Profile

Enthusiastic and dedicated development engineer with four years of hands-on experience. Proficient in both front-end and back-end technologies, I bring a holistic approach to creating robust and scalable solutions. Beyond technical proficiency, I excel in client relationship management, leveraging strong communication skills to understand and fulfill client needs effectively. Committed to staying abreast of the latest industry trends and technologies, I am poised to contribute my expertise to innovative projects and drive excellence in everything I work on.

Professional Experience

Dec 2020 – Sep 2023

Hillsboro, OR

Software Developer at Novus Labs

- Developed a live streaming platform used for broadcasting live events in remote outdoor settings, this included a web application hosted with AWS and database integrations based on content purchases.
- Created a custom network bonding software/hardware platform which facilitated internet connectivity in low bandwidth outdoor locations.
- Participated in developing various Python and Java based software projects related to computer vision, hardware testing, and quality assurance.
- Collaborated closely with clients to understand their needs and vision for projects. Acted as a primary point of contact, ensuring clear communication throughout project lifecycles.

Sep 2020 – Sep 2020

Portland, OR

Dotnet Developer at Prosper IT Consulting

- Applied expertise in ASP.NET, C#, Entity Framework, and MVC frameworks to develop robust and scalable solutions in an agile Scrum environment.
- Collaborated with a cross-functional team to define user stories, refine requirements, and prioritize tasks for sprint planning.
- Utilized Entity Framework for seamless data access and management, enhancing application performance and reliability.
- Actively participated in sprint ceremonies, including daily stand-ups, sprint planning, sprint reviews, and retrospectives, to drive continuous improvement and project success.
- Demonstrated proficiency in debugging, resolving technical issues promptly to maintain project momentum and meet deadlines.

Aug 2020 – Aug 2020

Portland, OR

Django Developer at Prosper IT Consulting

- Leveraged Django framework, following the Model-View-Template (MVT) architecture, to develop a scalable web application within an agile Scrum environment.
- Integrated Django with SQL databases, ensuring seamless data management and efficient querying to meet project requirements.
- Participated in knowledge sharing sessions to promote best practices, maintain code consistency, and foster a collaborative development environment.
