📁 PROFESSIONAL EXPERIENCE

- Extensive experience in **Software Quality Assurance Testing, Development, and Analysis**.
- Strong knowledge of **Scrum and Agile** models in the **Software Development Life Cycle (SDLC)**.
- Expertise in all phases of the testing life cycle using **Agile & Waterfall** methodologies, including requirements gathering, providing estimates, scheduling, test planning, defect tracking, test case writing, and management.
- Experience in **manual and automation testing**, including developing test scripts, designing test procedures, and test cases for various user stories based on releases.
- Familiarity with **different testing techniques**, including sanity, smoke, performance, negative, black box, unit, integrated, system, security, and regression testing of web-based and client/server applications.
- Proficiency in overall defect management using **JIRA**, including problem-solving, tracking bugs, and reporting.
- Expertise in **developing automation test scripts** using **Selenium WebDriver with Java** and writing unique **XPath** using web elements.
- Experience using Maven build tools to manage framework dependency jar files and Apache **POI/JDBC** to read data from external sources to verify web application reliability.
- Experience in parallel and group execution (regression, smoke test scripts, etc.) using the **TestNG framework**, followed by the generation of test results.
- Expertise in developing, designing, and executing test cases for web applications using **Cucumber**, including developing **BDD scripts** and writing step definitions for behavior.
- Test scripts stored in **GIT based central repository tool** for Version Control.
- Experience using **Jenkins** for Continuous Integration by executing scheduled test scripts daily or whenever a code is pushed to production.
- Experience in **Groovy scripts** and performance evaluation of automation test scripts using **Jmeter**.
- Familiarity with **API Testing tools like SOAP UI and POSTMAN** for functional testing to validate requests and responses.
- Strong knowledge of Object-oriented programming languages such as **Java & Python**.
- Experience in database/backend testing and data extraction from various source tables by writing complex **SQL queries**, including preparing test data by executing SQL queries and joins.
- Effective communicator, committed team player, quick learner, and rapid problem solver with commitment, a strong work ethic, and the ability to quickly adapt to new environments.
- I possess technical aptitude with a strong, analytical, problem-solving mind, coupled with excellent organizational skills to handle multiple assignments concurrently.

📁 ENVIRONMENTS

Eclipse IDE (Maven and Java projects), Selenium WebDriver with Java, API testing-SoapUI & POSTMAN, SQL, JAVA, Python, JIRA, XPATH, Jenkins, TestNG Framework (Hybrid and POM), Cucumber-BDD, Jmeter.

🎓 EDUCATION

Master of Computer Applications (MCA)

Chaitanya Bharathi Institute of Technology (CBIT)/ Osmania University (affiliated)

July 2013 – July 2016

Hyderabad, Telangana, India

Bachelor of Science (B.Sc)

Navabharath Degree & P.G College/ Kakatiya University (affiliated)

July 2010 – May 2013

Khammam, Telangana, India

SKILLS

Languages/Technology : Java, C, Python, SQL and HTML

Automation Tools/ Framework : Selenium WebDriver with Java ,Python and Typescript (IDE:Eclipse), TestNG (Hybrid & POM), API Testing-POSTMAN/SOAPUI, Cucumber-BDD, Jenkins, Jmeter

Database: SQL

Bug Tracking Tool : JIRA

Operating Systems: Windows and Mac

Packages: MS-Word, Excel, Power Point

WORK EXPERIENCE

Software Test Engineer

Quess Corp Limited (Client: Cognizant)

May 2021 – June 2022

Hyderabad, Telangana, India

Project Description: As a Software Test Engineer for **Health Care Service Corporation (HCSC)**, I performed manual and automation testing on various healthcare and insurance-related software platforms. Summary of my responsibilities included creating and executing test cases, developing automation test scripts using Selenium WebDriver and Java, and utilizing test-driven methodologies and Agile/Scrum environment. I also tracked defects and managed test cases in JIRA, built a Cucumber automation framework, performed data-driven testing, and evaluated automation test script performance using JMeter. Overall, my work ensured that HCSC's software platforms met the highest standards of quality and functionality.

Role and Responsibilities:

- Worked in an **Agile/Scrum environment** and followed test-driven methodologies and SDLC using Agile methods.
- Developed automation test scripts using Eclipse IDE (**Maven and Java Projects**).
- Created various test scenarios and cases based on project requirements and modified automation scripts using **Selenium WebDriver with Java**.
- Utilized **Selenium Grid** for cross-platform and cross-browser testing.
- Managed automated and manual test cases in **JIRA** and tracked defects.
- Developed and maintained test results/reports using **TestNG**.
- Built a **Cucumber automation framework** from scratch using Java page objects.
- Utilized web-debugging tools like **XPath Helper** to locate web element XPaths.
- Conducted data-driven testing using **Apache POI library** in Selenium.
- Implemented Continuous Integration using **Jenkins**.
- Performed functional testing using **API tools (SOAP UI and POSTMAN)**.
- Evaluated automation test script performance using **JMeter**.
- Prepared data to cover various scenarios and wrote **SQL scripts** to verify database updates, inserts, and deletions.
- Implemented **Selenium Web-Driver** and automated, executed scripts on different browser and different platform using **Python**.

Quality Assurance Engineer

Zoylo Digihealth Private Limited

December 2019 – May 2021

Hyderabad, Telangana, India

Project Description: As a Quality Assurance Engineer for **Zoylo Digihealth Private Limited**, I ensured the quality and reliability of the company's healthcare software products. Summary of my responsibilities included developing and executing test cases, conducting manual and automation testing, and utilizing various testing tools and techniques. I also tracked and managed defects using JIRA, maintained test reports, and collaborated with cross-functional teams to resolve issues. Overall, my work ensured that Zoylo Digihealth's software products met the highest standards of quality and user experience, resulting in improved customer satisfaction and increased business growth.

Role and Responsibilities:

- Participated in **Agile methodologies** including Scrum and Sprint planning meetings.
- Analyzed system and business requirements to develop necessary **test cases and scripts**.
- Conducted **various testing activities** such as Optimal, Regression, Sanity, Retesting, and Smoke testing.
- Reported identified bugs using **JIRA tool**.
- Developed and maintained automated test scripts in **Selenium WebDriver using Java**.

- Used **TestNG** for Assertions, Grouping, and Parallel execution. Developed test cases for web applications using **Cucumber-BDD** and wrote step definitions for behavior.
- Implemented the **Page Object Model (POM)** to maintain separate class for each web page's functionality.
- Conducted functional testing using **API Testing tools** such as **SOAP UI** and **POSTMAN**.
- Sent outcome of schedule-based executed test cases to peers using **Jenkins**.
- Utilized **Maven** to build, execute, and manage dependency purpose (**POM.xml**) **jar files**.
- Used **Extent Reports** to generate HTML reports, maintain logs, and include screenshots of failed test cases for reporting purposes.
- Shared codes within the office and with the team oversees using **GitHub**.

Test Engineer

Servizon

August 2016 – Nov 2019

Hyderabad, Telangana, India

Project Description: As a Test Engineer at **Servizon**, I was responsible for ensuring the quality and functionality of the company's software products. This involved creating and executing test cases, developing automation test scripts, and conducting performance and load testing using various testing tools and techniques. I worked closely with cross-functional teams to identify and track defects, and collaborated with the development team to improve the software products' functionality and user experience. Additionally, I maintained test reports to keep stakeholders informed of testing progress and results. Overall, my work played a critical role in ensuring that Servizon's software products met the highest standards of quality and reliability.

Role and Responsibilities:

- Worked extensively with **Agile methodologies** throughout the testing life cycle and followed Test Driven Development methodologies.
- Participated in **scrum/sprint meetings** to stay aligned with the project's objectives.
- Conducted **regression testing** on new builds using QC after each modification of the application.
- Tested application functionality and documented pass-fail reports, created modification requests, and assigned them to developers using the **JIRA** tool.
- Developed and executed both **automation and manual test cases** to ensure the functional testing of various applications.
- Created automation test scripts using **Selenium WebDriver with Java**.
- Generated test reports using the **TestNG Framework**.
- Performed functional testing of APIs using tools such as **SOAP UI** and **POSTMAN**.

STRENGTHS

- Active learning
- Hard-working

ACTIVITIES

- Successfully completed training on both manual and automation software testing techniques.
- Acquired proficiency in Java programming language through training and practice.
- Actively participated in various events at the college level, showcasing strong teamwork and leadership skills.
