

KOPISETTI YASHWANTH

Data Analyst

Denton, TX | yashwanthk5522@gmail.com | +1 (469) 274 3272

SUMMARY

Experienced and detail-oriented Data Analyst with 4+ years of expertise in leveraging methodologies such as SDLC, Agile, and Waterfall to drive data-driven projects to success. Proficient in Python, R, and SQL, with hands-on experience in coding using Visual Studio Code and PyCharm. Expertise in essential packages like NumPy, Pandas, Matplotlib, SciPy, and ggplot2 for advanced data manipulation and analysis. Skilled in using data visualization tools such as Tableau, Power BI, and Microsoft Excel to transform complex data into actionable insights. Adept at managing databases, including MySQL and SQL Server, and proficient in data cleaning, wrangling, critical thinking, and problem-solving. Experienced in cloud technologies, including AWS, GCP, and Azure, for implementing scalable data solutions. Exceptional communication and presentation skills facilitate effective collaboration and clear presentation of findings. Competent in using version control tools like Git and GitHub.

SKILLS

Methodologies: SDLC, Agile, Waterfall

Language: Python, R, SQL, SAS

IDEs: Visual Studio Code, PyCharm, Jupyter Notebook

Packages: NumPy, Pandas, Matplotlib, SciPy, ggplot2, Scikit-learn

Visualization Tools: Tableau, Power BI, Microsoft Excel

Cloud Technologies: AWS, Azure, GCP

Database: MySQL, SQL Server, PostgreSQL

Version Control Tools: Git, GitHub

Other Skills: Data Cleaning, Data Wrangling, Critical Thinking, Communication Skills, Presentation Skills, Problem-Solving, Data Analytics, Decision-making, Data Architecture, Data Management

Operating System: Windows, Linux

EXPERIENCE

Data Analyst | UnitedHealth Group, USA | Jan 2024 – Present

- Utilized Agile Methodology to streamline project life cycles, focusing on report design and development for a more flexible and adaptive project management approach.
- Leveraged packages such as NumPy, Pandas, Matplotlib, SciPy, ggplot2, and Scikit-learn to perform data manipulation, statistical analysis, and machine learning.
- Conducted comprehensive data tasks, including cleaning, exploratory analysis, visualization, and mining, using SQL, Python, and R to derive valuable insights from diverse datasets.
- Increased Tableau proficiency by 30% through the design and publication of interactive reports and dashboards, offering stakeholders customized and insightful data visualizations.
- Executed ETL processes to extract, transform, and load data from various sources into MySQL and SQL Server databases, achieving a 25% reduction in data processing time.
- Configured and optimized AWS cloud resources, resulting in a 20% improvement in data processing and analytics performance.
- Performed statistical modeling of provider data for outpatient authorizations, utilizing Pivot Tables in Excel for detailed analysis and interpretation.
- Implemented branching strategies in Git to support parallel development efforts, reducing code conflicts by 25%.

Assistant System Engineer (Data Analyst) | Capgemini (CG), India | June 2021 - Nov 2022

- Implemented machine learning models and analytics solutions using Python and R to address business challenges and streamline operations.
- Led data cleaning, feature scaling, and feature engineering efforts using Python with NumPy and Pandas, enhancing data quality and analytical precision.
- Optimized SQL queries to enhance data retrieval and transformation efficiency by 40%, improving overall data processing speeds and supporting timely decision-making processes.
- Developed over 50 dynamic reports and visualizations in Tableau, delivering actionable insights to stakeholders and enhancing data-informed strategies by 40%.
- Demonstrated proficiency in AWS services, particularly Amazon S3, for effective and scalable data storage solutions.
- Accomplished MySQL and PostgreSQL databases to optimize data retrieval and integrity while implementing Git and GitHub for collaboration and version control across data engineering projects to ensure consistency.
- Engaged in all stages of data mining, including data collection, cleaning, model development, validation, and visualization.

Data Analyst | Mindtree, India | Jan 2019 - May 2021

- Implemented Waterfall methodologies within the SDLC framework, enhancing project execution efficiency by 15% and ensuring a structured approach to project management.
- Applied advanced data cleaning and wrangling techniques using NumPy, Pandas, and SQL to improve data accuracy and consistency, streamlining analytical processes.
- Conducted thorough data analysis using R statistical software, employing hypothesis testing techniques to validate data and interpretations for accurate and reliable analytical results.
- Enhanced reporting efficiency by 20% through the creation of focused tabular-based models in Power BI and Microsoft Excel, optimizing key insights for targeted reporting solutions.
- Executed seamless data migration from Excel to MS SQL Server, establishing a robust database structure and relationships for efficient data organization and accessibility.
- Orchestrated the deployment and administration of big data solutions on Azure and Databricks, facilitating scalable and high-performance data analytics capabilities.
- Actively contributed to GitHub repositories, participating in pull requests and code reviews to uphold code quality and foster team collaboration.

EDUCATION

Master in Information Systems and Technology

University of North Texas, Denton, TX

May 2024

GPA: 3.3 / 4.0

Bachelor in Computer Science and Engineering

Gitam University, India

July 2021

GPA: 6.89 / 10
