

Jahnavi Bindela

Business Analyst

Dallas, TX | 469-880-8345 | jahnavi.b@mymailworks.com

SUMMARY

- Business Analyst with Around 4 years of experience in aligning business goals with technical solutions, ensuring seamless communication between stakeholders and development teams.
- Proficient in Software Development Life Cycle (SDLC) and adept in methodologies like Waterfall and Agile/Scrum, ensuring projects are delivered on time and aligned with business objectives.
- Skilled in comprehensive project documentation, including Business Requirements Documents (BRDs), Functional Requirements Documents (FRDs), and Use Case Specifications, ensuring clear and actionable technical direction.
- Expert in process modeling and gap analysis, capable of creating As-Is and To-Be process models and conducting thorough Gap, Feasibility, SWOT, Impact Analysis, and Value Stream Mapping to identify opportunities for improvement and assess risks.
- Proficient in data analysis and business intelligence, using tools like Tableau, Power BI, and Excel to generate insightful reports and dashboards that support informed business decision-making.
- Strong facilitator of Joint Application Development (JAD) sessions, adept at collaborating with Subject Matter Experts (SMEs) to gather, analyze, and document functional requirements, aligning technical deliverables with high-level business needs.

SKILLS

Methodologies: SDLC, Agile/Scrum, Waterfall

Languages: SQL, Python

Documentation: FRD, BRD, SRS

Project Management Tools: MS Project, MS SharePoint

Visualization Tools / Other Tools: Tableau, Power BI, Microsoft Excel, Figma, Roadmap

Analysis Skills: Cost/benefit analysis, Impact analysis, GAP analysis, Risk analysis, SWOT analysis

Tracking / Software / Other Skills: Jira, Microsoft Visio, JAD, Rational ClearQuest, RTM, UAT, Lucid chart, ETL Process, ELT Process, ERP Systems, Test Outlines & Test Cases, Use Cases & Use Case Mapping, Business Requirements, Microsoft Access, Confluence, Smartsheet, Data modeling, Google Analytics, ServiceNow, SaaS, prototypes, Salesforce, Data Visualization, Business Intelligence, Data Analytics

Soft Skills: Time management, Leadership and Management, Project Management, Product Management, Problem-Solving, Negotiation, decisionmaking, Documentation and Presentation, Customer Relationship Management (CRM), Verbal Communication

Operating System: Windows, Linux

WORK EXPERIENCE

Cognizant, USA | Business Analyst

June 2024 - Current

- Actively engaged in Agile ceremonies like sprint planning, daily stand-ups, and retrospectives to ensure seamless iterative development.
- Designed and deployed custom systems and automation solutions, leveraging Microsoft SharePoint and VBA scripting to streamline processes, reduce manual effort, and enhance operational efficiency across teams.
- Built dynamic dashboards and reports in Tableau, enabling real-time insights into key performance indicators (KPIs) and business metrics, empowering stakeholders to make informed, data-driven decisions.
- Conducted in-depth Gap Analysis to uncover inefficiencies in business processes and proposed strategic solutions to close performance gaps, driving continuous improvement.
- Led comprehensive functional testing efforts, ensuring software quality and performance by identifying, tracking, and resolving defects through Jira while collaborating with development teams on enhancements.
- Orchestrated Joint Application Development (JAD) sessions to capture detailed business requirements, translating stakeholder needs into clear technical documentation using Microsoft Visio and Confluence.

Ivview Labs Pvt Ltd, India | Business Analyst

June 2020 - July 2022

- Developed and optimized SQL queries for validating business rules and mapping data, reducing inconsistencies by 30% and improving integration across various financial and operational platforms.
- Built and maintained strong relationships with stakeholders by fostering open communication, actively listening, and consistently aligning solutions with their needs and expectations.
- Created and maintained project tracking plans using MS Project and MS Excel, enabling clear visibility into timelines, resource allocation, and project progress for financial and operational initiatives.
- Reduced operational costs by 15% by identifying inefficiencies in existing workflows and implementing process improvements.
- Published detailed reports and interactive Power BI dashboards, showcasing key financial and operational performance indicators and empowering stakeholders to make data-driven decisions aligned with the organization's financial goals.
- Conducted in-depth analyses, including SWOT, Cost-Benefit, Risk, and Impact Analyses, to assess financial project feasibility, mitigate risks, and ensure alignment with long-term business objectives.
- Leveraged stakeholder analysis techniques to identify key decision-makers and influencers, prioritizing project requirements based on their financial impact and organizational importance.

- Reduced defects in financial reporting by 25% through detailed functional testing and requirement traceability using HP Quality Center, achieving a 98% requirement fulfillment rate.
- Provided data-driven insights that contributed to a 10% revenue increase by streamlining budget allocation processes.
- Streamlined financial data migration processes, ensuring the seamless integration of financial systems during project rollouts, which improved financial reporting accuracy and reduced operational delays.

Nevina Infotech Pvt Ltd, India | Business Analyst

Jan 2019 - May 2020

- Effectively leveraged Waterfall methodologies to assist in planning and executing both business and software development initiatives, ensuring timely delivery and scope alignment.
- Developed comprehensive Business Requirements Documents (BRDs) and Functional Requirements Documents (FRDs), ensuring clarity and actionable steps for technical teams and stakeholders.
- Extensive experience in business requirements elicitation, process modeling, risk analysis, SWOT analysis, and the development of functional specifications, ensuring thorough understanding and documentation of business needs.
- Integrated data collection processes into Excel and Power BI, achieving a 20% improvement in data accuracy and efficiency, enabling more reliable insights and smoother data workflows.
- Devised a dynamic Requirement Traceability Matrix (RTM) using HP Quality Center, achieving an impressive 98% requirement fulfillment rate through meticulous tracking and quality assurance.
- Spearheaded the integration of ERP systems with external databases, reducing transaction errors by 20% and streamlining financial reconciliation processes.
- Managed client communications through CRM systems, tracking interactions, and providing comprehensive oversight of customer relationships.
- Produced meticulous project documentation, including requirements management plans, functional and supplemental requirements, test plans, and test cases, ensuring alignment between business needs and technical execution.

EDUCATION

Master in Business Analytics | The University of Texas at Dallas, Dallas, TX

Bachelor in Business Administration | ICFAI Business School, Hyderabad, India

PROJECTS

AI-Powered Solutions for Recruitment:

- Developed the "Job Seeker and HR Resume Analysis and Improvement Assistant", utilizing Natural Language Processing (NLP) and Google's GenerativeAI API to streamline the recruitment process for job seekers and HR professionals.
- Implemented features for analyzing resumes, matching them to job descriptions, and providing detailed feedback for improvement.
- Facilitated automation for keyword extraction, resume summarization, and job matching, significantly improving the efficiency and effectiveness of recruitment efforts.

Data Visualization for Insightful Analysis:

- Designed word cloud visualizations and charts to highlight key resume skills and experiences, helping job seekers and HR professionals identify important strengths and areas for improvement.
- Utilized Streamlit Framework to create a user-friendly interface for both job seekers and HR professionals, enabling easy resume uploads and visualized feedback.

Efficient Candidate Screening for HR Professionals:

- Developed a tool that allows HR professionals to upload job descriptions (JDs) and receive summaries of suitable resumes, ranked based on how well they match the JD requirements.
- Generated downloadable CSV files containing top-matching resumes, allowing HR professionals to quickly assess candidates.

Challenges & Solutions:

- Overcame challenges in model performance by fine-tuning AI models to ensure accurate keyword extraction and resume summarization.
- Tackled scalability issues by optimizing code for handling large volumes of resumes and job descriptions.
- Enhanced the user experience by iterating on the interface design based on user feedback.

Technical Tools & Methodologies:

- Leveraged advanced AI technologies such as Google's Gemini Pro (GenerativeAI API) and NLP techniques for resume analysis.
- Generated visual reports and CSV files to facilitate efficient decision-making for HR professionals.
