

Dhanusha Vadamala Nomeswaran

DevOps/SRE Engineer | dhanushabhla123@gmail.com | +1(469) 353-9611 | [linkedin](#)

Summary

DevOps/Site Reliability Engineer with 5+ years of experience deploying scalable infrastructure across **AWS, Azure, and GCP**. Skilled in automating deployments with **Terraform, Ansible, and CI/CD pipelines** using **Jenkins, GitHub Actions, and GitLab CI**. Expert in container orchestration with **Docker and Kubernetes (EKS, AKS, GKE)**, and experienced with observability tools like **Prometheus, Grafana, and ELK**. Proficient in hosting applications on **Tomcat and NGINX**, implementing secure access via **SSL/TLS**, and managing **cloud identity** with **IAM, Azure AD, and GCP IAM**. Improved deployment velocity **by 60%**, system uptime **by 99.99%**, and troubleshooting efficiency **by 45%**.

Skills

- Cloud Platforms:** AWS (EC2, S3, RDS, VPC, EKS, IAM), GCP, Azure
- Infrastructure as Code (IaC):** Terraform, AWS CloudFormation
- Containers & Orchestration:** Docker, Kubernetes, Helm
- CI/CD & DevOps Tools:** Jenkins, GitHub Actions, GitLab CI, CircleCI, Maven
- Monitoring & Logging:** Prometheus, Grafana, ELK Stack, DataDog, CloudWatch
- Web & App Servers:** NGINX, Apache Tomcat
- Version Control:** Git, GitHub, Bitbucket
- Configuration Management:** Ansible, Chef, Puppet
- Security & Networking:** SSL/TLS, IAM, Security Groups, HashiCorp Vault
- Scripting & Automation:** Bash, Shell, Python, Groovy
- Databases:** PostgreSQL, MySQL, MongoDB, Amazon RDS
- Others:** ArgoCD, Spinnaker, ServiceNow, Jira, Confluence

Education

- MIS Management Information Systems from Lamar University, Beaumont, Texas

Professional Experience

DevOps/SRE Engineer | Amazon | May 2024 - Current

- Automated deployment of infrastructure using **Terraform** and **Ansible**, reducing manual efforts **by 60%**.
- Built and maintained **EKS clusters** with **Helm** for scalable **microservices** deployment.
- Designed and implemented secure **VPC** configurations with **subnets, route tables, NAT gateways**, and **security groups**.
- Managed **Amazon RDS** instances including performance **tuning, backup automation**, and **snapshot** management.
- Developed **CI/CD pipelines** using **GitHub Actions, Jenkins, and Maven** to streamline application deployments.
- Deployed **Java-based** services on **Tomcat servers** with **NGINX** as reverse **proxy** and **SSL** termination.
- Integrated **Prometheus** and **Grafana** for monitoring over **200+ microservices** with **proactive** alerting.
- Reduced mean time to detect (**MTTD**) and recover (**MTTR**) **by 30%** through alerting **workflows** and **dashboards**.
- Implemented **IAM** policies and **Secrets Manager** for **secure** credential handling.
- Managed **S3 storage** lifecycle **policies** and **encryption** settings for compliance.

DevOps/SRE Engineer | Oracle | Nov 2020 - Dec 2022

- Deployed and maintained production-grade **Kubernetes clusters** on **Azure AKS**, supporting CI-integrated blue-green deployments.
- Developed over **80+ reusable Ansible playbooks** for automated **server patching** and **configuration** across **Azure Linux VMs**.
- Built **CI/CD pipelines** using **Azure DevOps, Jenkins, and Maven** for **Java applications**, reducing deployment time **by 50%**.
- Designed multi-region **VNet architectures** to support high availability and disaster recovery.
- Hosted applications on **Apache Tomcat** behind **NGINX** reverse proxy with **SSL/TLS** offloading.
- Managed **Azure SQL databases**, implementing automated backup and failover policies.
- Monitored infrastructure using **Azure Monitor, Grafana, and custom Prometheus** exporters.
- Centralized application logs via **ELK stack (Elasticsearch, Logstash, Kibana)**, improving incident resolution **by 45%**.
- Managed **Azure AD roles**, service principals, and **RBAC** policies for secure access control.
- Automated **SSL certificate** provisioning and renewal using **Let's Encrypt** and **Key Vault** integration.

DevOps Engineer | DataDog | Sep 2019 - Oct 2020

- Containerized monolithic applications using **Docker** and **deployed** them to **GKE (Google Kubernetes Engine)** clusters.
- Provisioned cloud infrastructure using **Terraform** to **automate GCP IAM, networking**, and compute resources.
- Built and managed **CI/CD pipelines** using **GitLab CI, Jenkins, and Maven**, streamlining builds and deployments.
- Deployed and maintained **Java-based** applications on **Tomcat**, exposed securely through **NGINX** with **SSL**.
- Implemented monitoring and alerts using **DataDog, Stackdriver, Prometheus, and Grafana**.
- Centralized **GCP logs** using **ELK stack**, enabling fast **root cause analysis** for over **100+ microservices**.
- Enforced **GCP IAM policies** and **service accounts** for environment-specific access controls.
- Automated **database snapshotting, failover testing, and disaster recovery** workflows for **Cloud SQL**.
- Developed **Bash** and **Ansible scripts** to automate provisioning, deployments, and environment setup.
- Achieved and maintained **99.99%** uptime by resolving performance bottlenecks and implementing auto-healing policies.
