PROFESSIONAL SUMMARY

Healthcare Informatics Analyst with midlevel experience in clinical documentation, EHR systems, and public health reporting. Delivered reproducible Python and R pipelines that integrated 15+ multisource datasets, providing actionable insights for senior leadership. Managed HIPAA-protected counseling center data and ensured compliance across institutional reporting workflows. Ready to apply analytics and informatics expertise to drive improved patient outcomes and operational efficiency.

SKILLS

- **Healthcare Data & Standards:** Electronic Health Record (EHR) Systems, ICD-10, SNOMED-CT, FHIR, PACS, DICOM, Clinical Reporting
- **Programming & Analytics:** SQL, R, Python (Pandas, NumPy, Matplotlib), ETL Workflows
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Visualization:** Tableau, Power BI, IBM SPSS
- **Compliance & Governance:** HIPAA, Clinical Documentation Standards, FDA/EMA Exposure, ICD-10
- **Core Competencies:** Data Validation, Workflow Analysis, Stakeholder Communication, Documentation Integrity

WORK EXPERIENCE

REA Analytics

May 2025 - Dec 2025

Data Analyst Intern

Grand Rapids, Michigan

- Analyzed 15+ multi-source government and nonprofit datasets using SQL and MySQL to support research and program evaluation, providing actionable insights that guided subsequent evaluation initiatives
- Developed reproducible Python (pandas) and R (tidyverse) pipelines for cleaning, validating, and integrating confidential datasets, which streamlined data preparation and ensured consistent results across analyses
- Conducted logistic regression and exploratory modeling in R to uncover program-level trends, delivering insights that informed policy recommendations for stakeholders
- Built interactive visual reports with Tableau to present key findings, enabling leadership to make informed decisions on program direction
- Presented analytical findings and clarified assumptions in stakeholder meetings, leading senior leaders to adopt recommended actions

Grand Valley State University

Oct 2023 - Dec 2025

Data & Records Support Analyst

- Oversaw HIPAA-protected counseling center data and FERPA-regulated student records using SQL and EHR systems, ensuring full compliance with university policies and passing all internal audits
- Executed structured data entry, validation, and documentation control in regulated reporting workflows with ETL scripts and MongoDB, reducing data errors and streamlining report generation
- Maintained secure record management through role-based access controls and audit logs in the PACS and FHIR platforms, protecting sensitive information and meeting audit requirements
- Supported internal reporting workflows by extracting data with SQL queries and integrating it via ETL processes, safeguarding confidentiality and preserving data integrity for decision-makers

RK Hospital

Nov 2021 - May 2023

Clinical Data & EHR Analyst

- Supported inpatient and outpatient EHR documentation workflows by configuring FHIR interfaces and running SQL queries, which streamlined clinical reporting processes and reduced report generation time
- Validated structured patient records using SQL-based data validation scripts and ETL checks, ensuring completeness and regulatory compliance, which improved overall record accuracy
- Conducted record retrieval and auditing with SQL extraction tools, delivering timely patient histories that helped physicians maintain continuity of care
- Collaborated with clinical teams to identify and correct documentation discrepancies using workflow analysis and ETL adjustments, enhancing patient data quality
- Maintained adherence to healthcare privacy and data-governance standards by implementing audit trails and role-based access controls, safeguarding patient information

VIMS & Community Health Center

Mar 2017 - Nov 2021

Clinical Pharmacy & Public Health Data Associate

- Managed medication records and entered structured EHR data using SNOMED-CT across hospital departments, improving data consistency for clinical reporting
- Assisted with pharmacy inventory tracking and medication reconciliation documentation using IBM SPSS, reducing inventory discrepancies by streamlining record-keeping

- Validated clinical records with data-validation protocols and DICOM standards, enabling more accurate treatment planning and coordinated patient care
- Compiled and analyzed COVID-19 case and mortality statistics across 50+ localities, aggregating approximately 4,000+ population-level records to support timely public health surveillance updates
- Developed weekly visual summaries of medication distribution and epidemiological trends in Power BI, providing stakeholders with clear insights for resource allocation
- Validated clinical documentation with SNOMED-CT and IBM SPSS to ensure compliance with documentation standards and patient confidentiality, resulting in zero compliance findings during audits

PROJECTS

Clinical Outcomes Analysis - Type 2 Diabetes Mellitus (DM2): Prospective Hospital-Based Study

- Designed and executed a prospective clinical outcomes study assessing psychological distress among Type 2 diabetes patients
- Developed IRB-approved protocols, informed consent forms, and compliant data collection instruments
- Collected and managed longitudinal patient data using defined inclusion and exclusion criteria
- Performed statistical analysis using Minitab to identify trends, associations, and outcome patterns
- Ensured ethical compliance, patient confidentiality, and secure handling of clinical data throughout the study lifecycle

Clinical Image & Metadata Integration - Skin Cancer Diagnostics

- Integrated structured clinical metadata with imaging data to support analytical evaluation of diagnostic workflows
- Performed data preprocessing and feature integration using Python-based workflows; applied cross-validation and statistical reliability testing
- Emphasized interpretability and analytical evaluation rather than model tuning alone

EDUCATION

Grand Valley State University

MS, Health and Bioinformatics

Dec 2025

Grand Rapids, MI

Vignan Institute of Pharmaceutical Technology

Doctor of Pharmacy

Nov 2021

Visakhapatnam, India

LICENSURES & CERTIFICATES

- Pharmacy Technician License - Michigan Department of Licensing and Regulatory Affairs (LARA)
- Good Clinical Practice (GCP) - CITI Program (FDA-focused)
- HIPAA Compliance Training
- Responsible Conduct of Research (RCR) - Biomedical Sciences (CITI)
- Power BI for Data Analysis
