

Shuchika Reddy
Contact No: (470)-691-2888
Email ID: shuchika81r@gmail.com

PROFESSIONAL SUMMARY:

- Over **5+ years** of experience as an Analysis, Design, Development, Management, and Implementation of various stand-alone, client-server enterprise applications.
- Good knowledge in various stages of **SDLC (Software Development Life Cycle)**.
- Proficient in using editors Eclipse, **PyCharm, PyScripter, Notepad++** and Sublime Text while developing different applications.
- Experienced in developing Web Services with **Python** programming language.
- Having experienced in **Agile Methodologies, Scrum** stories and sprints experience in a **Python** based environment, along with data analytics, data wrangling and Excel data extracts.
- Experienced in working on Application Servers like **WebSphere, WebLogic, Tomcat, Web Servers** like **Apache server, NGINX**, and Integrated Development Environments like **PyCharm, Eclipse, MyEclipse, JDeveloper and RAD**.
- Hands on Experience in AWS like Amazon **EC2**, Amazon **S3**, Amazon **Redshift**, Amazon **EMR** and Amazon **SQS, glue, Athena, lambda**, etc.
- Experience in working on various python packages such as **NumPy, SQL Alchemy, PySide, SciPy, and PyTables**.
- Good working experience in processing large datasets with **Spark** using **Scala and PySpark** and Familiar with **JSON** based **REST** Web services.
- Collaborated with cross-functional teams to design, develop, and deploy scalable applications on AWS infrastructure, with a focus on leveraging PySpark for efficient data processing.
- Implemented and optimized data pipelines using **Databricks** and PySpark for large-scale data analytics, ensuring high performance and reliability.
- Utilized PySpark's DataFrame API for structured data manipulation, analysis, and transformation tasks, enhancing data processing efficiency.
- Experience in managing datasets using **Panda** data frames and **MySQL**.
- Proficient in SQL databases **MS SQL, MySQL, Oracle** and no-SQL databases **MongoDB** and **Cassandra**.
- Experience implementing **Object Oriented Python, Hash Tables** (Dictionaries) and **Multithreading, Django, MYSQL**.
- Experienced in developing web-based applications using **Python, Django, C++, XML, CSS3, HTML5, DHTML, JavaScript, JQuery, MVC3, Bootstrap, RESTful, RUBY and AJAX**.
- Strong experience of software development in **Python** (libraries used: libraries- **Beautiful Soup, NumPy, SciPy, matplotlib, python-twitter, Panda's data frame, NetworkX, urllib2, MySQL dB for database connectivity**) and IDEs – **sublime text, Spyder, PyCharm, emacs**.
- Experience in writing Sub Queries, Stored Procedures, Triggers, Cursors, and Functions on **MySQL** and **PostgreSQL** database.

- Highly self-motivated, dedicated, quick learner and have proven ability to build and manage a team and work individually.
- Strong analytical and problem-solving skills, always striving for new knowledge. A person with multi-tasking and organizational skills and high ethical standards.
- Excellent communication and interpersonal skills, ability to work independently as well as part of an integrated team.

TECHNICAL SKILLS:

Languages	Python, C++, Java, Shell Script, Perl, SQL
Cloud	AWS, EC2,EKS,Lambda,Batch,VPC,Load Balancing,S3,EMR,RDS,DynamoDB,Redshift,CodePipeline,CodeDeploy,Databricks
Frameworks	Django, pyramid, Flask, Spring, Hibernate and web2Py
Web Technologies	HTML5, CSS3, JavaScript, XML, Servlet, JSP, JSON, AJAX, SAAS and JQuery
IDEs/tools	PhpStrom, Notepad++, Sublime, NetBeans, Thonny, Komodo, PyCharm, PyDev, PyScripter, Pyshield, Spyder, PyStudio, Eclipse, ETL, AWS.
Management Tools	GIT, SVN, Maven, Gradle, CVS
Web Servers	JBoss, BEA Web Logic, Web Sphere, Apache Tomcat
Database	MYSQL, PostgreSQL, MS SQL, MongoDB, Oracle
Operating Systems	Linux, Windows, Mac

PROFESSIONAL EXPERIENCE:

Client: Evernorth(Cigna), Remote

Feb 2023 – PRESENT

Role: Software Engineering Advisor

Responsibilities:

- Worked with NumPy, SciPy, Matplotlib, HTTPLib2, Utilib and Pandas libraries during development lifecycle.
- Set up rules and policies with a Node.js/Python back end.
- Created Python and Bash tools to increase efficiency of application system and operations; data conversion scripts, AMQP/RabbitMQ, REST, JSON, and CRUD scripts for API Integration.
- Build all database mapping classes using Django models.
- Developed and migrated data to AWS using AWS Data Pipeline, Amazon Redshift, Amazon S3, and Amazon Virtual Private Cloud (VPC).
- Implemented CI/CD pipeline using AWS CodePipeline and AWS CodeDeploy.
- Automated the deployment of Docker containers to Amazon Elastic Kubernetes Service (EKS).
- Improved data processing performance by 20% by optimizing Amazon Redshift queries.
- Reduced the time to deploy new features to production by 50% by using CI/CD.
- Increased the reliability and scalability of the application by using EKS.
- Led the development of a cloud-based analytics platform on AWS, incorporating PySpark, Databricks, and Apache Kafka for distributed data processing, analytics, and real-time data streaming.

- Implemented data lake using Amazon S3 and orchestrated data processing workflows with AWS Glue.
- Implemented the presentation layer with HTML5, DHTML, AJAX, CSS3 and JavaScript
- Successfully migrated the Django database from SQLite to MySQL with complete data integrity.
- Developed multi-threaded standalone app in Python, C++ to view Circuit parameters and performance.
- Built efficient Node.js backend for client web application.
- Developed views and templates with Python and Django view controller and templating language to create a user-friendly website interface.
- Experience in working with tools like Attunity and having knowledge on ETL tools like Talend and wrote Python modules to view and connect the Apache Cassandra Instance
- Used PyQt to implement GUI for the user to create, modify and view reports based on client data.
- Worked on PyUnit, the Python unit test framework, for the python applications.
- Worked on UI using HTML5, CSS3 and Java Scripts.
- Used the Django Framework to develop the application.
- Created User Controls and simple animations using Java Script and Python.
- Generated Python Django Forms to record data of online users.
- Wrote Python routines to log into the websites and fetch data for selected options.
- Involved in writing application-level code to interact with APIs, Web Services using JSON.
- Involved in AJAX driven application by invoking web services/API and parsing the JSON response.
- Rewrite existing Java application in Python module to deliver certain format of data

Environment: Python, Django, AWS, PyUnit, Java, MySQL, Node.js, HTML5, XHTML, CSS3, AJAX, REST, JSON, JavaScript, SVN, MySQL, ETL, Apache Web Server, Oracle, Windows.

Client: Dignity Health, Los Angeles, CA

Jun 2019 – Jan 2023

Role: Python Developer

Responsibilities:

- Developed monitoring and notification tools using Python.
- Developed entire frontend and backend modules using Python on Django Web Framework.
- Created test harness to enable comprehensive testing utilizing Python.
- Developed tools using Python, Shell scripting, XML to automate some of the menial tasks.
- Used Python based GUI components for the front-end functionality such as selection criteria.
- Created Business Logic using Python to create Planning and Tracking functions
- Successfully migrated over 100 TB of data to AWS without any downtime.
- Developed a custom AWS Data Pipeline pipeline to automate the data migration process.

- Created and implemented a CI/CD pipeline that automatically builds, tests, and deploys Docker containers to EKS
- Used Amazon Elastic Kubernetes Service (EKS) to create a highly scalable and reliable Kubernetes cluster
- Optimized Amazon Redshift queries to improve data processing performance.
- Monitored and analyzed AWS resources to ensure optimal performance and reliability.
- Worked closely with other developers to ensure the smooth integration of the new data pipeline and CI/CD pipeline with the existing application.
- Designed and implemented an ETL pipeline using Python, PySpark, and Apache Kafka for data processing and transformation.
- Dockerized the ETL processes, allowing for easy deployment and management across different environments.
- Integrated the pipeline with AWS services for seamless data flow.
- Used Django for framework for accessing various Clinical Trial Data from various sources.
- Created Data tables utilizing PyQt to display customer and policy information and add, delete, update customer records.
- Created database using MySQL, wrote several queries to extract data from database. Have Knowledge on ESPscheduler and in creating job doc sets to schedule ETL jobs.
- Responsible for gathering requirements, system analysis, design, development, testing and deployment.
- Developed internal auxiliary web apps using Python Flask framework with CSS3 / HTML5 framework.
- Worked very closely with designer, tightly integrating Flash into the CMS with the use of Flashvars stored in the Django models. Also created XML with Django to be used by the Flash.
- Created MySQL back-end for data entry from Flash. I had to assist the Flash developer send the correct data via query strings.
- Used PyQuery for selecting particular DOM elements when parsing HTML5.
- Created PyUnit test scripts and used for unit testing.
- Used JQuery and Ajax calls for transmitting Json data objects between frontend and controllers.
- Involved in MVW frameworks like Django, Java Script, and Node.js.
- Used GitHub for version control.
- Implemented navigation rules for the application and page outcomes, written controllers using annotations.
- Worked in an agile development environment.
- Actively participated in System Testing, production support and maintenance/patch deployments.

Environment: Python, AWS, Django, Flashvars, PyUnit, PyQuery, PyQt, HTML5, CSS3, DOM, REST, Node.js, JavaScript, AJAX, JQuery, GitHub, ETL, Agile, Oracle, Windows.

Client: Tysons Corner Wealth Center, McLean, VA

Oct 2017 – May 2019

Role: Python Developer

Responsibilities:

- Involved in building database Model, APIs and Views utilizing Python, in order to build an interactive web-based solution.
- Performed testing using Django's Test Module.
- Expertise in client scripting language and server-side scripting languages like JavaScript, JQuery, JSON, DOJO, bootstrap, Node.js.
- Utilized Agile process and JIRA issue management to track sprint cycles.
- Responsible for debugging and troubleshooting the web application.
- Supported user groups by handling target-related software issues/service requests, identifying/fixing bugs.
- Used the Python's modules NumPy, mat plotlib etc. for generating complex graphical data, creation of histograms etc.
- Worked on Extracting, Transforming and Loading (ETL) data from Excel, Flat file, to MS SQL Server by using DTS and SSIS services.
- Creating unit test/regression test framework for working/new code.
- Using Subversion version control tool to coordinate team-development.
- Developed SQL Queries, Stored Procedures, and Triggers Using Oracle, SQL, and PL/SQL.
- Carried out various mathematical operations for calculation purpose using python libraries.
- Managed large datasets using Panda data frames and MySQL.
- Worked with JSON based REST Web services.
- Used data types like dictionaries, tuples, and object-oriented concepts-based inheritance features for making complex algorithms of networks.
- Designed and developed the UI of the website using HTML5, XHTML, AJAX, CSS3 and JavaScript.
- Worked on Python Open stack API's.
- Generated Python Django Forms to record data of online users
- Created Data tables utilizing PyQt to display customer and policy information and add, delete, update customer records.

Environment: Python, Django, JavaScript, JQuery, JSON, DOJO, HTML5, DHTML, AJAX, CSS3, Open Stack API, Panda, ANT, Jenkins, Rake, JIRA, SQL, ETL, Oracle, Windows, AWS.
