

MOHITHA KALAVAGUNTA

SQL BI/Power BI Developer

Phone: 1 (865) 745-5237

Email: mohitha.kalavagunta@gmail.com

PROFESSIONAL SUMMARIES

- Over **5 plus years** of extensive work experience in Developing BI Applications utilizing SQL Server, BI Stack, Power BI and Tableau.
- Expert Power BI in Database Development, developing BI applications utilizing SQL Server, MSBI Stack (TSQL, SSIS, SSRS, SSAS), Azure, Power BI for Building, Deploying, and managing applications.
- Proficient in SQL, DAX, and M Query for data extraction, transformation, and analysis, Specializing in Project management, Data analytics, Data Engineering, Data Mining, Data reporting, Data visualization, Data Modelling, Data Warehousing, Statistical Packages, Data Nuances, Tableau and Power BI.
- Extensive database programming and Involved in Business Analyst of the OLTP and OLAP data and in decision support.
- Experienced in design, development, coding and testing of business and commercial applications in MSSQL Server 2019/2017/2016/2014/2012/2008R2/2008, MS Access, .NET Script, Windows 2008/2010/2011.
- Having knowledge of Big Data technologies like Hadoop, Hive, Cosmos etc.
- Knowledge of Designing and Implementing ETL solutions and data processing through AWS (S3, Redshift, etc.)
- Broad experience in Query Optimization and performance tuning of stored procedures, functions etc.
- Experienced in extracting and transforming data using Import/Export wizard, Bulk Insert, Bulk Copy Program (BCP), Data Transformation Services (DTS) and SQL Server Integration Services (SSIS).
- Experienced in maintenance and Administration of SSIS by creating Jobs, Alerts, SQL Mail Agent, and schedule SSIS Packages.
- Hands on experience with Azure Data Lake Analytics to analyzed the structure, non-structure data from various source.
- Knowledge of statistical packages for analyzing large datasets using R programming, Python and MS Excel (Pivot tables and Charts, Advanced excel functions, Statistics, Macros, VLOOKUP tables).
- Worked on various phases of Software Development Life Cycle (SDLC) like Planning, Designing, Analyzing and Deploying.
- Expert in Data Warehouse development starting from inception to implementation and ongoing support, strong understanding of BI application design and development principles.
- Good MS Excel Skills, experience with Microsoft data visualization and Power applications.
- Partner with BI Manager, BI Engineers and BI Analyst on building a best-in-class suite of tools and reporting mechanisms to bring the most salient, insightful data more directly into key Business Functions.
- Proficient in design and development of various dashboards, reports utilizing Tableau visualizations like bar graphs, scatter plots, pie - charts, geographic visualization and other making use of actions, other local and global filters according to the end user requirement.

WORK EXPERIENCE

SQL BI/Power BI Developer

Acuity Brands - Conyers, GA | Oct 2022 – Present

- Involved in translating the business questions and business requirements to actual and final dashboard technical requirements.
- Imported Data from SQL Server DB Azure SQL DB to Power BI for generating Reports.
- Connecting to external APIs through Power BI to access/integrate with external systems (i.e., Power BI REST APIs).
- Wrote data queries in DAX and SQL and Expertise in writing Complex Dax functions in Power BI and Power Pivot.
- Configured and Deployed of all reports across various SDLC environments and deployed the packages to production using XML package configuration.
- Used Power BI, Power Pivot to developed data analysis phototype, and used Power View and Power Map to visual.
- Experience in getting data from different data sources like SharePoint, Excel, CSV, APIs etc., and transforming raw data as per requirement.
- Added new users and applied roles in the QNXT UI in the Development and UAT Environments.
- Preparing dashboards using calculated fields, parameters, calculations, groups, sets and hierarchies in Tableau.
- Gathered user requirements, analyzed and designed software solution based on the requirements.
- Developed SSRS reports which include dynamic grouping fields, drilldown and dashboard report and Export reports into various formats such as PDF, HTML, EXCEL, and WORD.
- Utilized Power Query in Power BI to Pivot and UN Pivot the data model for cleaning and massing.
- Responsible for the design and development of key indicators (KPI) and the appropriate tracking reports to assist in the management campaigns.
- Set up Microsoft Flow (Power Automate) to provide auto-approval and status update features based on predefined criteria.
- Wrote Unix Shell Scripts to process the files on daily basis like renaming the file, extracting data from the file, unzipping the file and remove the Junk characters from the file before loading them into the base tables.
- Experienced in integration of various data sources like DB2, Green Plum, SQL Server, MySQL, and Flat Files.

- Used Microsoft Power BI Power Query to extract data from external sources and modify data to certain format as required in Excel, and created SSIS packages to load excel sheets from PC to database.
- Designing, developing, and delivering business intelligence solutions using SQL Server Integration Services (SSIS), Analysis Services (SSAS), and Reporting Services (SSRS).
- Created ETL packages with different data sources (SQL Server, Oracle, Teradata, Access, Flat Files, Excel source files, XML file) and then loaded the data into destination tables by performing different kinds of transformations using SQL Server Integration Services (SSIS).
- Developed application in PowerApps using Common Data Service CDS, Flow, Excel, Forms and SharePoint online.
- Generate ad-hoc reports in excel Power Pivot and shared them using Power BI to the decision makers for strategy planning.
- Wrote complex SQL queries using joins, sub queries and correlated sub queries to retrieve data from the database.
- Created and modified several Unix Shell Scripts according to the changing needs of project and client requirements.
- Wrote Unix Shell Scripts to process the files on daily basis like renaming the file, extracting data from the file, unzipping the file and remove the Junk characters from the file before loading them into the base tables.

Environment: Microsoft Power BI, Tableau, Azure, Power (Gateways, Pivot, Service, Desktop, Apps) Microsoft Excel, Shell Scripts, APIs, CSV, SharePoint, Teradata, MS Access, SQL Server 2017/2019, HTML.

MSBI/Power BI Developer

General Healthcare Resources - Plymouth Meeting, PA | April 2021 – Sep 2022

- Developed the SQL Server Integration Services (SSIS) packages to transform data as well as created interface stored procedures used in SSIS to load/transform data to the database.
- Used various sources to pull data into Power BI such as SQL Server, Oracle SharePoint online Excel, CVS etc.
- Experienced in client requirement Analysis, Physical, Logical design, development (using Erwin, normalization and SQL Server Enterprise manager), Resource Planning, Coding, Debugging, Testing, Deployment, Support and Maintenance.
- Created SSIS packages to Oracle and other SQL Server instances in SSIS 2014/2016/2017.
- Support other ETL Developers: providing mentoring, technical assistance, troubleshooting and alternative development solutions.
- Written complex DAX functions to generate reports based on Daily, Monthly & Yearly data.
- Transform the data from the staging database and perform the transformation using the Data Flow Tasks.
- Designed the functional and technical documents, report templates and reporting standards for the developers to work on the report development.
- Create reports in Power BI preview portal utilizing the SSAS Tabular.
- Performed the task of data transfer from files in remote server to folders in another server using FTP.
- Developed various reports using SSRS, which included writing complex stored procedures for datasets.
- Involved in Report Authoring, Report Delivery (using both Pull and Push strategy) and Report Management for various types of reports.
- Created cubes, dimensions and measures and calculated measures as per business requirements.
- Worked in creating hierarchies for dimensional tables like date dimensions and region dimension tables. Browsing the cube for analysis and validation of the data. Processing the cubes and dimensions using the SSIS tasks.
- Responsible for logical and physical data modeling, database design, star Schema, data analysis, programming, documentation and implementation.
- Worked on T-SQL programming, stored procedures, user-defined functions, cursors, views setup and management of linked servers to Non-SQL-Server databases.
- Created complex SQL stored procedures using Microsoft SQL Server 2012/2014/2016.
- Developed complex stored procedure using T-SQL to generate Ad hoc reports using SSRS.
- Work with other Team members in establishing and sharing design and development techniques of the ETL process.

Environment: MS SQL Server, SSIS, SSRS, SSAS, T-SQL, Power BI, DAX, SharePoint, Version Control, Data Modeling,

SQL BI Developer

Power Home Solar-Mooresville, NC | | March 2018 – Dec 2020

- The Project involved me to work as an SQL Server BI Developer with analysis, manipulation and cleansing of data to produce clear, defined and transformed data.
- SQL Development - Writing Transact SQL. Configured and maintained MySQL database servers.
- Created package configurations for dynamic connection string to enhance the ease of package deployment, implemented Event Handlers and Error Handling in SSIS packages.
- Developed second BI phase with Redshift as Data Warehouse and Matillion as ETL tool.
- Designed and developed SSIS Packages to import and export data from MS Excel, SQL Server 2008 R2 and Flat files.
- Using SSRS creating well-formed reports and web-based reports for Finance related applications and transactions.
- Advanced extensible reporting skills using SQL Server 2016/2014/2012/2008 Reporting Services (SSRS).
- Developed Drill Down, Drill through, Cross tab reports, Parameterized Reports and Report Models for generating Ad-Hoc reports as per the client requirements.

- Managed and maintained the main business Intelligence reporting system (MicroStrategy).
- Report parameters included single valued parameters, multi-value parameters which also consist of different parameter types like hidden, internal, default (queried and non-queried parameters).
- Created Linked reports, Ad-hoc reports and etc. based on the requirement. Linked reports are created in the Report Server to reduce the repetition the reports.
- Involved in Dimensional modeling by identifying the fact and dimension tables based on the user and reporting requirements.
- Work closely with IT and the Business group to understand business reporting requirements and analyze logical model, and develop subject matter expertise in a short time.
- Facilitate Joint Application Development (JAD) sessions for gathering requirements for building a data warehouse and data marts.
- Participate in development and execution of tactics and strategies to optimize data quality in data warehouse, and OLAP environment.
- Create and design logical and physical data models using ERWIN- identify entity & its relationships and define the project's informational needs. Design Source to target mapping as per the requirement of the client and business rules to load the data from ODS to Data Warehouse.
- Maps sources system data elements to target systems and develops, tests, and supports extraction, transformation and load processes – define mapping, sessions and workflow.
- Review and analyze database performance, cubes and reports generated using SQL SERVER 2008 R2 Reporting Services.
- Built cubes for production application, Partitioned Cubes to decrease the processing Mooresville, NC time and increase the performance of the queries running on front end application using SSAS 2016.

Environment: SQL Server 2012/2014/2016, SSIS, Git Hub, Redshift, azure portal, XML.

TECHNICAL SKILLS

Databases	MS SQL server 2008/2012/2014/2016/2017/2019, Oracle BI, Snowflake, MySQL, Teradata, MS Access, Azure SQL Database.
BI Tools	SQL Server Management Studio, Enterprise Manager, Query Analyzer, Dax, Microsoft Power BI, Power Pivot, SQL Profiler, Data Base Engine Tuning Advisor, SSIS, SSRS, Business Intelligence Development Studio, Data Transformation Services, Quick sight, Looker studio, Visual Studio, TOAD.
Languages	Transact- SQL, Dynamic, SQL, C, C++, C#, R, MDX Oracle, Swift, VB Scripts, Python, Java Scripts, Ruby, Git, Scala, Shell Scripting, etc.
ETL Tools	SQL Server Integration Services (SSIS), ETL Frameworks, Export/Import, DTS, Informatica 7.1.3/6.2, Talent 5.x, DataStage.
Reporting Tools	SQL Server Reporting Service (SSRS), Crystal Reports, Data Visualization, Tableau, Power BI.
SQL Server Tools	SQL server Management Studio, SQL server Query Analyzer, SQL server mail service, DBCC, BCP, SQL server profiler.
Data Modeling Tools	Erwin, Toad, ERbuilder, dB schema, Power Designer, IBM infosphere
Source Control	TFS, VSS, SVN, CSV, GIT, Bitbucket
Web Technologies	HTML, DHTML, XHTML, XML, XSL .NET frame work, PHP, ASP.NET, VB.NET, CSS, PERL.

EDUCATIONAL AND WORK AUTHORIZATION

- **Bachelors in Electrical and Electronics Engineering**
SITAMS Autonomous university, India.
- **US Citizen**
