SUMMARY:

Results-driven software engineer with 5 years of experience in developing robust applications across finance, healthcare, and technology domains. At Payoneer, optimized full-stack solutions using Angular and Java. Previously at Tata Consultancy Services, designed scalable microservices and implemented GraphQL for New York Life Insurance. As a Full Stack Developer at Vanguard, enhanced web applications with React and Spring. Proven expertise in cloud technologies with Aircom Solutions, leveraging AWS and Azure for scalable deployments. Strong skills in CI/CD, Agile methodologies, and database management.

EDUCATION:

Purdue North West, IN

August 2022- December 2023

Master of Science in Computer Science (MS-CS)

TECHNICAL SKILLS:

Languages	Java 8/11/17, JavaScript ES6, Python 3.x, SQL, C, C++
Java/J2EE Technologies	Spring 5.x, Spring Boot 2.x, Spring MVC 5.x, Spring Security 5.x, Hibernate 5.x, JPA 2.x, JDBC 4.x, JSP 2.x, Struts 2.x
Web Technologies	HTML5, CSS3, Bootstrap 4.x, JavaScript ES6, AngularJS 1.x, React 17.x, TypeScript 4.x, XML, JSON
Web Services	RESTful APIs, SOAP 1.2, Microservices
Databases:	MySQL 8.x, PostgreSQL 12.x, MongoDB 4.x, DynamoDB
App servers	IBM WebSphere 9.x, Apache Tomcat 9.x, BEA WebLogic 14.x
Repositories:	Git (latest stable versions), GitLab, Bitbucket, SVN
Project Management Tools	Jira
Testing Frameworks	JUnit 5.x, Jasmine 3.x, Karma 2.x, Selenium 3.x, Postman (latest version)
Operating Systems	Windows 10, Linux (latest), UNIX
Cloud Environments	Azure (latest), AWS (latest), Kubernetes (latest), Docker (latest), Jenkins (latest CI/CD)
SDLC methodologies	Agile/Scrum, Waterfall
Programming Paradigms	Functional Programming

WORK EXPERIENCE:

Payoneer

Aug 2023 - Till Date

Java Full-Stack Developer

- Developed and optimized full-stack solutions, focusing on front-end development with Angular and backend services using Java.
- Authored and implemented a Single Page User Interface for client service modules using Angular, HTML5, and CSS3.
- Leveraged Angular Material to create a consistent and modern design system, enhancing visual appeal and usability.
- Crafted reusable and modular Angular components, including directives, pipes, and services, to improve code maintainability and scalability.
- Architected and deployed microservices with Spring Boot, ensuring modular and maintainable code structures.
- Developed microservices and created REST APIs using the Spring Boot framework, utilizing Maven as the build tool.
- Utilized Spring Cloud services, including Netflix Oss Eureka for routing and Ribbon for client-side load balancing.

- Written Python scripts to automate repetitive tasks and data migrations within a Java application ecosystem.
- Utilized UNIX/Linux environments for software development, deployment, and troubleshooting.
- Integrated JPA and Hibernate for efficient database connectivity and object-relational mapping, facilitating seamless data management.
- Implemented messaging solutions using ActiveMQ, RabbitMQ, or Kafka based on application requirement.
- Supervised database interactions, optimizing queries for faster transaction processing.
- Collaborated with team members using Git Actions for CI/CD workflows.
- Participated in Agile ceremonies, contributing to sprint planning and retrospectives.
- Executed CI/CD pipelines using Jenkins and Docker, streamlining the deployment process.
- Collaborated with the database team to optimize SQL queries and monitor application performance using AWS CloudWatch.
- Design and develop serverless integration solutions with different channels by AWS Cloud formation, AWS Lambda, AWS API Gateway, AWS DynamoDB.
- Utilized AWS services like EC2, S3, RDS, Lambda, ECS, EKS and DynamoDB in application development.
- Written and maintained unit tests using frameworks like Junit5 to validate individual components and methods and also did integration testing on the application.

Environment: Java, Angular, HTML5, CSS3, Angular Material, Spring Boot, REST APIs, Maven, Spring Cloud, Eureka, Ribbon, JPA, Hibernate, SQL, Docker, Jenkins, AWS CloudWatch, Microservices, React, Bootstrap, TypeScript, Kafka, ActiveMQ, Rabbit MQ, Azure, Git, Junit5.

Tata Consultancy Services: New York Life Insurance (USA Client)

Nov 20 – Aug 2022

Java/J2EE Full-Stack Developer

- Analysed requirements and authored Java-based enhancements for web and enterprise applications, increasing overall functionality.
- Designed and implemented GraphQL web services in Java with Spring, improving API efficiency and enhancing frontend-backend communication.
- Leveraged Java 8 features such as Date & Time, Lambda expressions, and Stream API for efficient code development.
- Participated in all phases of the SDLC, including design, development, testing, and deployment, ensuring high-quality project delivery.
- Developed scalable microservices using Spring Boot and Spring Data JPA, enhancing modularity and system performance.
- Set up and configured Hibernate caching in application settings for balanced performance of Application.
- Utilized Kafka for event-driven architecture, significantly improving data processing efficiency.
- Crafted intuitive UI components with HTML, CSS, Angular, and TypeScript, enhancing user interaction and experience.
- Managed project tasks and requirements using JIRA, ensuring effective project tracking and management.
- Established CI/CD pipelines with Jenkins and orchestrated deployments with Kubernetes, streamlining deployment processes.
- Used AZURE services such as Azure App Service, Azure Functions, Azure Cosmos DB, and Azure SQL Database ensuring optimal application performance and scalability.
- Set up and manage CI/CD pipelines using Azure DevOps, including Azure Pipelines and Azure Repos.

Environment: Java, GraphQL, Spring, Java 8, Date & Time, Lambda expressions, Stream API, SDLC, Spring Boot, Spring Data JPA, Kafka, HTML, CSS, Angular, TypeScript, JIRA, Jenkins, Kubernetes, AZURE, AZURE Functions, ECS, EKS, CloudWatch, Redis, REST APIs, Docker.

Client: Vanguard (USA Client)

Aug 19 – Nov 20

Software Engineer

- Interacted with business users to analyse requirements and executed enhancements for various web and enterprise applications using Java technology.
- Utilized Spring Core annotations for dependency injection, Spring MVC for building RESTful APIs, and Spring Boot for developing microservices.

- Designed and implemented microservices architecture using orchestration patterns to ensure efficient service coordination, scalability, and fault tolerance across distributed systems.
- Authored user interfaces with HTML5, CSS3, React, JavaScript, JSON, and jQuery to create engaging web pages.
- Leveraged React.js to manage user interactions and dynamically update the UI based on user actions.
- Developed single-page applications using React.js and Flux, implementing dynamic forms and module-level routing with React Router.
- Integrated Hibernate for data persistence and caching to optimize application response times.
- Collaborated with the database team to optimize SQL queries, enhancing overall system performance.
- Participated in 24/7 on-call rotations, providing pre-and post-production support while debugging issues.
- Executed CI/CD pipelines with Jenkins to automate build, test, and deployment processes, deploying Spring Boot-based microservices using Docker on AWS, and orchestrating resources with Kubernetes.

Environment: Java, Spring Core, Spring MVC, Spring Boot, RESTful APIs, microservices, HTML5, CSS3, React, JavaScript, JSON, jQuery, Hibernate, SQL, Jenkins, Docker, AWS, Kubernetes, Linux, Unix

Aircom Solutions Pvt Limited

Dec 18 – May 19

Software Engineer

- Participated in all phases of the Software Development Life Cycle (SDLC), including requirements gathering, design, development, and testing.
- Authored Java classes using the Spring Framework to implement the Model-View-Controller (MVC) architecture effectively.
- Leveraged OOP principles such as encapsulation, polymorphism, collections, and multithreading to enhance application performance.
- Executed the development of RESTful APIs to enable seamless interaction between client-side applications and server-side services.
- Collaborated on building user interfaces with HTML, CSS, and Bootstrap, ensuring a responsive and user-friendly design.
- Crafted microservices utilizing Spring Boot and Hibernate for effective data management and persistence.
- Acquired proficiency in Kafka for real-time data streaming and messaging between microservices.
- Facilitated deployment and management of applications on Azure and AWS cloud platforms to ensure scalability and reliability.
- Designed and maintained MySQL databases, optimizing schemas and queries for enhanced performance.
- Conducted unit testing with JUnit and integration testing, while monitoring application logs on Linux/Unix servers to ensure system stability.

Environment: Java, Spring Framework, MVC, OOP, RESTful APIs, HTML, CSS, Bootstrap, JSP, HTML/CSS, JDBC IntelliJ, Spring MVC, Web services, Microservices, Jira, Node.js, MongoDB, React Agile Methodology, Apache Tomcat, , XML, UML, JUnit, log4j, SVN and Maven, Hibernate, Kafka, Azure, AWS, MySQL, JUnit, Linux, Unix.

PROJECTS:

Cocktail Recommendation:

- Developed a web application that provides cocktail suggestions based on current weather conditions, utilizing JSON, XML, and SQL queries for data retrieval and processing.

Covid-19 Project:

- Created a Covid-19 data insights project using Power BI, implementing data pipelines with Azure Data Factory to store insights and data in Azure Data Lake.

Online Banking Application:

- Developed a functional and secure online banking web application using Java, Hibernate, HTML, and Angular, ensuring a robust user experience and secure transactions.
