

Shalini Veerabhadraiah

Business Data Analyst

Chicago, IL | (872) 205-9930 | shaliniveerabhadraiah07@gmail.com | [LinkedIn](#) | [Github](#)

SUMMARY

Business Data Analyst with 4+ years of experience delivering data-driven solutions across financial services and healthcare domains. Proficient in SQL, Python, Power BI, and Tableau for data extraction, transformation, modeling, and visualization, with a strong foundation in requirements gathering, stakeholder management, and business process analysis. Experienced in documenting BRDs, functional specifications, and user stories, while building executive dashboards, conducting A/B testing and trend analysis, and facilitating JAD workshops in Agile/Scrum environments to align business, technology, and compliance teams.

TECHNICAL SKILLS

Data & Analytics Tools: SQL (Joins, CTEs, Window Functions), Python (Pandas, NumPy), Power BI (DAX, Data Modeling, Power Query), Tableau, Advanced Excel (Pivot Tables, VLOOKUP, XLOOKUP, INDEX/MATCH), Snowflake, MS SQL Server

Analysis & Methodology: Requirements Gathering, Gap Analysis, Impact Analysis, SWOT Analysis, A/B Testing, Root Cause Analysis, Process Mapping, Data Validation, Data Cleaning, ETL, Data Pipelines, Statistical Analysis, Trend Analysis, Financial Modeling

BA & Project Tools: Jira, Confluence, Figma, Microsoft Visio, Lucidchart, Smartsheet, Salesforce, HP Quality Center, SharePoint

Documentation & Reporting: Business Requirements Document (BRD), Functional Requirements Document (FRD), Software Requirements Specification (SRS), User Stories, Use Cases, Requirements Traceability Matrix (RTM), Executive Dashboards, KPI Reporting

Frameworks & Compliance: Agile/Scrum, SDLC, Waterfall, HIPAA, Data Governance, UAT, Regression Testing

WORK EXPERIENCE

Charles Schwab

April 2025 – Present

Business Data Analyst

USA

- Gathered and documented business requirements into BRDs, Functional Requirement Specifications, and user stories with acceptance criteria across 3 concurrent investment platform initiatives, ensuring traceability and clean handoff to engineering teams.
- Facilitated JAD workshops through cross-functional collaboration with stakeholders across compliance, operations, and technology to define data requirements, resolve conflicting priorities, and align on a product roadmap supporting regulatory and business objectives.
- Managed Jira backlog and requirements traceability matrix (RTM) in Confluence, conducting gap analysis and process mapping that reduced requirement-related rework by 20% and improved cross-functional alignment.
- Built 10+ Power BI dashboards and Tableau reports tracking portfolio KPIs and client activity trends, applying data modeling techniques and writing SQL and Python scripts for data extraction, transformation, and analysis from Snowflake.
- Conducted trend analysis and A/B testing on trade execution and client engagement data using Python and Excel, delivering data-driven recommendations that supported strategic planning and revenue optimization.
- Performed data validation, cleaning, and root cause analysis on trade settlement and reconciliation datasets during UAT, resolving data quality issues to improve accuracy of downstream reporting and dashboards.

Johari Digital Healthcare Ltd

Aug 2020 - Dec 2023

Business Analyst

India

- Led Agile sprint ceremonies including planning, backlog refinement, and daily scrums for healthcare IT initiatives, coordinating delivery of claims management and member interaction platform enhancements across 4 cross-functional teams.
- Conducted SWOT, impact, and gap assessments on claims processing and member engagement workflows, identifying optimization opportunities that improved operational productivity by 15%.
- Facilitated Joint Application Design (JAD) workshops with business stakeholders, product owners, and engineering teams to gather requirements, define acceptance criteria, and reduce approval cycle times.
- Built dynamic Tableau dashboards to track claims processing time, member experience scores, and provider performance KPIs, enabling data-driven executive reporting and strategic decision-making.
- Executed complex SQL queries to validate claims, enrollment, and billing datasets during UAT and regression testing, reducing data-related defects by 30% across production releases.
- Designed wireframes and UI prototypes in Figma for member-facing portal improvements, collaborating with UX/UI teams to enhance usability and decrease support inquiries by 12%.
- Partnered with claims operations, compliance teams, and IT leadership to ensure system solutions adhered to HIPAA regulatory standards, maintaining audit-ready documentation in Confluence and SharePoint that strengthened risk controls.

EDUCATION & CERTIFICATION

Master's in Computer Science - Depaul University, Chicago, IL

Microsoft Power BI Data Analyst Associate (PL-300)
