

GHANNESH PERICHERLA

New York, USA | (202) 695-9501 | pericherla.ghannesh8@gmail.com | [linkedin.com/ghannesh-pericherla](https://www.linkedin.com/ghannesh-pericherla)

Education

New Jersey Institute of Technology

Master of Science in Computer Science - GPA 3.75/4.00

Sep 2023 – May 2025

Newark, New Jersey

National Institute of Technology, Meghalaya

Bachelor of Technology in Computer Science and Engineering - GPA 9.40/10.00

Aug 2018 – May 2022

Shillong, India

Technical Skills

Languages: Python, C, C++, SQL, HTML/CSS, JavaScript, Java

Developer Tools: VS Code, PyCharm, Jupiter, Eclipse, Colab

Technologies/Frameworks: Linux, Django, Jenkins, GitHub, Kubernetes, Docker, Selenium

Machine Learning Tools: Scikit-Learn, Tensorflow, Keras, PyTorch, Pandas, OpenCV

Other Tools: Postman, Confluence, JIRA, JSON, YAML, Oracle11g, MySQL

Experience

Gap Inc

Jun 2022 – Jun 2023

Software Engineer - Network Automation Engineer

Hyderabad, India

- Achieved a 50% reduction in script run-time by designing a Jenkins pipeline to retrieve CDP/LLDP details from network devices across all Gap and affiliated stores, resulting in substantial time savings for the operations team.
- Streamlined device configuration by engineering a Jenkins pipeline, reducing setup time by 58%, and eliminating manual adjustments in the vendor's UI, enhancing efficiency and accuracy across devices.
- Empowered the Network Operations team by developing a full-stack application with Python and Django along with SQL-based dashboards, streamlining IP address management and resulting in a 41% increase in operational efficiency.
- Initiated the Network Self-Healing project by creating sample actions, rules, and triggers with StackStorm, Python, and YAML, leading to a 30% reduction in manual interventions, and a 20% decrease in network downtime.

Avishkar Tech Solution

Oct 2020 – Mar 2021

Data Science Intern

Hyderabad, India

- Trained an air quality detection system using supervised machine learning algorithms, achieving 90% accuracy in pollution level predictions, which is helpful environmental monitoring and public health awareness.
- Created a sales prediction model for Big Mart using RandomForestRegressor, achieving a 20% improvement in forecast accuracy, which optimized inventory management and boosted sales forecasting efficiency.
- Prepared a fake news detection system with a Naive-Bayes model, reaching 75% accuracy in identifying misleading information, which enhanced content reliability and user trust in news sources.
- Performed video game data analysis and created visualizations, uncovering key player behavior trends that increased engagement insights by 30% and informed game development strategies.

Projects

Automated Job Application | Selenium, Python

Jul 2024

- Automated the job application process for NJIT on-campus jobs using Python and Selenium, reducing application run-time by 70%, which enables students to apply for multiple positions with a single click.
- Developed and deployed a custom script that navigates the NJIT job portal, fills out applications, and submits the applications, saving over 2 hours per cycle.

ChatBot | Pytorch, Python

May 2024

- Designed a basic chatbot using PyTorch, enhancing understanding of NLP and machine learning.
- Performed data preprocessing tasks such as tokenization and vectorization, increasing the chatbot's accuracy by 30%.
- Implemented a neural network for text classification and response generation, which enhanced the chatbot's response generation by 25%.

Biomarker Detection of various kinds of Cancer | Python, Jupyter

May 2022

- Trained a Multi-Layer Perceptron and extracted key features by backtracking neuron weights, enabling the prediction of Overall Survival, Progression-Free Interval (PFI), and Disease-Free Interval (DFI), which improved predictive accuracy by 8%.

Certificates and Extra-Curricular

- MTA: Python Certificate - <https://www.credly.com/badges>
- Won the GAP Open Challenge at Hackathon 2023, demonstrating exceptional curiosity, audacity, and innovation.
- Guided high school students at an orphanage through personalized math tutoring, improving academic performance.
- Conducted Robodiction event, a main attraction of technical fest of NIT Meghalaya, COGNITIA of Oct 2019.
