SKILLS

Programming Languages:

Python (libraries: NumPy, Pandas, Matplotlib, SciPy), R (libraries: ggplot2), SQL (including experience with SSIS, SSRS, and SSAS), Java, Apache Spark, AWS Lambda, Azure Functions.

Database Technologies:

MySQL, SQL Server, Jupyter Notebook, Snowflake, Amazon Redshift, Google BigQuery, Microsoft Azure SQL Database, MongoDB, Cassandra

Data Visualization Tools:

Seaborn, Tableau, Power BI, Google Data Studio, Streamlit, Plotly

Data Analysis and Machine Learning:

Data Cleaning, Data Wrangling, Data Mining, Machine Learning, Natural Language Processing, Deep Learning

Cloud Computing:

AWS, Azure, Google Cloud Platform, Microsoft Azure Synapse Analytics

Business Intelligence (BI) Tools:

Qlik Sense, Looker

Statistical Software:

SPSS, SAS

Other Skills:

Data Storytelling, Communication and Presentation Skills, Problem-Solving and Critical Thinking, SDLC, Agile, Waterfall

Operating System:

MacOS, Windows, Linux

EDUCATION

Master’s Degree in Information Systems,

University of Texas at Arlington - USA

Bachelor’s Degree in Computer Science and Engineering ,

Jawaharlal Nehru technology

CERTIFICATIONS

AWS Certified Solutions Architect CID:

K7P73RSC9F441P5X

AWS Cloud Practitioner

Cisco Network Academy CLA: C programming

SUMMARY

- Highly skilled Data Analyst with 3+ years of experience in leveraging advanced analytics techniques to extract actionable insights from complex datasets, resulting in data-driven decisions that have significantly improved business performance across multiple industries
- Demonstrated expertise in utilizing SQL, Python, and R for robust data manipulation, statistical analysis, and predictive modeling, consistently delivering high-quality results that have led to revenue growth and cost savings for organizations
- Proficient in developing and implementing machine learning models for various applications, including customer segmentation, churn prediction, and demand forecasting, resulting in improved marketing effectiveness and operational efficiency
- Advanced knowledge of data visualization tools such as Tableau and Power BI, with a proven track record of creating interactive dashboards that have enhanced data interpretation and reduced decision-making time for C-level executives by up to 25%
- Extensive experience in designing and optimizing ETL processes, having successfully reduced data processing time by 60% through the implementation of automated pipelines, ensuring data accuracy and timely reporting
- Strong background in A/B testing and experiment design, consistently improving key metrics such as user engagement, conversion rates, and customer satisfaction through data-driven optimizations
- Excellent communicator with the ability to translate complex data findings into clear, actionable recommendations for both technical and non-technical stakeholders, facilitating cross-functional collaboration and driving business strategy
- Proven track record of mentoring junior analysts and promoting data literacy across organizations, resulting in improved team productivity and a more data-driven culture

EXPERIENCE

PNC Financials, TX | Sept 2022 - Current

Data Analyst

- Developed and implemented a machine learning model that improved customer segmentation accuracy by 35%, resulting in a 20% increase in targeted marketing campaign effectiveness
- Designed and maintained an automated ETL pipeline using Python and SQL, reducing data processing time by 60% and ensuring data accuracy for over 50 daily reports
- Conducted comprehensive analysis of historical sales data, identifying trends that led to a 15% increase in quarterly revenue through optimized pricing strategies
- Created interactive Tableau dashboards for C-level executives, providing real-time insights into KPIs and contributing to a 25% reduction in decision-making time
- Implemented A/B testing methodologies for website optimization, resulting in a 40% increase in user engagement and a 10% boost in conversion rates
- Collaborated with cross-functional teams to develop a predictive model for inventory management, reducing stockouts by 30% and overstock instances by 25%
- Automated data quality checks using Python scripts, identifying and resolving data discrepancies, which improved overall data integrity by 40%
- Conducted time series analysis on market trends, providing accurate forecasts that guided strategic planning and resulted in a 12% increase in market share
- Developed and maintained a comprehensive data dictionary and documentation system, improving data literacy across departments by 50%
- Mentored junior analysts in advanced SQL techniques and data visualization best practices, enhancing team productivity by 30%

C-Edge Technologies, India | Jan 2020 - June 2021

Junior Data Analyst

- Assisted in the development of a customer churn prediction model using logistic regression, improving customer retention rates by 25%
- Conducted exploratory data analysis on large datasets (10M+ records) to identify patterns and anomalies, contributing to a 15% reduction in operational costs
- Created automated reports using Python and SQL, saving the team 20 hours per week and improving data accessibility for stakeholders
- Collaborated with the marketing team to analyze campaign performance, leading to a 30% increase in ROI for digital marketing initiatives
- Implemented data cleaning and preprocessing techniques, improving data quality by 40% and enhancing the accuracy of analytical models
- Designed and maintained SQL databases, optimizing query performance and reducing report generation time by 50%
- Conducted sentiment analysis on customer feedback data, providing insights that led to a 20% improvement in customer satisfaction scores
- Developed interactive Power BI dashboards for sales performance monitoring, enabling real-time decision making and contributing to a 10% increase in sales
- Assisted in the implementation of A/B testing for email campaigns, resulting in a 35% increase in open rates and a 20% increase in click-through rates
- Conducted statistical analysis to identify key factors influencing product returns, leading to process improvements that reduced return rates by 15%
