As a passionate full-stack engineer, I consistently deliver projects with speed, quality, and purpose. My ability to adapt quickly, communicate effectively, and contribute meaningfully will make me an excellent addition to your company.

Professional Experience

The News Movement | Full Stack Software Engineer

2023-2024

Stack: Python, Javascript, Typescript, React, Next.js, Vercel, Node.js, Express.js, PostgreSQL, Redis, OpenAI GPT & Whisper, Amazon Web Services, Google Cloud Platform, Terraform, Docker, Cloudflare, New Relic, Tailwind, Jest, Slack API, Reddit API, TikTok API

- ❖ Created a Slack-based social listening tool with AI sentiment analysis using the Reddit, TikTok, and GPT APIs. Put together a roadmap and pitched stakeholders. This has since become one of engineering's top projects.
- ❖ Scrum master, ran daily standups and weekly product demos. Onboarded and supported junior engineers.
- ❖ Migrated GitHub organizations and Slack workspaces with custom apps after The News Movement acquired The Recount.
- ❖ Main contributor for an audio transcription service using the Whisper API. Implemented usage monitoring with New Relic. Put together analyses for cost, quality, and competing services.
- ❖ Built a corporate site with Next.js. Implemented automated testing with GitHub Actions and Lighthouse.
- ❖ Worked on a custom CMS. Created RSS feeds for streaming content to Yahoo, Microsoft, and Video Elephant.

Hideaway | Mobile Software Engineer (Contract)

Stack: Javascript, Typescript, React Native, React, Node.js, Express.js, Expo, PostgreSQL, GraphQL, Google Cloud Platform, Firebase, Heroku, Docker, Foursquare Places API, Google Places API, Google Maps API, Mapbox, Yarn Workspace

Landis | Full Stack Software Engineer

2022-2023

Stack: Javascript, Typescript, React, Vue.js, Node.js, Express.js, PostgreSQL, GraphQL, Amazon Web Services, Stripe API, ArcGIS

- ❖ Overhauled a consumer-facing UI with an intuitive dashboard and integrated it with internal systems.
- ❖ Architected a full-service payment portal using the Stripe API to automate taking and managing down payments.
- ❖ Migrated and transformed 120k+ records across multiple tables to utilize ArcGIS for geospatial market data.
- ❖ Implemented testing for multiple features using Jest and Cucumber.

Satellite IM | Full Stack Software Engineer

2021-2022

Stack: Javascript, Typescript, Vue.js, Nuxt.js, Node.js, Express.js, Rust, Solana, IPFS, WebRTC, Web Audio

- ❖ Architected a voice and video chat system using Vue, WebRTC, and Web Audio.
- ❖ Implemented multiple chat features including emoji reactions, dropping in images, EXIF data stripping, intelligent link parsing, NSFW image checking, a global context-menu system, and mobile-friendly styling.

Technical Skills

Languages

JavaScript, TypeScript, Python, HTML, CSS (Sass, Less)

Front-end Frameworks

React (+Router), React Native, Next.js, Redux, Zustand, Vue.js, Vuex, Nuxt.js

Back-end & Runtimes

Express.js, Django, Electron, Capacitor

Databases

MongoDB, PostgreSQL, GraphQL, MariaDB, Redis, DBMate, PgPromise

Cloud, CI/CD, Packaging, Testing

GCP, AWS, Firebase, Vercel, Heroku, Expo, Terraform, Docker, GitHub Actions, Cloudflare, NGINX, Webpack, Babel, Jest, Cucumber, Puppeteer, Lighthouse

Analytics & Feature Management

New Relic, Datadog, FeatureHub, Google Tag Manager

Workflow

Jira, GitHub Projects, GitHub, GitLab, VS Code (+GitHub Copilot), XCode, Figma

Libraries & APIs

Google (Various), OpenAI GPT & Whisper, Auth0, Slack, Stripe, Reddit, TikTok, Adobe, BrightData, OxyLabs, FollowUpBoss, WebRTC, Web Audio, Web Sockets (Various)

Libraries (Design & Visualization)

Tailwind, Bootstrap, Material UI, WebGL, Three.js, D3.js

Libraries (Geospatial)

Google (Maps, Places, +2), Mapbox, ArcGIS, Turf, Foursquare, Leaflet

Education

Hack Reactor | Advanced Software Engineering Immersive

Oct 2020 - Mar 2021
