

CHINNI KRISHNA SEERAPU

Full Stack Developer

Location: Dayton, Ohio | Phone: +1 (937)321-2565 | [Linkedin](#) | Email: seerapuchinnikrishna@gmail.com

SUMMARY

- Full Stack Developer with 4+ years of experience building scalable web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Hands-on expertise in both frontend (React.js, Next.js, Redux, Tailwind) and backend (Node.js, Express.js, REST/GraphQL APIs, WebSockets) technologies.
- Proficient in deploying and managing cloud-native applications on AWS (S3, EC2, Lambda), Heroku, Firebase, and Vercel with Docker and Kubernetes.
- Integrated LLM-powered AI solutions (OpenAI GPT-4, Hugging Face) for building intelligent chat assistants and recommendation engines.
- Experienced in building real-time systems using WebSockets, Redis caching, and Kafka for high-throughput data flows.
- Developed secure authentication flows using JWT and OAuth2, with robust role-based access control and API protection.
- Skilled in CI/CD pipeline automation using GitHub Actions, Jenkins, and SonarQube, reducing deployment times and ensuring code quality.
- Strong collaborator in Agile teams (Scrum/Kanban), delivering impactful features through active sprint participation, code reviews, and iterative development.

SKILLS

- **Programming Languages:** JavaScript, TypeScript, SQL, Python
- **Front-End Technologies:** React.js, Redux, Next.js, JavaScript (ES6+), TypeScript, Material-UI, Bootstrap, Tailwind CSS, HTML5, CSS3, Webpack
- **Back-End Technologies:** Node.js, Express.js, RESTful APIs, GraphQL, WebSockets, JWT Authentication, OAuth, Microservices
- **Databases:** MongoDB (Mongoose), MySQL, PostgreSQL
- **Cloud & Deployment:** AWS (S3, Lambda, EC2, Elastic Beanstalk), Heroku, Vercel, Firebase, Docker, Kubernetes
- **CI/CD & Tools:** Git, GitHub, Bitbucket, Jenkins, GitHub Actions, SonarQube
- **Web Services:** RESTful APIs, GraphQL, Swagger, Postman
- **Machine Learning s AI:** Scikit-learn, TensorFlow, PyTorch, NLP (spaCy, Hugging Face), LLM
- **Testing Tools:** Jest, Mocha, Chai, React Testing Library
- **Other Technologies:** Kafka, RabbitMQ, Serverless Functions, Redis, Stripe API (Payments), WebSocket, Socket.IO
- **Operating Systems:** Windows, Linux, macOS
- **Methodologies:** Agile (Scrum, Kanban), SDLC
- **IDEs:** Visual Studio Code, IntelliJ IDEA, Eclipse

WORK EXPERIENCE

DXC Technologies

Feb 2025 – Present

Full Stack Developer

- Developed the IoT-Based Smart Warehouse Management System, integrating IoT sensors with AWS IoT Core to enable real-time inventory tracking, reducing stock discrepancies by 30%.
- Engineered a React.js dashboard with interactive charts and WebSocket-based updates, allowing warehouse managers to monitor stock movement seamlessly.
- Built a RESTful API in Node.js to process live sensor data, storing structured inventory insights in MongoDB for efficient data retrieval and analysis.

DXC Technologies

July 2024 – Dec 2024

Full Stack Developer - Internship

- Developed a real-time AI-powered Helpdesk Assistant using React.js, Node.js, and OpenAI's GPT-4 API, enabling employees to resolve IT support queries instantly through natural language interactions.
- Integrated WebSocket-based live chat functionality to deliver streaming LLM responses, enhancing user experience and reducing resolution time by 40%.
- Engineered secure RESTful APIs and middleware to proxy LLM requests via AWS Lambda, with JWT authentication and role-based access control.
- Implemented Redis caching for frequently asked questions and fine-tuned knowledge retrieval using embedding-based search from internal documentation.
- Built an admin dashboard with analytics and ticket insights, increasing helpdesk automation coverage and improving operational visibility for IT teams.

Infosys

July 2020 – Dec 2022

Full Stack Developer

- Spearheaded the Smart Supply Chain Automation platform, leveraging React.js, Node.js, and MongoDB to enhance inventory management and automate workflows.
- Integrated IoT sensors with AWS IoT Core, enabling real-time tracking and streamlining data ingestion into DynamoDB, reducing manual data entry by 40%.
- Architected RESTful APIs using Node.js and Express.js, ensuring seamless communication between services and reducing integration

issues by 35%.

- Optimized MongoDB and Redis for real-time data storage and caching, improving API response times by 60% during peak operational hours.
- Designed a React.js dashboard with Material-UI, delivering actionable insights into inventory, shipping status, and operational KPIs.
- Strengthened system scalability through microservices architecture, enabling independent deployment and efficient scaling of services.
- Collaborated with cross-functional teams to deploy automated alerts and notifications, enabling proactive intervention and reducing supply chain incidents by 25%.
- Contributed to Agile processes including sprint planning, daily stand-ups, and retrospectives, ensuring on-time delivery and continuous feature improvement.

Trigent

Feb 2019 – May 2020

Full Stack Developer

- Developed and maintained the Automated Document Processing System, leveraging the MERN stack (MongoDB, Express.js, React.js, Node.js) to automate document scanning, OCR processing, and categorization for the legal and financial sectors, resulting in a 60% reduction in manual processing time.
- Integrated RESTful APIs with Node.js to facilitate seamless communication between OCR services, MongoDB for document storage, and the front-end interface, achieving a 99.5% API reliability rate across production use.
- Built dynamic React.js components for users to upload, view, and manage processed documents, with real-time updates and search latency reduced by 40% through Elasticsearch integration.
- Utilized Redis for caching frequently accessed documents, reducing system load and boosting document retrieval speed by 45% during peak usage.
- Designed and optimized database schema in MongoDB to store document metadata and OCR-extracted text, supporting scalability to over 1 million records without performance degradation.
- Worked closely with the DevOps team to deploy the system on AWS, enhancing cloud resource efficiency and automating integration workflows using Jenkins, resulting in 30% faster deployment cycles.
- Developed role-based authentication using JWT for secure document access and ensured compliance with data privacy regulations such as GDPR and HIPAA, supporting audits with zero non-conformities.
- Participated in Agile sprints, actively contributing to daily stand-ups, sprint planning, and retrospectives, helping the team deliver 95% of sprint goals on time over 8 release cycles.

PROJECTS

Smart Inventory Management System

- Developed a real-time inventory tracking system with React.js for the front end, ensuring seamless updates and notifications for stock levels and orders.
- Implemented a serverless backend using AWS Lambda and Redis for efficient data caching and enhanced scalability under high traffic.

Multi-User Task Management System

- Built a multi-user task management system with React.js and Redux for state management, providing a responsive and scalable user interface for task assignments and progress tracking.
- Secured user sessions and roles with JWT authentication, while utilizing PostgreSQL to manage relational data efficiently across users and tasks.

EDUCATION

Masters in computer science

University of Dayton, Dayton, Ohio

Graduation in Computer Science

ICFAI Foundation for Higher Education, Hyderabad, Telangana
