS, Hadoop, PySpark, ggplot2, Snowflake, Azure Cloud, AWS Cloud, Apache Airflow, Apache Kafka
- **Databases:** MS-SQL, MySQL, Redshift, Snowflake, Big Query, PostgreSQL, MongoDB, Spark SQL, Oracle
- **Data Analysis / ETL:** Power BI, Tableau, Sterling Integrator, Data Bricks, MS Excel, Google Analytics, Machine Learning, Data Modeling, Data Mapping, Data Mining, Data Extraction, Transformation, Informatica

Professional Experience

Data Engineer, *Kickstarter*

08/2023 – 05/2024 | Remote, USA

- Developed and implemented ETL workflows to extract, transform, and load data from diverse sources, streamlining the integration process and reducing data preparation time by 40%, ensuring timely availability of high-quality sales data.
- Utilized AWS cloud services to build scalable and efficient data storage solutions, improving data access speeds and reducing operational costs by 30%, supporting long-term data management and analysis needs.
- Applied advanced data modeling techniques to forecast sales trends, enhancing the accuracy of predictive models by 15%, which facilitated better inventory management and resource planning.
- Created Python scripts to automate routine data extraction and reporting tasks, cutting processing time by 50%, and freeing up resources for more strategic analytical activities.
- Implemented data visualization solutions using Tableau and Power BI, which improved the efficiency of sales performance reporting by 25%, enabling faster and more informed decision-making for stakeholders.
- Performed in-depth data analysis to identify underperforming areas and optimize data workflows, resulting in targeted improvements and a 22% increase in sales in previously underperforming regions, boosting overall revenue.

Data Analyst, *Cognizant Technology Solutions*

08/2020 – 07/2022 | Bangalore, India

- Designed and implemented a robust ETL pipeline for the Healthcare Patient Segmentation and Predictive Analysis project using Python and SQL, integrating data from various healthcare sources and processing over 50,000 patient records daily, reducing data retrieval times by 40%.
- Developed and optimized data storage solutions with AWS Redshift, automating data ingestion and transformation processes, which cut data processing time by 50% and improved system performance for patient data management.
- Applied advanced data preprocessing techniques in Python with Pandas to clean and prepare healthcare datasets, ensuring high-quality data for analysis and increasing overall data accuracy by 35%.
- Built a patient segmentation model using Scikit-Learn, classifying over 200,000 patients into distinct health risk categories with 85% accuracy, enabling targeted healthcare interventions and improving patient care.
- Utilized time series forecasting methods to predict patient admission trends, achieving a forecast accuracy of 92%, which facilitated better resource allocation and improved hospital bed management.
- Developed interactive dashboards in Tableau to visualize key healthcare metrics such as patient outcomes and resource utilization, providing actionable insights that led to a 15% increase in operational efficiency.
- Conducted detailed statistical analysis to identify key factors influencing patient behavior and treatment outcomes, offering data-driven recommendations that boosted patient retention rates by 20%.

Education

Arizona State University

Master of Science in Computer Science

08/2022 - 05/2024 | Tempe, AZ

Shanmugha Arts, Science, Technology and Research Aca.

Bachelor of Engineer in Electronics and Communication Engineering

07/2017 - 05/2021 | Thanjavur, India
