Data Analyst

Detail-oriented and analytical Data Analyst with 4 years of experience in collecting, analyzing, and interpreting large datasets to help drive successful business solutions. Proficient in statistical analysis, data visualization, and data management. Strong problem-solving abilities with a solid understanding of business operations and a proven track record of improving efficiency and profitability.

Key Experience

Business Data Analyst

Digitech remote via Bothell, WA, June 2021 – Current

- Proficient in analyzing datasets to identify trends, outliers, and data inconsistencies.
- Skilled in validating data inputs, outputs, and transformations to maintain data integrity.
- Developed and executed data-driven test plans and scenarios to validate system functionality and performance.
- Hands-on experience working on Customer Integration Platform, end to end testing using subsystems D365, Salesforce, Azure portal, SQL, SOAP UI.
- Involved in different testing methods including functional, regression, database, integration testing, end to end and user acceptance testing.
- Collaborated with cross-functional teams to identify data requirements and implement QA solutions. Review functional specifications and business requirements to develop test cases, execute test cases, ensuring the quality and stability of the system throughout the project.
- Generated comprehensive QA reports and dashboards to communicate findings and track project progress.

Projects:

Sales Analysis on E-commerce business domain

Project Overview: Conducted a comprehensive sales analysis to identify trends, forecast future sales, and provide actionable insights to improve business performance.

Responsibilities:

- Data Collection and Cleaning: Gathered sales data from various sources including CRM systems, sales databases, and external market data. Cleaned and preprocessed data to ensure accuracy and consistency.
- Data Analysis: Performed exploratory data analysis (EDA) using pivot tables, conditional formatting in Excel to understand data distributions, identify anomalies, and discover patterns.
- Statistical Analysis: Applied descriptive statistical methods (Avg, Median, Mean, Range, count etc.) to analyze sales performance across different regions, products.
- Data Visualization: Created interactive dashboards and visualizations using Excel to present key insights to stakeholders. Visualizations included sales person performance, product performance, and regional comparisons.

Key Achievements:

- Identified underperforming products, sales person as per regions, leading to targeted marketing and sales strategies that increased sales by 10%.
- Provided actionable insights that helped streamline sales processes and optimize resource allocation.

Data Analyst -Volunteer

We Are Pistachio

Apr 2021 - Dec 2021 Seattle, Washington

- Gather and analyze data for potential business expansion
- Influence stakeholders to support business projects
- Assist with project management for selected projects
- Coordinate with different departmental teams to produce better business outcomes

Education:

Bachelor of Engineering, Major in Computer Engineering, Mumbai University, India

Professional Certifications:

- Google Data Analytics Certification, Foundation Data – Level 1, Completed in April 2021
- Google Data Analytics Certification, Ask Questions – Level 2, Completed in April 2021
- Excel Basics for Data Analysis, IBM Through Coursera May 2021
- Working on Microsoft Power BI Data Analyst certification, Expecting Completion on Aug 2024

Skills

- Advanced SQL
- Excel
- Python
- Statistical Analysis, Exploratory Data Analysis, Ad hoc Analysis
- Data Visualization tool – Power BI, familiar with Tableau
- Well versed in all stages of Software Development Life Cycle (SDLC) as well as Software Testing Life Cycle (STLC).
- Expertise on Black box Testing Techniques, Functional, Integration, System, Regression, User Interface and User Acceptance tests, Build Verification Test.
- Hands on experience in preparing Test plans, Test cases, Automated Tests and Test Data, and executing the same.
