Education

Texas A&M University, College Station, Texas

August 2022 – May 2024

Master of Science – Major in Economics & Statistics (**GPA – 3.8/4**)

Indra Gandhi National University, India

August 2018 – October 2020

Masters of Arts – Major in Economics (**GPA – 3.75/4**)

St. Xavier's College, India

May 2015 – May 2018

Bachelor of Arts in Economics (**GPA – 3.9/4**)

Experience

Charles River Associates, College Station, TX

Data Analyst – Labor & Employment

January 2024 – Present

- Delivered \$43K in client savings by identifying payroll disparities through advanced regression analysis and statistical testing, demonstrating a strong ability to derive actionable insights from complex datasets.
- Enhanced hiring efficiency by 5% by developing a resume parsing tool using OpenAI API and deploying a front-end web app on Streamlit Cloud, showcasing technical proficiency and innovation.
- Conducted hiring data classification with 83% accuracy, uncovering systemic gender biases and driving data-driven decision-making.
- Leveraged STATA and advanced MS Excel functions to create client reports and forecast PAGA penalties, highlighting strong analytical and reporting skills.

Air Deccan, Gurugram, India

Data Analyst

October 2020 – July 2022

- Retained \$10K in revenue by deploying a churn prediction model with 97% recall and 94% accuracy using gradient boosting in Python, showcasing expertise in predictive analytics.
- Designed and implemented a dynamic Tableau dashboard, driving a 25% increase in proactive retention strategies and improving customer engagement.
- Executed data extraction and manipulation using SQL queries in Amazon Redshift, demonstrating proficiency in handling large datasets.

Reserve Bank of India, India

Data Analyst Intern

May 2019 – August 2019

- Contributed to the report titled "*Monetary Policy Operations*" by analyzing inflationary pressures and their impact on monetary policy, showcasing strong research and analytical skills.
- Utilized forecasting econometrics to extract insights from trends and graphs, demonstrating the ability to interpret and communicate complex data.

Skills

- Technical:** SQL, Python, R, Stata, SAS, MySQL, Power BI, JMP, Linux
- Visualization Tools:** Tableau, Matplotlib, Seaborn, MS Excel
- Analytical Models:** Linear Regression, Decision Tree & Random Forest, Clustering Algorithms, Anomaly Detection, Logistic Regression
- Coursework:** Database Design, Data Analytics, Statistics & Probability, Econometrics & Time Series

Projects

Impact of Children, Gender, Income, and Education on Remote Work

- Leveraged Hadoop Ecosystem (Hive, HDFS) and Apache Spark to identify high-income groups and their remote work preferences.
- Utilized Tableau for insightful visualizations and Pig to create impact thresholds, demonstrating the ability to handle large datasets and derive actionable insights.

Factors Affecting Cancer Mortality Rate in America

- Analyzed extensive cancer mortality data (1983-2020) using R, JMP, and SQL.
- Applied Bayesian methods to assess the impact of various factors and proposed data-driven interventions.

Impact of COVID-19 on US Public School Education Performance

- Performed ETL and visualization in Power BI, resulting in a 15% increase in revenue and 10% improvement in operational efficiency.

Key Achievements

- Customer Obsession: Consistently delivered data-driven solutions that improved client outcomes, such as identifying payroll disparities and enhancing hiring efficiency.
 - Data-Driven Decision-Making: Achieved high accuracy in predictive models (e.g., 97% recall in churn prediction) and streamlined processes (e.g., 10% efficiency gain in SQL queries).
 - Collaboration & Stakeholder Management: Worked closely with cross-functional teams to prepare pitchbooks, financial models, and investment memos, ensuring alignment with business goals.
 - Technical Proficiency: Proficient in tools like SQL, Python, Tableau, and MS Excel, with experience in handling large datasets and deriving actionable insights.
-
