Summary

Business Analyst professional with over 3 years of experience in process analysis and data management, and an expert in Python and SQL. My key achievements include developing end-to-end automated data pipelines that reduced manual data processing time by 60% and building interactive Tableau dashboards that improved executive decision-making speed by 35%. Seeking a Business Analyst position at Centene corp., where I bring my process analysis and data management skills to support your mission of Bytecraft System.

Experience

Centene Corporation

Business Analyst

TX, USA

01/2024 - Present

- Assist in gathering, analyzing, designing, developing, and testing application requirements using the Agile methodology.
- Developed end-to-end automated data pipelines using Python and SQL, reducing manual data processing time by 60%, ensuring real-time, accurate insights for business stakeholders, and enhancing data reliability across projects.
- Built and maintained interactive Tableau dashboards that provided real-time tracking of key performance indicators (KPIs), improving executive decision-making speed by 35% and boosting stakeholder engagement with accessible, on-demand data insights.
- Utilized Python to automate analysis of business processes, identifying inefficiencies that resulted in a 20% reduction in project cycle time and streamlined operations across departments.
- Extracted data from existing data sources and performed ad-hoc queries by using SQL, PL/SQL and MS Access.
- Executed complex SQL queries and performed data mapping in MS Excel, increasing data accuracy by 30% and reducing data processing time by 25%, which improved reporting efficiency across projects.
- Conducted comprehensive GAP and risk analyzes to identify process bottlenecks and develop actionable recommendations, resulting in a 25% improvement in resource allocation and minimizing project risks.

Bytecraft System

Jr. Business Analyst

Hyderabad, India

08/2020 - 12/2022

- 10+ Business Requirements Documents (BRDs) and Functional Requirements Documents (FRDs) were developed in close collaboration with business stakeholders and senior analysts, resulting in a 15% reduction in rework through accurate requirement capture.
- Regular meetings were conducted with stakeholders to gather requirements and provide progress updates, build strong relationships and ensuring alignment on project goals and deliverables.
- Interactive dashboards and visual reports were created using Tableau and Power BI, offering stakeholders real-time insights into project KPIs and performance metrics, which improved decision-making speed by 30%.
- GAP analyses were performed on core business processes, enabling the identification of improvement areas that led to a 10% increase in operational efficiency and directly addressed stakeholder pain points.
- SQL was used for data wrangling and preparation to streamline datasets for analysis, reducing data processing time by 20% and delivering cleaner, more actionable data insights to stakeholders.
- Sprint Planning, Sprint Review, and Retrospective meetings were facilitated within the Agile framework to maintain clear communication, enabling timely feedback from business stakeholders and supporting adaptive project management.
- Detailed process flow diagrams and system models were created in Microsoft Visio and Lucidchart, enhancing stakeholder understanding of complex systems and contributing to smoother project transitions.
- Comprehensive project documentation was developed and maintained in Confluence, ensuring that all project stakeholders had consistent and easy access to the latest information, reducing documentation retrieval time by 25%.
