

Seshu Varma Dantuluri Software Engineer

Sunnyvale, CA | seshudantuluri598@gmail.com | 510 722-5449 | <https://www.linkedin.com/in/seshud/>

Summary

Professional developer with **4 years** of expertise in developing, coding, and deploying powerful systems using **Java** and **J2EE** stack. Experience with **Microservices Architecture** and **API-Driven** Approaches, as well as Frameworks like **Spring**, **Spring boot**, **Hibernate**, and **Struts**. Proficient in creating responsive **web designs** and **N-tier** architecture applications with **Java Design Patterns** and **UML**. Exceptional programming skills in **HTML**, **CSS**, and **JavaScript** as well as considerable experience with **object-oriented** analysis and design across many **SDLC** models.

Skilled in **API** and **Microservices** programming, **SQL database design**, and **cross-browser interoperability**. Comfortable working on both **SQL** and **NoSQL** databases including **MySQL**, **SQL Server**, **MongoDB**, **DynamoDB**, etc. Also good with unit testing using tools like **JUnit**, **Mockito**, **Karma/Jasmine**, and **Selenium**, as well as building technologies like **ANT** and **Maven**. Proven expertise with **SDLC** and **agile** development, **Test Driven Development**, and **Scrum** techniques.

Successfully provided production support, quickly addressing important application issues and working well with cross-functional teams.

Skills

Languages:	Java, Core Java, JavaScript, and SQL
Web Technologies:	HTML, CSS, Tailwind CSS, Bootstrap, JavaScript, Angular.js, React.js, Node.js, jQuery, and UI/UX
Frameworks:	Spring, Spring boot, Hibernate, and Struts
Databases:	MySQL, SQL Server, MongoDB, and Dynamo DB
Cloud Environments:	AWS (S3, R53, Lambda, IAM, CloudFront, CloudWatch, etc.)
Others:	Salesforce, Data Loader, RESTful APIs, SOAP APIs, IDEs, and MS Office suite
Tools:	GitHub/Git, Jira, Jenkins, Maven, Docker, Kubernetes, and ChatGPT
Methodologies:	SDLC, Agile, Scrum, Waterfall, TDD, and BDD
Operating Systems:	Windows, Mac OS, and Linux

Experience

Intuit Inc., California

Jun 2023 –

Present

Software Engineer

- Contributed to the Commerce team at Intuit, working on projects related to e-commerce and payment processing.
- Developed a Spring Boot application and worked on CI/CD Jenkins pipelines to deploy the application to downstream pre-production and product environments, ensuring timely and efficient delivery of high-quality code.
- Integrated the application with AWS S3 for data storage and retrieval, configured SFTP, and set policies for the S3 bucket to ensure secure data transfer and storage.
- Used MySQL database for SQL, PL/SQL scripts, stored procedures, functions, and triggers.
- Built RESTful APIs from scratch and integrated with third-party services, ensuring exceptional handling and writing unit tests using Mockito.
- Created reporting and dashboards in Splunk to monitor application performance and troubleshoot issues.
- Integrated microservices using Spring Boot, improving application scalability and performance.
- Utilized Postman to test and validate API endpoints, ensuring high-quality code delivery.
- Created new modules, modified existing functionalities, maintained websites and performed troubleshooting for the reported issues.
- Extensively worked on server side/backend for all the tasks.
- Created and consumed Spring Restful Web Services.
- Collaborated with cross-functional teams in an agile environment to ensure timely project delivery and effective communication of technical requirements.
- Worked on High-level and low-level system design, planning, and implementation.

PNC Financial Services, California
2023

Feb 2023 – May

Java Developer

- Involved in Requirements gathering, Analysis, Design, Development, and Testing of the application using AGILE methodology (SCRUM).
- Used Spring Core annotations for Spring Dependency Injection, Spring MVC for Rest API, and Spring Boot.
- Migrated the Project to Spring Boot from Spring MVC.
- Designed and developed database objects like Tables, Views, Stored Procedures, and User Functions using PL/SQL, and SQL Developer and used them in WEB components.
- Designed and developed web interfaces and business logic using Spring, JSP, Servlets, JavaBeans, Spring JDBC, Java Script, HTML, and XML Technologies.
- Worked on AWS Cloud technologies and worked on Server Side.
- Continuous delivery pipeline from code commit to production deployment with all necessary information around health and quality of the software with DevOps.
- Closely worked with agile development team to develop, test and maintain Web- and desktop-based software applications.
- Installing, configuring and maintaining Continuous Integration, Automation and Configuration Management tools
- Develop custom solutions that act upon Jenkins information in real time
- Adhered to high-quality development standards while delivering solutions on time.
- Worked with Amazon WEB Services (AWS) – S3 Buckets to store large image data.
- Worked on the REST/Web API to create the services and tested them on Postman.
- Used GIT for version control.
- Built MAVEN scripts for automated deployment and for the build operation of the entire application.

ABSYZ Inc., Hyderabad, India
2021

Nov 2018 – Jan

Software Engineer

- Implemented App using agile methodology, daily SCRUM meeting to understand the status and resolve any issues.
- Utilized Amazon Web Services (AWS) EC2 to deploy Docker containers and S3 for the application storage.
- Involved in migrating monolithic applications in Micro Service Architecture and developed Microservices using the OpenShift platform built upon Spring Boot Services.
- Used a responsive web design approach for crafting sites to provide an optimal viewing and interaction experience.
- Worked in a CI/CD environment with Jenkins, Maven, Ansible, docker, and AWS.
- Defined collections to store data in MongoDB.
- Developed React JS pages, Web services calls, and AJAX calls for the applications.
- Experienced with spring framework applications like Spring Core, Spring AOP, Spring MVC, Spring Batch, Spring Security, and Spring Boot and integration of microservices into the existing system architecture.
- Worked with Spring MVC and Hibernate in the backend to build the business logic.
- Configured & managed project dependencies using Maven, ensuring efficient build processes & streamlined project management.
- Used GitHub as a Version Control tool, JIRA for issue tracking (production issues at time), Eclipse, IntelliJ, VS code as IDE.
- Experience in cloud services using Amazon Web Services (AWS) and Google Cloud Platform (GCP).
- Developed Spring MVC to implement administration management control layer.
- Demonstrated strong problem-solving skills, identifying and resolving complex technical issues promptly.

ABSYZ Inc., Hyderabad, India
2018

May 2018 – Nov

Intern

- Learned Django framework and React JS technologies with strong fundamentals and industry standards.
- Written APIs to add, delete, and edit properties, and customer data.
- Created a private cloud using Kubernetes that supports DEV, TEST, and PROD environments.
- Developed the scripts to test the application's performance and scalability by generating huge data and simulating multiple users at a time. Identified 16 bugs and 7 performance improvements.
- Hand-on experience in Test Driven Development (TDD) by using unit testing frameworks like JUnit and Mockito

Education

California State University, CA; *M.S. in Computer Science* | Dec 2022

GITAM Deemed University, IND; *B.Tech. in Computer Science and Technology* | Apr 2018
