PROJECTS

Ecommerce Store

May, 2024

- Developed a fully functional e-commerce store using Next.js, featuring product listings, admin authentication, and a seamless shopping experience.
- Implemented a full-featured admin panel enabling administrators to easily add, update, and remove products from the Prisma database.
- Integrated Stripe for secure and efficient payment processing, ensuring smooth and reliable checkout experience for customers.

Flask Website

December, 2023

- Developed a dynamic web application using Flask to create a simple inventory system for my dad's business.
- Implemented secure user authentication features with Flask-Login ensuring administrators can log in, log out, and update the inventory.
- Integrated SQLAlchemy to interact with the database, allowing for efficient storage and retrieval of data that the administrators of the website can push out.

JSDiscordBot

September, 2023

- Developed a discord bot utilizing discord.js to monitor and display client platform and status information.
- Designed to help identify suspicious activities, such as potential account compromise or unauthorized access to other people's accounts.
- Enables proactive detection of users logged in from multiple platforms simultaneously serving as a security measure against potential hacking attempts. This bot monitored discord servers with hundreds of members.

WORK EXPERIENCE

BTCs ORG

February 2023 – September 2023

Software Engineer & Affiliate Marketing Specialist

Remote

- Lead the development and implementation of a cutting-edge Discord bot coded in Python, seamlessly integrating with the Gamdom API to streamline affiliate management. Successfully optimized data retrieval processes, enhancing overall team efficiency.
- Discord bot was implemented to determine eligibility for opt-in marketing campaigns; consistently securing high-value sign-ups on Gamdom under our referral code. Leveraged a deep understanding of the platform to attract and retain top-performing affiliates.
- Conducted engaging daily live streams, fostering a dedicated audience of 50+ viewers. Showcased technical expertise and content creation skills to maintain a vibrant and interactive community.
